paradigms that have dominated the field since the early twentieth century Separate chapters are devoted to new developments such as the rise of the blogosphere and satellite television news and their impact on journalism more generally Cultural Chaos will be essential reading for all those interested in the emerging globalised news culture of the twenty first century

Taking the Fight to the Enemy Adam L. Fuller, 2012-01-01 Neoconservatism is more of a disposition than a single political theory but it is an attitude that has had a profound impact on the broader conservative effort in the United States since the Fifties It is a unique blend of skepticism and fortitude about a host of wide ranging issues spanning culture economics and national defense This book looks at six neoconservative intellectuals Irving Kristol Gertrude Himmelfarb Norman Podhoretz Midge Decter Daniel Bell and Nathan Glazer and the intellectual influences on their thinking about the defects of communism fascism progressivism the dominant American culture and even capitalism itself This book looks at the gestation of political criticism within the pages of the neoconservatives own writings as well as the books they read and the thinkers they either learned from or came to fear The book looks at the ways in which the neoconservatives adapted Lenin s formula for success to conservative efforts in the United States arguing that neoconservatism is an anti ideology ideology in that it considers a New Class of professional ideologically motivated reformers to be the greatest problem facing the United States because of their increased efforts to technocratize ordinary life their moral relativism their efforts to usurp human nature and supplant it with their own utopian visions their anti Americanism and their unwillingness to face imminent dangers threatening the American way of life The book argues that the neoconservative political strategy is to take the fight to the enemy

Speaking of Evil Matthew Boedy, 2018-10-15 Rhetoric and the Responsibility to and for Language Speaking of Evil relocates the problem of evil the question of why God would allow for the existence of evil and surveys it as a rhetorical problem It raises this question if we speak evil how shall we speak of evil When we communicate we are naming and evil as the corruption of language plays a central role in that naming Evil freezes our words convinces us we have the sole right to their definitions and generally stifles the dynamic gift of language By looking at how people in different eras and situations have named evil this book suggests how we can better take responsibility for our words and why we owe a responsibility to language as our ethical stance toward evil

Paradoxes of Power David Skidmore, 2015-12-03 This book provides a lively and readable introduction to current debates over U S power and purpose in world affairs The end of the Cold War launched a new era in U S foreign policy The United States entered a period of unprecedented global power but one also characterized by new conflicts challenges and controversies The terrorist attacks of 9 11 and the subsequent U S military operations in Afghanistan and Iraq cast a spotlight on continuing debates over how the United States should best use its considerable international power to secure safety for Americans and stability in the world These debates involve two crucial questions Should U S foreign policy focus on securing vital interests that are narrowly defined or should the United States seek to spread U S institutions and values to other societies Should the United States exercise maximum

independence in the exercise of U S power abroad or work principally through multilateral institutions This book brings together many different voices to answer these questions and to add to our understanding of the issues Contributors include Andrew J Bacevich Max Boot Stephen G Brooks Ralph G Carter Robert F Ellsworth Niall Ferguson Francis Fukuyama Philip H Gordon Christopher Hitchens James F Hoge Jr Michael Ignatieff G John Ikenberry John B Judis Robert Kagan Charles Krauthammer Christopher Layne Michael Mandelbaum Joseph S Nye Jr Minxin Pei PEW Center for the People and the Press Jeffrey Record Paul W Schroeder Todd S Sechser Dimitri K Simes Stephen M Walt The White House William C Wohlforth

God Is Not Great Christopher Hitchens,2008-11-19 Christopher Hitchens described in the London Observer as one of the most prolific as well as brilliant journalists of our time takes on his biggest subject yet the increasingly dangerous role of religion in the world In the tradition of Bertrand Russell s *Why I Am Not a Christian* and Sam Harris s bestseller *The End Of Faith* Christopher Hitchens makes the ultimate case against religion With a close and erudite reading of the major religious texts he documents the ways in which religion is a man made wish a cause of dangerous sexual repression and a distortion of our origins in the cosmos With eloquent clarity Hitchens frames the argument for a more secular life based on science and reason in which hell is replaced by the Hubble Telescope s awesome view of the universe and Moses and the burning bush give way to the beauty and symmetry of the double helix [Groundwork for the Practice of the Good Life](#) Omedi

Ochieng,2016-10-14 What makes for good societies and good lives in a global world In this landmark work of political and ethical philosophy Omedi Ochieng offers a radical reassessment of a millennia old question He does so by offering a stringent critique of both North Atlantic and African philosophical traditions which he argues unfold visions of the good life that are characterized by idealism moralism and parochialism But rather than simply opposing these flawed visions of the good life with his own set of alternative prescriptions Ochieng argues that it is critically important to step back and understand the stakes of the question Those stakes he suggests are to be found only through a social ontology a comprehensive and in depth account of the political economic and cultural structures that mark the boundaries and limits of life in the twenty first century It is only in light of this social ontology that Ochieng then proffers an alternative normative account of the good society and the good life which he spells out as emergent from ecological embeddedness social entanglement embodied encounter and aesthetic engenderment At once sweeping and rigorous incisive and subtle original and revisionary this book does more than just appeal to intellectuals and scholars across the humanities and social sciences rather it opens up the academic disciplines to a whole new landscape of exploration into the biggest and most pressing questions animating the human experience *Letters to a Young Contrarian* Christopher Hitchens,2009-04-28 From bestselling author and

Der Karikaturenstreit und die Pressefreiheit. Wert- und Normenkonflikte in der globalen Medienkultur Bernhard Debatin, 2007 Die von der danischen Zeitung Jyllands Posten im September 2005 veröffentlichten Mohammed Karikaturen waren für manche ein Test der Grenzen der Pressefreiheit für andere nur eine bosartige und geschmacklose Provokation Für wiederum andere boten sie einen willkommenen Anlass zum gewalttätigen Protest Der Karikaturenstreit wirft eine Reihe von Fragen auf Geht es um die Verteidigung der Pressefreiheit oder um bloße Islamophobie Steht hier westliche Toleranz gegen östliche Borniertheit oder geht es um gegenseitigen Respekt und Zurückhaltung Wurde der ganze Konflikt durch die Medien künstlich erzeugt und angeheizt Müssen wir in der globalisierten Medienkultur eine neue Medienethik der interkulturellen Anerkennung entwickeln Und wie können wir erreichen dass dieser Respekt wechselseitig ist und nicht bloss zur liberalen Toleranz der Intoleranz wird To some the infamous Mohammed Cartoons that were published in September 2005 by the Danish newspaper Jyllands Posten tested the limits of the freedom of the press Others regarded them as a malicious and tasteless provocation And for yet others they were a welcome excuse for violent protests The cartoon debate raises a number of questions What is paramount here defense of the freedom of the press or mere Islamophobia Is Western tolerance pitted against Oriental narrow mindedness or is this rather an issue of mutual respect and restraint Was the whole conflict artificially created and inflamed by the media Do we need to develop a new media ethics of intercultural recognition in the global media culture And how can we ensure that this respect is mutual and not just laissezfaire tolerance of intolerance

The Cambridge Companion to George Orwell John Rodden, 2007-06-21 Publisher description *Religion and Knowledge* Elisabeth Arweck, 2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing

claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge
