Long March To Power:

From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule. **Invisible Armies** Max Boot, 2013-01-10 New York Times

Bestseller. A Washington Post Notable Book. Nonfiction. Named one of the Best Books of the Year by Foreign Policy. A New York Times Book Review Editors' Choice Selection. Destined to be the classic account of what may be the oldest, hardest form of war. John Nagl, Wall Street Journal. **Invisible Armies** presents an entirely original narrative of warfare which demonstrates that far from the exception, loosely organized partisan or guerrilla warfare has been the dominant form of military conflict throughout history. New York Times best-selling author and military historian Max Boot traces guerrilla warfare and terrorism from antiquity to the present, narrating nearly thirty centuries of unconventional military conflicts. Filled with dramatic analysis of strategy and tactics as well as many memorable characters from Italian nationalist Giuseppe Garibaldi to the Quiet American Edward Lansdale, **Invisible Armies** is as readable as a novel. Michael Korda, Daily Beast. A timely reminder to politicians and generals of the hard-earned lessons of history. Economist. **Politics and Purges in China**

Frederick C. Teiwes, 1993. Drawing upon released documents, memoirs, and party history, works the process and impact of the political campaigns in China between 1950 and 1965. Documented. Complete with extensive interviews with Chinese scholars and former officials, the book reviews the findings of the first edition. **Space, Politics, and Cultural**

Representation in Modern China Enhua Zhang, 2016-12-08. Regarding revolution as a spatial practice, this book explores modes of spatial construction in modern China through a panoramic overview of major Chinese revolutionary events and nuanced analysis of cultural representations. Examining the relationship between revolution, space, and culture in modern China, the author takes five spatially significant revolutionary events as case studies: the territorial dispute between Russia and the Qing dynasty in 1892, the Land Reform in the 1920s, the Long March 1934-36, the mainland-Taiwan split in 1949, and the Cultural Revolution 1966-76, and analyses how revolution constructs, conceives, and transforms space. Using materials associated with these events, including primarily literature as well as maps, political treatises, historiography, plays, film, and art.

the book argues that in addition to redirecting the flow of Chinese history revolutionary movements operate in and on space in three main ways maintaining territorial sovereignty redefining social relations and governing an imaginary realm Arguing for reconsideration of revolution as a reorganization of space as much as time this book will appeal to students and scholars of Chinese culture society history and literature

Women and Gender in Chinese Studies Nicola Spakowski, Cecilia Nathansen Milwertz, 2006 The State of the World's Girls report has tackled many topics girls in the global economy education girls affected by conflict and by disaster the new digital world and its implications both negative and positive for girls lives the challenges and risks of increasing urbanisation working with men and boys and looked at attitudinal structural and institutional barriers to gender equality

The Militarization and Weaponization of Space Matthew Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In *The Militarization and Weaponization of Space* Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People's Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics

China's Emergence as a Defense Technological Power Tai Ming Cheung, 2013-10-31 China is flexing its growing military and strategic clout in the pursuit of broadening national security interests At the same time the country's economic and technology policies have also become more nationalistic state centered and ambitious China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities although this is presently in the form of incremental and sustaining types of activities More high end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance This collection of articles has three main goals 1 to locate China's defense innovation dynamics within broader historical technological and methodological frameworks of analysis 2 to assess the performance of the Chinese defense economy's six principal subsectors and 3 to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region This book was originally published as a special issue of the *Journal of Strategic Studies*

John Adams's Nixon in China Professor Timothy A

Johnson, 2013-01-28 John Adams's opera *Nixon in China* is one of the most frequently performed operas in the contemporary literature. Timothy A. Johnson illuminates the opera and enhances listeners and scholars' appreciation for this landmark work. This music analytical guide presents a detailed in-depth analysis of the music tied to historical and political contexts. The opera captures an important moment in history and in international relations, and a close study of it from an interdisciplinary perspective provides fresh, compelling insights about the opera. The music analysis takes a neo-Riemannian approach to harmony and to large-scale harmonic connections. Musical metaphors drawn between harmonies and their dramatic contexts enrich this approach. Motivic analysis reveals interweaving associations between the characters based on melodic content. Analysis of rhythm and meter focuses on Adams's frequent use of grouping and displacement dissonances to propel the music forward or to illustrate the libretto. The book shows how the historical depiction in the opera is accurate yet enriched by this operatic adaptation. The language of the opera is true to its source but more evocative than the words spoken in 1972 due to Alice Goodman's marvelous poetic libretto. And the music transcends its repetitive shell to become a hierarchically rich and musically compelling achievement.

The Proceedings of 2023 International Conference on Wireless Power Transfer (ICWPT2023) Chunwei Cai, Xiaohui Qu, Ruikun Mai, Pengcheng Zhang, Wenping Chai, Shuai Wu, 2024-03-12 This book includes original peer-reviewed research papers from the 2023 International Conference on Wireless Power Transfer ICWPT2023 held in Weihai, China. China in Transformation Colin Mackerras, 2014-06-11 In the first half of the twentieth century, China moved from a millennium of imperial rule to the Communist Party-led People's Republic of China, which remains today. *China in Transformation* argues that this enormously significant period in Chinese history saw wrenching change throughout Chinese society, amounting to a social, cultural, and political transformation. This new, fully revised and updated edition takes full advantage of new research and formerly unavailable material to analyse the fascinating processes of revolution, reform, reaction, and change in China during the period. Mackerras discusses the wars, occupations, and uprisings that marked the period, including the Boxer Rebellion and the Japanese occupation, and includes a new chapter on postwar China and the Civil War. Examines nation building and revolutions, including the successful communist movement that has led to the rise of today's state. Acknowledges the prevalence of poverty and famine in the period but also gives space to the areas in which there was progress: the introduction of mass secular education, improvements in the status of women, and in a new chapter, details significant developments in culture, literature, and theatre. Written in an accessible style with a rich collection of documents, chronology, glossary, a guide to further reading, and a Who's Who summarising the careers and contributions of the main figures, this new edition is essential for all those interested in

understanding China's modern history Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29 Why the world's most resilient dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure **Wealth and Power** Orville Schell, John Delury, 2013 Two leading experts on China evaluate its rise throughout the past one hundred fifty years sharing portraits of key intellectual and political leaders to explain how China transformed from a country under foreign assault to a world giant *Revolutionary Discourse in Mao's Republic* David Ernest Apter, Tony Saich, 1994 This unique interpretation of the revolutionary process in China uses empirical evidence as well as concepts from contemporary cultural studies Apter and Saich base their analysis on recently available primary sources on party history accounts of the Long March and Yan'an period and interviews with veterans and their relatives Friends and Enemies , 2021-10-05 Friends and Enemies delivers a lucid and provocative history of one of the world's largest and most successful political organizations the Chinese Communist Party In tracing the traumatic and bitter struggles that forged modern China and analysing the Party's approach to the challenges of the future Brown successfully lays bare the inner workings of this enduring and formidable group **A Treatise on the Art of Weaving** Murphy, 1857

China and the World David Shambaugh, 2020-01-02 As the world evolves in increasingly unpredictable directions one of the key determinants of the future global order will surely be the impact of China No country and no society can escape China's reach indeed many seek its embrace China brings benefits to many but it's also a problematic interlocutor for others In China and the World one of the world's leading China specialists David Shambaugh has assembled fifteen leading international authorities on China to create the most comprehensive and up to date scholarly assessment of China's foreign relations and roles in international affairs The volume covers China's contemporary position in all regions of the world with

all major powers and across multiple arenas of China's international interactions. It also explores the sources of China's grand strategy, how the past shapes the present, and the impact of domestic factors that shape China's external behavior. China and the World is a uniquely focused and well organized volume that provides many insights into China's calculations and behavior and identifies a number of challenges China will face in the future. **The Incarnations** Susan Barker, 2016-05-03

Originally published in Great Britain in 2014 by Doubleday **Heroes Of The New Eden** Charles Morgan, 2014-04 Fergus Trasker, a completely irresponsible young man with no qualifications, passes himself off as an engineer and goes to work in an Australian gold mine in the Western Desert. There he meets Rhonda, another engineer who is trying to turn the town's population on to an eastern cult religion. Little orphan Fergus was brought up by feisty Auntie Patty, a woman addicted to marrying gangsters. Auntie P cautions him to grow up and treat his human relationships with a bit more of a responsible attitude. So although Rhonda, the engineer, is a rather tubby girl and not his type, really, he decides that he should prove himself to his aunt and help the girl establish her religion. Sadly, Fergus's Aunt Patty has not told him that he should be more responsible in all his other dealings in life, after all, she is a tearaway herself. So what happens to the town and indeed the mine? One way or another, things are not going to stay the same. **Wind Power in China** Julia Kirch Kirkegaard, 2018-11-12

Whilst China's growing economy is widely regarded as being responsible for severe environmental degradation and a high reliance on energy from fossil fuels, China is emerging as a potential leader in new green energy technologies. Outlining the extraordinary growth in China's wind power capacity since 2005, this book explores the deliberate creation of a whole industry and the strategy of transitioning the power sector to renewable energy by accelerated experimentation and through literally pushing the emerging wind power sector to its limits. Investigating how wind power may not always be considered as sustainable in a wider Chinese developmental context, the book traces the struggle China has had in getting this high technology sector to qualify as truly Chinese scientific development, whilst often being opaquely at the mercy of foreign expertise, technology, and certification. The book furthermore exposes the surprising nuances, dynamics, and potency of unexpected players in Chinese wind power marketisation. Complex interplays are revealed between wind turbine control systems, algorithms in critical software technology, relationships between suppliers, wind farm developers, financiers, the electrical grid itself, the coal lobby, the broader Chinese state, and much more. The book has important implications far beyond wind power and contemporary China studies, highlighting the much wider story of China's fragmented and experimental style of innovating, upgrading, and greening.
