Cosmos Carl Sagan,1989 *The Eclipse of God* Erwin W. Lutzer,2024-09-10 By design this volume comes as a direct hit Erwin Lutzer aims right at the center of our cultural crisis At heart it is a theological crisis R Albert Mohler Jr Is God More Tolerant than He Used to Be Just as the moon obscures the sun s light during an eclipse today s radical secularism has obscured the light of God But God s light still shines and He is calling us to shine His light in the growing darkness In *The Eclipse of God* bestselling author Erwin Lutzer exposes our nation s disastrous efforts to redefine God in its own image The resulting damage has been so great that confusion about God has even crept into the church This bold exposition will help you understand society s attempts to make God inclusive and sin friendly by exploring the intellectual roots of the present darkness renew your faith in God by replacing worldly misperceptions of Him with the biblical truths about His unchanging character resist cultural conformity by counting the cost of faith as you shine the gospel s light with accuracy and grace Timely and practical *The Eclipse of God* will deepen your love for the sovereign God of the Bible and empower you to live and speak as a light for Him in a culture of darkness **Cosmos 1999 - The Third Year of Space 1999** John K.

Balor,2019-07-10 What does Gerry Anderson s television series *SPACE 1999* have in common with Carl Sagan s award winning television documentary *COSMOS* Not very much one might expect but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives some of them arguing that two series may be so closely connected that it might be natural to think of *COSMOS* as the third year of *SPACE 1999* This book is written on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com **A Final Story** Nasser Zakariya,2017-11-14

Towards a Final Story is the first history of the modern scientific epic These epic stories pull together our knowledge of the universe uniting material and biological origins from beginning to end The authors of these epics among them Carl Sagan E O Wilson and Steven Weinberg saw their task as providing an integrated schema that would not only bring together but also go beyond the particular scientific results and disciplines available as they wrote their histories Nasser Zakariya traces how such epic stories could achieve what they claimed how they inhabit culture and politics and how they arrived at the present moment from a period in the previous century when inquiries into ultimate origins were regarded by many as unscientific and unanswerable These prominent popular historical narratives of science are important forms of knowledge in their own right They expose what science means in the wider culture and at the same time focus attention on the near paradoxical nature of a universal history narrated by humanity for humanity **Bang to Eternity and Betwixt** John Hussey,2014-07-31

1979 and Carl Sagan's *Cosmos* 1980 in order to show how each work fleshes out scientific concepts with a unique attention to affective wonder understood as the experience of and attunement to novel effects. What is so unique about these works is that they reenchant the scientific world without pandering to what Richard Dawkins will later term cosmic sentimentality. Carl Sagan may have said 'We are made of starstuff' but he would never insist as Joni Mitchell did in 1969 that 'we've got to get ourselves back to the garden.' Instead they insist on a third way that does not rely on the idea of an ecological Eden: a vigorously vital materialism in which the affective trumps the sentimental. Further, the historical emergence of these works, all published within 5 years of each other, was no accident: each book responded to an ever deepening sense of environmental crisis, certainly, but along with it they responded to perhaps more than marginally related narratives of the large-scale disenchantment brought on by modernity or science, and more often than not a mixture of the two. Greyson argues that the persistence of these works and their affectively charged scientific concepts in contemporary popular culture and ecological thought is no accident. As such, these works deserve recognition as far more than popular science and can be seen as essential contributions to more contemporary vital materialist thought and ecological theory. No doubt this talk of enchantment and wonder, so tied to immediate experience, can seem trivial in the face of any number of environmental crises: global warming, first among these, that do not just appear ominously on the horizon but loom as never before. The first task of this book, thus, to pose the same question that Jane Bennett does at the end of her own work on enchantment: How can someone write a book about enchantment in such a world? Does this approach really provide, as Latour phrases it, a way to bridge the distance between the scale of the phenomena we hear about and the tiny *Umwelt* inside which we witness, as if it were a fish inside its bowl, an ocean of catastrophes that are supposed to unfold? Ultimately, *Vital Reenchantments* argues that affective ecologies properly attended to point toward an open present, one that broadens the horizons of the fish bowl and allows us to imagine engendering futures that are neither naively hopeful nor hopelessly apocalyptic.

Vija Celmins Ian Alteveer, 2018-12-11 The beautiful catalogue that accompanies the critically acclaimed exhibition currently on view at the Metropolitan Museum. Best known for her striking drawings of ocean surfaces begun in 1968 and revisited over many years, both in drawings and paintings, Vija Celmins b. 1938 has been creating exquisitely detailed renderings of natural imagery for more than five decades. The oceans were followed by desert floors and night skies, all subjects in which vast expansive distances are distilled into luminous, meticulous and mesmerizing small-scale artworks. For Celmins, this obsessive redescribing of the world is a way to understand human consciousness in relation to lived experience. The first major publication on the artist in twenty years, this comprehensive and lavishly illustrated volume explores the full range of Celmins's work produced since the 1960s: drawings and paintings as well as sculpture and prints. Scholarly essays, a narrative chronology and a selection of excerpts from interviews with the artist illuminate her methods and techniques, survey her early years in Los Angeles where she was part of a circle that included James Turrell and Ken

Price and trace the development of her work after she moved to New York City and befriended figures such as Robert Gober and Richard Serra
