communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies Thus we can speak of a mediumistic trial that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other
