Drinkard,2009-09-23 Fire from the Goddess and the meat and furs of the mammoth are all that the People need to live It is a harsh life but a good one and it is one that all cherish Young Geerna knows that the time has come for her to become a woman and take up the tasks to keep her people safe She waits in the Awakening Place fearful and hopeful as her ordeals come to an end Then on the eve of her Womanhood a shining light descends upon her and her world is torn asunder And she embarks on a journey that none of her people could ever envision Eons have passed Cycle upon cycle the Way of the People have remain unchanged women are artists men are hunters Geerna s Law is the covenant by which humans live in harmony and peace But all is about to change A call has come for The People to choose their champions and a summons to meet the mysterious creatures who selected Geerna so long ago All is unknown As the brave souls who are chosen venture forth they will come to discover just how much that pact that Geerna made so long ago has cost them And they will have to confront the choices that might help them to finally know true freedom At the Publisher s request this title is being sold without Digital Rights Management Software DRM applied **Antarctica and the Arctic Circle** Andrew J. Hund,2014-10-14 This one stop reference is a perfect resource for anyone interested in the North and South Poles whether their interest relates to history wildlife or the geography of these regions in the news today

Global warming a hot topic among scholars of geography and science has led to increased interest in studying the earth's polar ice caps which seem to be melting at an alarming rate. This accessible two volume encyclopedia lays a foundation for understanding global warming and other issues related to the North and South Poles. Approximately 350 alphabetically arranged user friendly entries treat key terms and topics important to expeditions, major figures, territorial disputes, and much more. Readers will find information on the explorations of Cook, Scott, Amundsen, and Peary; articles on humpback whales, penguins, and polar bears; and explanations of natural phenomena like the Aurora Australis and the polar night. Expedition tourism is covered, as is climate change. Ideal for high school and undergraduate students studying geography, social studies, history, and earth science, the encyclopedia will provide a better understanding of these remote and unfamiliar lands and their place in today's world. Who were the first people who came to the land bridge joining northeastern Asia to Alaska and the northwest of North America? Where did they come from? How did they organize technology especially in the context of settlement behavior? During the Pleistocene era the people now known as Beringians dispersed across the varied landscapes of late glacial northeast Asia and northwest North America. The twenty chapters gathered in this volume explore in addition to the questions posed above how Beringians adapted in response to climate and environmental changes. They share a focus on the significance of the modern human inhabitants of the region. By examining and analyzing lithic artifacts, geoarchaeological evidence, zooarchaeological data, and archaeological features, these studies offer important interpretations of the variability to be found in the early material culture of the first Beringians. The scholars contributing to this work consider the region from Lake Baikal in the west to southern British Columbia in the east. Through a technological organization approach, this volume permits investigation of the evolutionary process of adaptation as well as the historical processes of migration and cultural transmission. The result is a closer understanding of how humans adapted to the diverse and unique conditions of the late Pleistocene. T.P.'s and Cassell's Weekly, 1925.
