*The Measure of Man* David J. Levy, 1993      **Modernity's Wager** Adam B. Seligman, 2009-02-09 Adam Seligman one of our most important social thinkers continues the incisive critique of modernity he began in his previously acclaimed *The Idea of Civil Society* and *The Problem of Trust* In this provocative new work of social philosophy Seligman evaluates modernity's wager namely the gambit to liberate the modern individual from external social and religious norms by supplanting them with the rational self as its own moral authority Yet far from ensuring the freedom of the individual Seligman argues the fundamentalist doctrine of enlightened reason has called into being its own nemesis in the forms of ethnic racial and identity politics Seligman counters that the modern human must recover a notion of authority that is essentially transcendent but which extends tolerance to those of other or no faiths Through its denial of an authority rooted in an experience of transcendence modernity fails to account for individual and collective moral action First deprived of a sacred source of the self depictions of moral action are reduced to motives of self interest Second dismissing the sacred leaves the resurgence of religious movements unexplained In this rigorous and imaginative study Seligman seeks to discover a durable source of moral authority in a liberalized world His study of shame pride collective guilt and collective responsibility demonstrates the mutual relationship between individual responsibility and communal authority Furthermore Seligman restores the indispensable role of religious traditions as well as the features of those traditions that enhance rather than denigrate tolerance Sociologists political theorists moral philosophers and intellectual historians will find Seligman's thesis enlightening as will anyone concerned with the ethical and religious foundations of a tolerant society      Politics, Order and History Stephen McKnight, Glenn Hughes, Geoffrey Price, 2001-01-01 This volume brings together critical review papers many specially commissioned on key themes and questions in the work of the political scientist philosopher and religious thinker Eric Voegelin 1901-1985 Areas covered include 1 Political science Political Religions manifestations in Nazi Germany and in contemporary European and North American nationalism 2 International relations the Cold War in critical perspective 3 Philosophy Plato and Aristotle in the reading of Eric Voegelin contemporary assessments 4 Sociology Correspondence of Voegelin and Alfred Schütz 5 New Testament studies and Christology questions and developments for Voegelin's interpretations 6 Old Testament studies questions and developments from Voegelin's *Israel and Revelation* 7 Historical sociology *Revelation and order in axial age societies* 8 Philosophy of history Voegelin and Toynbee in contrast 9 Literary studies Voegelin in contrast with contemporary literary theory critical readings of Milton Greek tragedy      **Liberalism Versus Conservatism** François B. Gérard, 2000 Everyone eschews labels yet we all seem to possess them in the minds of legions of politicians marketers and even the ever peering government We are being targeted daily by flaming liberals left wing liberals right wing conservatives compassionate conservatives religious conservatives and liberals pinko liberals middle of the road liberals conservatives and liberals pinko liberals middle of the road liberals and conservatives and of course by

neoconservatives and neoliberals The search is on for kindred souls the types who will open their wallets to support whatever it is the hucksters are peddling But what to these concepts mean and do their torchbearers grasp the underlying philosophies or do they care This bibliography lists over hundreds of entries under each category which are then indexed by title an author

*Responses to Nazism in Britain, 1933-1939* D. Stone, 2003-09-09 This book examines the large and previously neglected body of literature on Nazism that was produced in the years 1933-1939 Shifting attention away from high politics or appeasement it reveals that a remarkably wide range of responses was available to the reading public From sophisticated philosophical analyses of Nazism to pro Nazi apologies the book shows how Nazism informed debates over culture and politics in Britain and how before the war and the Holocaust made Nazism anathema it was often discussed in ways that seem surprising today

The Politics of Truth and Other Untimely Essays Ellis Sandoz, 1999 This volume explores the historical and theoretical underpinnings of personal liberty and free government and provides an analysis of the crisis of civic consciousness endangering both

**Global Ethics and Moral Responsibility** John-Stewart Gordon, Holger Burckhart, 2017-05-15 The philosophy of Hans Jonas was widely influential in the late twentieth century warning of the potential dangers of technological progress and its negative effect on humanity and nature Jonas advocated greater moral responsibility and taking this as a starting point this volume explores current ethical issues within the context of his philosophy It considers the vital intersection between law and global ethics covering issues related to technology and ethics medical ethics religion and environmental ethics Examining different aspects of Hans Jonas philosophy and applying it to contemporary issues leading international scholars and experts on his work suggest original and promising solutions to topical problems This collection of articles revives interest in Hans Jonas ethical reasoning and his notion of responsibility The book covers a wide range of areas and is useful to those interested in philosophy and theory of law human rights ethics bioethics environmental law philosophy and theology as well as political theory and philosophy

Civilizations in Dispute Johann P. Arnason, 2021-12-13 The growing interest in civilizations both on the level of political controversy the clash of civilizations and in the context of scholarly debates calls for more theoretical reflection on the problems and perspectives central to this field of social inquiry This book contains the first systematic and critical survey of classical and contemporary approaches to comparative civilizational analysis it goes on to outline a theoretical model that draws on the work of historical sociologists as well as on comparative cultural and intellectual history Civilizations are analyzed as multi dimensional formations with particular emphasis on cultural orientations but also on the autonomous dynamics of political and economic institutions The last chapter applies this line of argument to questions raised by critics of Eurocentrism and discusses the strengths and weaknesses of postcolonial theory

**The Measure of Man** David J. Levy, 1993

**The Offshore World** Ronen Palan, 2006 The atlas of contemporary capitalism is curious indeed A desperately poor and civil war wracked nation Liberia is the world's shipping superpower the Cayman Islands the fifth largest financial center in the world

land locked Zurich a venerable offshore banking center Indeed it is estimated that half of the global stock of money passes through tax havens The logic of the offshore world where millionaires and corporations roam in search of financial advantage is slippery It challenges many conventional assumptions about power and economics In the single most comprehensive account of the offshore economy Ronen Palan investigates the legal spaces unregulated and yet maintained and supported by the state system that have emerged for purposes of international finance tax havens export processing zones flags of convenience and e commerce The offshore economy had its beginnings in the late nineteenth century saw early development after the First World War and metastasized in the 1970s Palan believes that a rapidly expanding offshore economy is now producing a new market in sovereignty states have discovered that their rights to write law may be used as a commercial asset This commercialization of sovereignty he asserts undermines the legitimacy of the nation state and supports a form of nomadic capitalism

Race and Racism in Continental Philosophy Robert Bernasconi, 2003-06-18 The 15 original essays in Race and Racism in Continental Philosophy explore the resources that continental philosophy brings to debates about contemporary race theory and investigate the racism of some of Europe's most important thinkers Attention is devoted to the influence of the work of W E B Du Bois Jean Paul Sartre Richard Wright and Frantz Fanon Questions about race in European philosophy especially in the work of Nietzsche Heidegger L vi Strauss and Arendt are also considered This volume provides an indispensable critical introduction to new perspectives on thinking about race and racism

**The Politics of the Soul** Glenn Hughes, 1999 The Politics of the Soul Eric Voegelin on Religious Experience includes eight essays examining one of the most profound studies of religious experience to appear in the last century that of the political philosopher Eric Voegelin Voegelin is increasingly recognized as a political theorist of exceptional scope and erudition and the most important philosopher of his time since Toynbee and his treatment of religious experience is a crucial part of his overall analysis of existence and history This collection of essays by prominent Voegelin scholars is the first book to explore the relevance of that analysis to the contemporary understanding of political theory theology history and philosophy of consciousness and as such it constitutes a significant contribution not only to Voegelin scholarship but to the current quest for theoretical foundations

**Ritual and Its Consequences** Adam B. Seligman, Robert P. Weller, Bennett Simon, Michael J., Michael J. Puett, Simon, 2008-02-21 Drawing on examples from many places and times this work argues for the continuing tension across historical contexts between movements emphasizing ritual and movements emphasizing sincerity It contends that our contemporary age has at great risk downplayed the importance of ritual

**The Political Philosophy of Eric Voegelin and His Followers** David R. Cole, 2008 This work is the first book length criticism of the political philosophy of the noted twentieth century professor and theorist

Theology and World Politics Vassilios Paipais, 2020-03-02 Situated within the wider post secular turn in politics and international relations this volume focuses not on religion per se but rather explicitly on theology Contributions to this collection highlight the political theological foundations of international theory and world

politics recasting theology and politics as symbiotic discourses with all the risks promises and open questions this relation may involve The overarching claim the book makes is that all politics has theology embedded in it both in the genealogical sense of carrying ineradicable traces of rival theological traditions and also in the more ontological sense of being enacted by alternative configurations of the theologico political The book is unique in bringing together a diverse group of scholars spanning knowledge areas as varied as IR political theory philosophy theology and history to investigate the complex interconnections between theology and world politics It will be of interest to students and scholars of political theory international relations intellectual history and political theology

**Axial Civilizations And World History** J©dhann P©Ll © rnason,S. Shmuel Noah Eisenstadt,Björn Wittrock,2005 A collection of essays by social theorists historical sociologists and area specialists in classical biblical and Asian studies The contributions deal with cultural transformations in major civilizational centres during the Axial Age the middle centuries of the last millennium BCE and their long term consequences

**The Humanities in Architectural Design** Soumyen Bandyopadhyay,Jane Lomholt,Nicholas Temple,Renée Tobe,2010-02-25 Offering an in depth consideration of the impact which humanities have had on the processes of architecture and design this book asks how we can restore the traditional dialogue between intellectual enquiry in the humanities and design creativity Written by leading academics in the fields of history theory and philosophy of design these essays draw profound meanings from cultural practices and beliefs These are as diverse as the designs they inspire and include religious mythic poetic political and philosophical references This timely and important book is not a benign reflection on humanities role in architectural design but a direct response to the increased marginalization of humanities in a technology driven world The prioritization of technology leaves critical questions unanswered about the relationships between information and knowledge transcription and translation and how emerging technologies can usefully contribute to a deeper understanding of our design culture

*The Growth of the Liberal Soul* David Walsh,1997 The widespread abandonment of the search for foundations by John Rawls Richard Rorty Michael Oakeshott and the deconstructionists has been interpreted as signifying the absence of any sustaining inner resources The result has been the confusion of contemporary liberal democratic self understanding which cannot make sense of its own extraordinary historical success nor apparently prevent the evident unraveling of its own moral code

*The Meaning of Growth* Richard McNeill Douglas,2025-09-30 Since the Limits to Growth report was published in 1972 it has been widely known that a commitment to endless growth was putting us on course for environmental disaster so why have we failed to take decisive political action in the half century since then In *The Meaning of Growth* Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political resistance to environmental science and policy Through a close reading of anti environmentalist rhetoric the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom power and immortality The significance of these findings is drawn out by applying the secularisation thesis

a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti environmentalist campaigners and how to counter their influence      *Eric Voegelin*
