So many books about the American West leave out the more intriguing details When in 1803 the young USA doubled its size with the purchase from France of an unexplored vastness called La Louisiane it was a British bank which lent the Americans most of the 15 million that they didn t have So the financial papers for the biggest real estate deal in history are to this day held in a London vault Not many people know that If his ranching uncle by marriage had had his way the teenaged Winston Churchill a disappointing scholar might have been sent west to Wyoming to train as a cowboy Who knows but in time he himself might have become a rancher How then would history have turned out Another ranching Englishman played a key role in recruiting a small army of Texas gunmen to invade northern Wyoming and kill more than 40 small settlers men who had too easily been accused of being rustlers The plan went badly wrong But the Englishman had slipped away gone home on holiday It seems unlikely that Butch Cassidy was killed in a Bolivian shoot out It seems that he returned under a false name to live out his days in the West In 1935 he even submitted a autobiographical script to Hollywood only to have it rejected as being too preposterous to be believable He died two years later penniless Royal tourist visits the Colonies was the local
