Development of the Idea of History in Antiquity Gerald A. Press, 2003-09-10 An extensive scholarly literature written in the past century holds that in ancient Greek and Roman thought history is understood as circular and repetitive a consequence of their anti temporal metaphysics in contrast with Judaeo Christian thought which sees history as linear and unique a consequence of their messianic and hence radically temporal theology Gerald Press presents a more general view that the Graeco Roman and Judaeo Christian cultures were fundamentally alien and opposed cultural forces and that therefore Christianity s victory over paganism included the replacement or supersession of one intellectual world by another and then shows that contrary to this view there was substantial continuity between pagan and Christian ideas of history in

antiquity rather than a striking opposition between cyclic and linear patterns He finds that the foundation of the Christian view of history as goal directed lies in the rhetorical rather than the theological motives of early Christian writers

CHRISTIANITY & THE WORLD Dr.LI, JIN WEI,2022-10-08 This series of complete works is an introduction and a detailed discussion of the influence of Christianity on all levels of the world and the inextricable relationship between the environment and religion especially the world s largest Christianity with 2 2 billion believers worldwide A person who does not understand religion especially Christianity cannot properly understand our world cannot adapt to many things and even makes wrong decisions in many aspects This series of collections are aimed at people from all walks of life regardless of their beliefs or non beliefs to understand and study the role of Christianity and other major religions in international relations within and outside countries and predict their impact and prospects in various social fields The development of society has important reference value This series of complete works consists of ten books and each book has an introduction summary at the beginning and the order is arranged according to the first word of English 1 Christianity and World Civilization 2 Christianity and World Culture 3 Christianity and World Economy 4 Christianity and World History 5 Christianity and World Law 6 Christianity and World Outlook 7 Christianity and World Peace 8 Christianity and World Politics 9 Christianity and World Religions 10 Christianity and Universal Values *Western Political Thought in Dialogue with Asia* Cary J.

Nederman,Takashi Shogimen,2008-12-16 Given the rise of globalization and coinciding increase in cultural clashes among diverse nations it has become eminently clear to scholars of political thought that there exists a critical gap in the knowledge of non Western philosophies and how Western thought has been influenced by them This gap has led to a severely diminished capacity of both state and nonstate actors to communicate effectively on a global scale The political theorists area scholars and intellectual historians gathered here by Takashi Shogimen and Cary J Nederman examine the exchange of political ideas between Europe and Asia from the Middle Ages to the early twentieth century They establish the need for comparative political thought showing that in order to fully grasp the origins and achievements of the West historians of political thought must incorporate Asian political discourse and ideas into their understanding By engaging in comparative studies this volume proves the necessity of a cross disciplinary approach in guiding the study of the global history of political thought

CHRISTIANITY AND WORLD CIVILIZATION Dr.LI, JIN WEI,2022-09-01 Christianity constitutes the civilization to which we all in some way belong Therefore we can t consider it in the same way as ancient civilizations which we can only glimpse through the opaque medium of archeology or in the same way as the civilizations of the non European world that we strive to understand outside and from afar This implies a difference in the quality of our judgment which can be compared to the astronomer s science of a planet and the geographer s knowledge of the earth we live on For the study of Western civilization not only do we have a much more abundant reserve of materials than any other but we also have a more profound and intimate knowledge of it Western civilization is the atmosphere in which we breathe and the life we live It is our way of life

and that of our ancestors therefore we know it not only from documents and monuments but also through our personal experience Let us imagine for a moment a study of religion that ignored or left aside the accumulated experience of the Christian past that he used only the distant and partly incomprehensible testimonies drawn from the study of foreign religious traditions that he resorted to abstract notions about the nature of religion and the conditions of spiritual knowledge Such a study would be incomplete inconsistent and without truth This shows us the way forward in considering the problem of the relationship between religion and civilization It is an intricate and pervasive web of connections that unite social life with spiritual beliefs and values beliefs and values that are recognized by society as the supreme norms of life and the definitive models of individual and social behaviour because these relationships can only be concretely studied in their total historical reality The world's great religions are rivers of sacred traditions flowing through the centuries and the changing historical landscape they rinse and fertilize Still ordinarily we cannot go up to the source lost in the unexplored regions of a distant past It is rarely possible to find a civilization in which religious evolution can be traced from one end to the other in the whole light of history But the history of Christianity is an extraordinary exception to this rule We know the historical framework in which it first arose we have letters from the Churches founders to the first Christian communities in Europe and we can trace the new religion's entry into the West in great detail After that and especially during the last sixteen centuries the quantity of documents available for study is so considerable that a single intelligence can't grasp them in their entirety Consequently the study of Western religion and civilization is complex and challenging for a reason contrary to that which makes the study of ancient or prehistoric Eastern religions difficult we know too much rather than too little But while this specialization has succeeded in increasing our knowledge in almost all aspects of history it has had a deleterious influence on the study that occupies us as it has led to the separating and dividing elements that we must bring together On the one hand the scientific historian has concentrated his research on the criticism of sources and documents while on the other the student of Christianity has devoted himself to the history of dogmas and ecclesiastical institutions The result is that we have many different and very advanced kinds of studies constitutional history political history and economic history on the one hand ecclesiastical history history of dogmas and history of the liturgy on the other But the vital subject of reciprocity of influence between religion and civilization and the fecundating power of the latter Meanwhile new social forces have emerged outside the academic world that uses history or a particular version of history for social ends to transform human life and actions And the appearance of these new political ideologies of history has shown that the progress of scientific specialization has in no way diminished man's need for a historical faith for an interpretation of contemporary civilization in terms of social evolution and goals Spiritual whether these ends are defined in religious or secular formulas This conflict of ideologies the Marxist doctrine of historical materialism and the attempt of the new totalitarian states to create historical myths as the psychological basis of social unity

Understanding Western Society: A History, Volume Two John P.

McKay, Bennett D. Hill, John Buckler, Clare Haru Crowston, Merry E. Wiesner-Hanks, Joe Perry, 2014-10-03 Understanding Western Society Second Edition features a brief question drive narrative that models for students the inquiry based methods used by historians and helps students understand what s really important to know about Western civilization **Conference Proceedings. The Future of Education. 8th Edition** Pixel, 2018 Athens in Jerusalem Yaacov Shavit, 1997-10-01 According to the author the Hellenistic tradition played a role as a model for Jewish modernisers to draw upon as they perceived a lack in Jewish culture The author believes that Greek and Hellenistic concepts are now internalised by the Jewish people **Undergraduate Announcement** University of Michigan--Dearborn, 1983 Critique of Latin American Reason Santiago Castro-Gómez, 2021-09-21 Critique of Latin American Reason is one of the most important philosophical texts to have come out of South America in recent decades First published in 1996 it offers a sweeping critique of the foundational schools of thought in Latin American philosophy and critical theory Santiago Castro G mez argues that Latin America is not so much a geographical entity a culture or a place but rather an object of knowledge produced by a family of discourses in the humanities that are inseparably linked to colonial power relationships Using the archaeological and genealogical methods of Michel Foucault he analyzes the political literary and philosophical discourses and modes of power that have contributed to the making of Latin America Castro G mez examines the views of a wide range of Latin American thinkers on modernity postmodernity identity colonial history and literature also considering how these questions have intersected with popular culture His critique spans Central and South America and it also implicates broader and protracted global processes This book presents this groundbreaking work of contemporary critical theory in English translation for the first time It features a foreword by Linda Mart n Alcoff a new preface by the author and an introduction by Eduardo Mendieta situating Castro G mez s thought in the context of critical theory in Latin America and the Global South Two appendixes feature an interview with Castro G mez that sheds light on the book s composition and short provocations responding to each chapter from a multidisciplinary forum of contemporary scholars who resituate the work within a range of perspectives including feminist Francophone African and decolonial Black political thought **Judaic Sources and Western Thought** Jonathan Jacobs, 2011-06-16 This volume focuses on the distinct character of Judaic thought concerning moral value the individual human being the nature of political order relations between human beings and between human beings and God The work of ten scholars it draws on moral philosophy philosophy of religion ethics Jewish intellectual history and theology **The Core Values of Chinese Civilization** Lai Chen, 2016-12-20 Drawing on the core values of western civilization the author refines the counterparts in Chinese civilization summarized as four core principles duty before freedom obedience before rights community before individual and harmony before conflict Focusing on guoxue or Sinology as the basis of his approach the author provides detailed explanations of traditional Chinese values Recent scholars have addressed the concept of guoxue since the modern age sorting through it and piecing it together which has produced an extremely abundant range of

information. However, given that the concepts and theories involved have been left largely unanalyzed, this book develops a theoretical treatment of them in several important respects. First, it analyzes the mindset of guoxue, examining the dominant ideas and values of the era from which the term guoxue arose, focusing on its connection to early changes and trends in society and culture, and distinguishing three key phases of development. Past scholars mainly had in mind the range of objects studied in guoxue when defining it, and what this book underscores is the meaning of guoxue as a modern body of research. Secondly, it assesses several phases in the modern evolution of the body of guoxue research, from the beginning to the end of the 20th century, i.e., ending with the later phase of the National Heritage movement. Third, and lastly, the book explores the various main modes of modern guoxue, which correspond step by step with the evolutionary phases of guoxue research.
