Low Threshold Organic Thin Film Laser Devices Christian Karnutsch, 2007 Low Threshold Organic Semiconductor Lasers Yue Wang, 2013-10-01 This thesis focuses on two areas the development of miniature plastic lasers that can be powered by LEDs and the application of these lasers as highly sensitive sensors for vapours of nitroaromatic explosives e.g. TNT Polymer lasers are extremely compact visible lasers the research described in the thesis is groundbreaking driving forward the technology and physical understanding to allow these lasers to be routinely pumped by a single high power LED A notable advance in the work is the demonstration of nanoimprinted polymer lasers which exhibit the world's lowest pump threshold densities by two orders of magnitude The thesis also advances the application of these compact novel lasers as highly sensitive detectors of explosive vapours demonstrating that rapid detection can be achieved when microporous polymers are used This work also demonstrates a prototype CMOS based microsystem sensor for explosive vapours exploiting a new detection approach **Low Power RF Circuit Design in Standard CMOS Technology** Unai Alvarado, Guillermo Bistué, Iñigo Adín, 2011-10-18 Low Power Consumption is one of the critical issues in the performance of small battery powered handheld devices Mobile terminals feature an ever increasing number of wireless communication alternatives including GPS Bluetooth GSM 3G WiFi or DVB H Considering that the total power available for each terminal is limited by the relatively slow increase in battery performance expected in the near future the need for efficient circuits is now critical This book presents the basic techniques available to design low power RF CMOS analogue circuits It gives circuit designers a complete guide of alternatives to optimize power consumption and explains the application of these rules in the most common RF building blocks LNA mixers and PLLs It is set out using practical examples and offers a unique perspective as it targets designers working within the standard CMOS process and all the limitations inherent in these technologies Neuroscientific Foundations of Anesthesiology George A. Mashour, Ralph Lydic, 2011-10-05 Although the perioperative care of patients by anesthesiologists draws on diverse clinical skills the principles of anesthesiology and pain management are rooted in the neurosciences The Neuroscientific Foundations of Anesthesiology thoroughly examines the anesthetic modulation of the central peripheral and autonomic nervous systems and will help redefine anesthesiology as a fundamentally neuroscientific field The book is organized by sections with each focusing on a different part of the nervous system State of the art chapters written by thought leaders in anesthesiology and neuroscience provide a novel and invaluable resource **Excitatory Amino Acids Their Role in Neuroendocrine Function** Darrell W. Brann, Virendra B. Mahesh, 1995-10-24 This publication focuses on the neuroendocrine functions of excitatory neurotransmitters in the brain known as the excitatory amino acid transmitters EAAs EAAs such as glutamate and aspartate regulate the release of pituitary hormones which in turn effect most of the physiological systems in the body This book gives detailed coverage of the role of EAAs in reproduction growth the stress axis seasonal breeding puberty learning and memory

Enteric Nervous System Jackie D. Wood, 2011-08-01 Minute to minute behavior of the alimentary tract reflects the integrated functioning of the gut's musculature secretory glands and blood lymphatic vasculature Activity of the three effector systems to generate functionally effective patterns of behavior which are adaptive for differing digestive states is organized and coordinated by the enteric nervous system i.e. the brain in the gut The heuristic model for the enteric nervous system ENS is the same as for all integrative nervous systems whether in vertebrate or invertebrate animals Like other integrative nervous systems such as the spinal cord and brain stem the ENS functions with sensory neurons interneurons and motor neurons That the gut does not work without the ENS can be made as an absolute statement This is apparent in its absence in terminal regions of the large intestine in Hirschsprung's disease in humans and animals where it is reflected by dysfunctional motility failure of defecation and proximal fecal compaction within a proximal megacolon Autoimmune ablation of the ENS in the lower esophageal sphincter underlies the pathophysiology of achalasia Furthermore neuropathic degeneration of ENS neurons in irritable bowel syndrome other functional gastrointestinal disorders intestinal pseudoobstruction Chagas disease paraneoplastic syndrome and enteric ganglionitis underlies the morbidity associated with these disorders The impact of these clinical disorders on quality of life and cost of health care is a reminder of the importance of the ENS for a normally functioning gut Moreover our incomplete understanding of the pathobiology of these disorders highlights a need for research directed to expansion of current knowledge of the neurobiology of the ENS at all levels of organization from the cellular biology of individual neurons to the biophysics of integrated networks to whole organ behavior Investigation of the normal and disordered ENS and its interactions with the central nervous system is a branch of neurogastroenterology Neurogastroenterology is a scientific and clinical subspecialty of gastroenterology that deals with the neural mechanisms that influence function of the digestive tract and that underlie projection of conscious sensations to the gut

Religion in the Neoliberal Age François Gauthier, 2016-04-08 This book together with a complementary volume Religion in Consumer Society focuses on religion neoliberalism and consumer society offering an overview of an emerging field of research in the study of contemporary religion Claiming that we are entering a new phase of state religion relations the editors examine how this is historically anchored in modernity but affected by neoliberalization and globalization of society and social life Seemingly distant developments such as marketization and commoditization of religion as well as legalization and securitization of social conflicts are transforming historical expressions of religion and religiosity yet these changes are seldom if ever understood as forming a coherent structured and systemic ensemble Religion in the Neoliberal Age includes an extensive introduction framing the research area and linking it to existing scholarship before looking at four key issues 1 How changes in state structures have empowered new modes of religious activity in welfare production and the delivery of a range of state services 2 How are religion state relations transforming under the pressures of globalization and neoliberalism 3 How historical churches and their administrations are undergoing change due to structural changes in society and what new forms of religious body are emerging 4 How have law and security become new areas for solving religious conflicts Outlining changes in both the political institutional and cultural spheres the contributors offer an international overview of developments in different countries and state of the art representation of religion in the new global political economy

Switched Reluctance Motor Drives Berker Bilgin, James Weisheng Jiang, Ali Emadi, 2019-04-29 Electric motors are the largest consumer of electric energy and they play a critical role in the growing market for electrification Due to their simple construction switched reluctance motors SRMs are exceptionally attractive for the industry to respond to the
