Meaningful Certainty:

Patterns, Meaningful Units and Specialized Discourses Ute Römer, Rainer Schulze, 2010-06-30 This collection of papers explores some facets in the areas of Corpus Linguistics and Phraseology which have gone unnoticed so far. With the aid of a range of different corpora and new generation software tools the authors tackle specialized domains and discourse in specialized settings utilizing some innovative approaches to the study of recurrent features and patterns in the languages of economics, history, linguistics, politics and other fields. The papers critically examine contemporary discourses in which experts and laypersons are equally involved, showing that the spoken and written texts selected from various specialized corpora can be seen as collective memory banks. The series of reflections and specialized meanings uncovered in these texts are closely tied to particular sequences of patterned chunks in language and offer exciting insights into the inseparability of lexis and grammar. The contributions to this volume were previously published in *International Journal of Corpus Linguistics* 13.3, 2008.

Action, Meaning, and Argument in Eric Weil's Logic of Philosophy Sequoya Yiaueki, 2023-04-12 This volume investigates Eric Weil's innovative conceptualization of the place of violence in the philosophical tradition with a focus on violence's relationship to language and to discourse. Weil presents violence as the central philosophical problem. According to this reading, the western philosophical tradition commonly conceptualizes violence as an expression of error or as a consequence of the weakness of will. However, by doing so, it misses something essential about the role that violence plays in our conceptual development as well as the place violence holds in our discursive practices. The author draws comparisons between Weil's work and that of Robert Brandom. Brandom's inferentialism creates a sophisticated program at the junction of pragmatics and semantics, philosophy of language, logic and philosophy of mind. The monograph builds on these insights in order to show how an inferentialist reading of Eric Weil is fruitful for both Weilian studies and for inferentialism. This volume will notably be of interest to scholars in philosophy, argumentation theory and communication studies.

Educating for Meaningful Lives Scott Webster, 2009-01-01 Why are students becoming disengaged from schooling? Many teachers, administrators and designers of policy and curriculum are expressing concern over this issue. Current approaches to schooling are dominated by a perceived need to enable learners to particulate in the knowledge economy. Both knowledge and learning how to learn, knowledge have become the primary discourses in schooling rather than education. School curricula rarely offer any sense of personal significance and for many learners such an approach to the curriculum is meaningless. Educating for meaningful lives must be a central aim for educative curricula. This book offers curriculum designers and teachers a greater understanding of this relation that education has with living significantly meaningful lives and it does so through the notion of existential spirituality. Spirituality is not to be reduced to something religious but rather pertains to how a life is lived. An existential perspective enables the meaningfulness of life to provide the necessary significance which is required of a curriculum if it is to be understood as offering personal meaning for learners.

Approaching the design and teaching of curricula through this perspective of existential spirituality enables learners to live a meaningful life in an uncertain world *Normativity, Meaning and Philosophy: Essays on Wittgenstein* Hans-Johann

Glock,2024-04-09 This is a collection of essays on Wittgenstein and Wittgensteinian themes that appeared between 1996 and 2019 It is divided into three parts with a common trajectory laid out in a substantial introduction The first part links meaning necessity and normativity It defends and modifies Wittgenstein's claim that the idea of a grammatical rule holds the key to understanding linguistic meaning and its connection to necessary truth The second part elucidates the connections between meaning concepts and thought in Wittgenstein and beyond It shows how he laid the grounds for a sound understanding of four contested issues radical interpretation concepts nonsense and animal minds The third part provides a qualified defence of Wittgenstein's controversial idea that philosophical problems are conceptual and thereby rooted in confusions concerning the meanings of and semantic relations between linguistic expressions Against irrationalist interpretations it demonstrates that Wittgenstein's method is argumentative rather than therapeutic The collection as a whole makes a powerful case for an analytic perspective on Wittgenstein The essays bring out the abiding relevance of Wittgenstein's reflections to contemporary debates on central topics such as the role of normativity the foundations of linguistic meaning the nature of concepts the possibility of animal thought and the proper methods of philosophy **Negative Hermeneutics and the Question of**

Practice Nicholas Davey,2023-12-28 How do words and images function hermeneutically How does hermeneutic practice work Answering these questions and more Nicholas Davey develops the hermeneutical foundations of creative practice In doing so he not only uncovers the significance of philosophical hermeneutics for the arts and the humanities but defends the humanities as a whole from the current scepticism inspired by deconstruction and post structuralism Taking Gadamer's language ontology as its cue this pioneering volume not only addresses certain weaknesses that Davey observes in Gadamer's thought but further takes Gadamerian thinking beyond Gadamer himself In particular Davey investigates the productive value of negativity that is central to hermeneutics and to wider spheres of creative learning Advocating a renewed confidence in hermeneutics and the humanities *Negative Hermeneutics and the Question of Practice* reveals how hermeneutical thinking provides a map of the dynamics within creative practice eliminating the need for an externally imposed theory of the arts

THEORIES OF SUICIDE John F. Gunn, David Lester, 2015-06-01 Some researchers in the field of suicidology think that the old theories of suicide are too constraining and impede advances in the understanding of suicide However the book's authors are not quite so critical of past theories In the book they review the classic theories of suicide both psychological and sociological because they are the foundation of our current theories and also propose the skeletons of possible future theories The goal of the text is to present researchers with theories to guide their research encourage them to modify these theories perhaps meld them together in some cases and think how they might propose new theories Presented in three sections the first reviews significant psychological theories including Suicide as Escape Interpersonal Psychological theory The Role of Defeat and Entrapment in Suicidal Behavior Suicide Ethology and Sociobiology Stress Diatheses Cognitive Theories Learning Perspective on Suicide Theories of Personality and Suicide Typological Theories and the Pathophysiology of Suicide The second section of the text addresses Sociological and Economic Theories including Suicide as Deviance Naroll's Thwarting Disorientation Theory three classic sociological theories as well as several minor theories A comprehensive chapter on economic theories is offered by Bijou Yang The final section concentrates on Critical Thoughts About Theories of Suicide a new and growing influence in academia and scholarship

Rebirth of a Culture Hillary Hope Herzog, Todd Herzog, Benjamin Lapp, 2008 After 1945 Jewish writing in German was almost unimaginable and then only in reference to the Shoah Only in the 1980s after a period of mourning silence and processing of the trauma did a new Jewish literature evolve in Germany and Austria This volume focuses on the re emergence of a lively Jewish cultural scene in the German speaking countries and the various cultural forms of expression that have developed around it Topics include current debates such as the emergence of a post Waldheim Jewish discourse in Austria and Jewish responses to German unification and the Gulf wars Other significant themes addressed are the memorialization of the Holocaust in Berlin and Vienna the uses of Kafka in contemporary German literature and the German and American Jewish dialogue as representative of both the history of exile and the globalization of postmodern civilization The volume is enhanced by contributions from some of the most significant representatives of German Jewish writing today such as Esther Dischereit Barbara Honigmann Jeanette Lander and Doron Rabinovici The result is a lively dialogue between European and North American scholars and writers that captures the complexity and dynamism of Jewish culture in Germany

Neural Networks In Vision And Pattern Recognition Walter Karpplus, Josef Skrzypek, 1992-07-15 The neural network paradigm with its various advantages might be the next promising bridge between artificial intelligence and pattern recognition that will help with the conceptualization of new computational artifacts This volume contains ten papers which represent some of the work being done in the field such as in computational neuroscience pattern recognition computational vision and applications

Creating Contexts for Learning and Self-authorship Marcia B. Baxter Magolda, 1999 This book is intended to help college faculty create conditions in which students learn to construct knowledge in their disciplines and achieve self authorship A significant and often overlooked dimension mediating learning and self authorship centers on learners ways of knowing or their assumptions about the nature limits and certainty of knowledge A learner who assumes that all knowledge is certain expects to hear answers from an authority figure in contrast a learner who

views knowledge as relative expects to explore multiple viewpoints By taking a constructive developmental approach the author demonstrates how students ability to construct knowledge is intertwined with the development of their assumptions about knowledge itself and their role in creating it She shows how the structure of constructive developmental teaching hinges on three principles validating students ability to know situating learning in students experience and defining learning as teachers and students mutually constructing meaning The book also takes abstract pedagogical principles and translates them into practical approaches

Meaning and Action Horace Standish Thayer, 1981-01-01 Feminist Interpretations of G.W.F. Hegel Patricia Jagentowicz Mills, 1996 A pivotal figure in critical theory and the modern postmodern debates G W F Hegel is the subject of differing feminist critiques Going beyond and behind Simone de Beauvoir s creative appropriation of Hegel in *The Second Sex* the essays gathered together here think both with and against the grain of Hegel s dialectical theory through the lens of gender issues found in his philosophy Some of the authors focus on prominent passages on woman and the feminine in Hegel s work while others argue that it is interpretations of the margins of his text that are most telling Hegel articulates one of the central questions with which political feminists are concerned how to conceptualize identity and difference A point of contention among the authors is whether or not Hegel s speculative system with its they are the articulation of the many different strategies and positions of the vigorous debate that defines feminist theory today

A Theory of Textuality Jorge J. E. Gracia, 1995-07-01 This is the first comprehensive and systematic theory of textuality that takes into account the relevant views of both analytic and Continental thinkers and also of major historical figures The author shows that most of the confusion surrounding textuality is the result of three factors a too narrow understanding of the category a lack of a proper distinction among logical epistemological and metaphysical issues and a lack of proper grounding of epistemological and metaphysical questions on logic analyses The author begins with a logical analysis of the notion of text resulting in a definition that serves as the basis for the distinctions he subsequently draws between texts on the one hand and language artifacts and art objects on the other and for the classification of texts according to their modality and function The second part of the book uses the conclusions of the first part to solve the various epistemological issues which have been raised about texts by philosophers of language semioticians hermeneuticists literary critics semanticists aestheticians and historiographers

The Development and Meaning of Twentieth-century Existentialism William Leon McBride, 1997 This collection of essays and reviews represents the most significant and comprehensive writing on Shakespeare s *A Comedy of Errors* Miola s edited work also features a comprehensive critical history coupled with a full bibliography and photographs of major productions of the play from around the world In the collection there are five previously unpublished essays The topics covered in these new essays are women in the play the play s debt to contemporary theater its critical and performance histories in Germany and Japan the metrical variety of the play and the distinctly modern perspective on the play as containing dark and disturbing elements To compliment these new essays the collection features significant

scholarship and commentary on *The Comedy of Errors* that is published in obscure and difficult accessible journals, newspapers and other sources. This collection brings together these essays for the first time.
