**Peter Claus, John Marriott**

## **Measure Of Times Past Pre Newtonian Chronologies And The Rhetoric Of Relative Time:**

The Measure of Times Past Donald J. Wilcox, 1987 In this extraordinary work Donald J Wilcox seeks to discover an approach to narrative and history consistent with the discontinuous relative time of the twentieth century He shows how our B C A D system intimately connected to Newtonian concepts of continuous objective and absolute time has affected our conception and experience of the past He demonstrates absolute time s centrality to modern historical methodologies and the problems it has created in the selection and interpretation of facts Inspired by contemporary fiction and Einsteinian concepts of relativity he concludes his analysis with a comparison of our system with earlier pre Newtonian time schemes to create a radical new critique of historical objectivity

**Notions of Time in Deuterocanonical and Cognate Literature** Stefan Beyerle, Matthew Goff, 2021-12-20 A comprehensive investigation of notions of time in deuterocanonical and cognate literature from the ancient Jewish up to the early Christian eras requires further scholarship The aim of this collection of articles is to contribute to a better understanding of time in deuterocanonical literature and pseudepigrapha especially in Second Temple Judaism and to provide criteria for concepts of time in wisdom literature apocalypticism Jewish and early Christian historiography and in Rabbinic religiosity Essays in this volume representing the proceedings of a conference of the International Society for the Study of Deuterocanonical and Cognate Literature in July 2019 at Greifswald discuss concepts and terminologies of time stemming from novellas like the book of Tobit from exhortations for the wise like Ben Sira from an apocalyptic time table in 4 Ezra the book of Giants or Daniel and early Christian and Rabbinic compositions The volume consists of four chapters that represent different approaches or hermeneutics of time I Axial Ages The Construction of Time as History II The Construction of Time Particular Reifications III Terms of Time and Space IV The Construction of Apocalyptic Time Scholars and students of ancient Jewish and Christian religious history will find in this volume orientation with regard to an important but multifaceted and sometimes disparate topic

*Time, History, and Belief in Aztec and Colonial Mexico* Ross Hassig, 2013-12-18 This illuminating study offers a radical new understanding of how the Aztecs and other Mesoamerican societies conceived of time and history Based on their enormously complex calendars that recorded cycles of many kinds the Aztecs and other ancient Mesoamerican civilizations are generally believed to have had a cyclical rather than linear conception of time and history This boldly revisionist book challenges that understanding Ross Hassig offers convincing evidence that for the Aztecs time was predominantly linear that it was manipulated by the state as a means of controlling a dispersed tribute empire and that the Conquest cut off state control and severed the unity of the calendar leaving only the lesser cycles From these he asserts we have inadequately reconstructed the pre Columbian calendar and so misunderstood the Aztec conception of time and history Hassig first presents the traditional explanation of the Aztec calendrical system and its ideological functions and then marshals contrary evidence to argue that the Aztec elite deliberately used calendars and timekeeping to achieve practical political ends He further traces how the Conquest played

out in the temporal realm as Spanish conceptions of time partially displaced the Aztec ones

**Shaping the Day** Paul Glennie, Nigel Thrift, 2009-02-12 Timekeeping is an essential activity in the modern world and we take it for granted that our lives are shaped by the hours of the day Yet what seems so ordinary today is actually the extraordinary outcome of centuries of technical innovation and circulation of ideas about time *Shaping the Day* is a pathbreaking study of the practice of timekeeping in England and Wales between 1300 and 1800 Drawing on many unique historical sources ranging from personal diaries to housekeeping manuals Paul Glennie and Nigel Thrift illustrate how a particular kind of common sense about time came into being and how it developed during this period Many remarkable figures make their appearance ranging from the well known such as Edmund Halley Samuel Pepys and John Harrison who solved the problem of longitude to less familiar characters including sailors gamblers and burglars Overturning many common perceptions of the past for example that clock time and the industrial revolution were intimately related this unique historical study will engage all readers interested in how telling the time has come to dominate our way of life

**History** Peter Claus, John Marriott, 2023-07-07 This book provides an accessible introduction to a wide range of concerns that have preoccupied historians over time Global in scope it explores historical perspectives not only from historiography itself but from related areas such as literature sociology geography and anthropology which have entered into productive dialogues with history Clearly written and accessible this third edition is fully revised with an updated structure and new areas of historical enquiry and themes added including the history of emotions video history and global pandemics In all of this the authors have attempted to think beyond the boundaries of the West and consider varied approaches to history They do so by engaging with theoretical perspectives and methodologies that have provided the foundation for good historical practice The authors analyse how historians can improve their skills by learning about the discipline of historiography that is how historians go about the task of exploring the past and determining where the line separating history from other disciplines such as sociology or geography runs

*Time, Action and Cognition* Françoise Macar, V. Pouthas, William J. Friedman, 2013-04-17 This volume is the outcome of the NATO Advanced Research Workshop on Time Action and Cognition which was held in Saint Malo France in October 1991 The theme time in action and cognition of time was sparked by growing awareness in informal meetings between mostly French speaking time psychologists of the need to bring together time specialists in the areas of development motor behavior attention memory and representations The workshop was designed to be a forum where different theoretical points of view and a variety of empirical approaches could be presented and discussed Time psychologists tended to draw conclusions restricted to their specific fields of interest From our own experience we felt that addressing a common issue possible relationships between time in action and representations of time could lead to a more comprehensive approach We are indebted to NATO for allowing us to bring this idea to fruition We take

this opportunity as well to express our thanks to Cognisiences Cognisud section an active interdisciplinary research organization for its financial backing and the CNRS for its scientific support

*Epic, Epitome, and the Early Modern Historical Imagination* Dr Chloe Wheatley, 2013-05-28 In early modern England epitomes texts promising to pare down abridge or sum up the essence of their authoritative sources provided readers with key historical knowledge without the bulk expense or time commitment demanded by greater volumes Epic poets in turn addressed the habits of reading and thinking that for better and for worse were popularized by the publication of predigested works Analyzing popular texts such as chronicle summaries abridgements of sacred epic and abstracts of civil war debate Chloe Wheatley charts the efflorescence of a lively early modern epitome culture and demonstrates its impact upon Edmund Spenser's *The Faerie Queene* Abraham Cowley's *Davideis* and John Milton's *Paradise Lost* Clearly and elegantly written this new study presents fresh insight into how poets adapted an important epic convention the representation of the hero's confrontation with summaries of past and future to reflect contemporary trends in early modern history writing

**Inspiration and Technique** John Roe, Michele Stanco, 2007 While Plato extols inspired poetry as opposed to poetry produced by means of technique Aristotle conceives of poetry only in terms of technique Underlying the opposition between inspiration and technique are two different approaches to form inspiration is concerned with the impression of ideas or forms within the poet's psyche the author's *forma mentis* whereas technique deals with the transposition of the artist's idea into the material form of the work the *forma operis* This dual view of form and of its complex relation to matter may be said to lie at the basis of a dual approach to aesthetic issues a psychological and a textual one Taking their cue from this opposition the essays gathered here explore some of the most momentous phases in the history of aesthetics from Graeco Roman philosophy and oratory to Renaissance poetry and literary criticism from neoclassical poetics to Romantic and Victorian views on inspired visions to recent issues in neuroaesthetics philosophy of art and literary linguistics In so doing they collectively point to the irremediable and continuing dualism of a critical tradition that has alternately emphasized the ideal elements of beauty and the material constituents of art

**Rethinking Secular Time in Victorian England** Stefan Fisher-Høyrem, 2022-08-29 This open access book draws on conceptual resources ranging from medieval scholasticism to postmodern theory to propose a new understanding of secular time and its mediation in nineteenth century technological networks Untethering the concept of secularity from questions of religion and belief it offers an innovative rethinking of the history of secularisation that will appeal to students scholars and everyone interested in secularity Victorian culture the history of technology and the temporalities of modernity

**Supper at Emmaus** Glenn W. Olsen, 2016 *Supper at Emmaus* traces various important intellectual topics from the ancient world to the modern period Generally as in its treatment of the question of whether the long standing contrast between cyclical and linear views of history is helpful it introduces important thinkers who have considered the question A preoccupation of the book is the appearance and reappearance across the centuries of patterns used to organize temporal and cultural experience

After an opening essay on transcendental truth and cultural relativism the second chapter traces a distinction common in historical writings during the past two centuries between an alleged ancient classical cyclic view of time and history used to describe the claimed repetitiveness of and similarities between historical events nothing is new under the sun and a contrasting Jewish Christian linear view sometimes described as providential in that it moves through a series of unique events to some end intended by God In the latter history is about something the education of the human race or the redemption of humankind As in each of the remaining essays the book then attempts to draw out the limitations of what the current consensus on this topic has become It does this for such things as our current understanding of religious toleration humanism natural law and teleology Some of the essays such as those on debate about Augustine s understanding of marriage or the concluding illustrated essay on the baroque city of Lecce are published for the first time Others are based on previously published contributions to the scholarly literature though generally each of these chapters concludes with a postscript that engages with current scholarly debate on the subject

**Building Time** David Leatherbarrow, 2020-11-26

While most books on architecture concentrate on spatial themes this book explores architecture s temporal dimensions Through a series of close readings of buildings both contemporary and classic it demonstrates the centrality of time in modern architecture and shows why an understanding of time is critical to understanding good architecture All buildings exist in time Even if designed for permanence they change slowly but inevitably They change use they accrue history and meaning they decay all of these processes are inscribed in time So too is the path traced by the sun through a building and the movements of the human body from room to room Time this book argues is the framework for our spatial experience of architecture and a key dimension of a building s structure and significance Building Time presents twelve close readings of buildings and artworks which explore this idea Examining works by distinctive modern architects from Eileen Gray to Ivar Siza and Wang Shu it takes the reader in some cases literally step by step through a built work and provides insightful reflections on the importance of making space for time in architectural design This is a book for both theorists and for architectural designers Through it theorists will find a way to rethink the fundamental premises and aims of design work while designers will rediscover the order and ideas that shape the world around them its buildings interiors and landscapes

Introduction to Medieval Europe 300–1500 Wim Blockmans, Peter Hoppenbrouwers, 2014-02-03 Introduction to Medieval Europe 300 1500 provides a comprehensive survey of this complex and varied formative period of European history Covering themes as diverse as barbarian migrations the impact of Christianization the formation of nations and states the emergence of an expansionist commercial economy the growth of cities the Crusades the effects of plague and the intellectual and cultural life of the Middle Ages the book explores the driving forces behind the formation of medieval society and the directions in which it developed and changed In doing this the authors cover a wide geographic expanse including Western interactions with the Byzantine Empire and the Islamic World Now in full colour this second edition contains a wealth of new

features that help to bring this fascinating era to life including A detailed timeline of the period putting key events into context Primary source case boxes Full colour illustrations throughout New improved maps A glossary of terms Annotated suggestions for further reading The book is supported by a free companion website with resources including for instructors assignable discussion questions and all of the images and maps in the book available to download and for students a comparative interactive timeline of the period and links to useful websites The website can be found at [www.routledge.com/cw/blockmans](http://www.routledge.com/cw/blockmans) Clear and stimulating the second edition of Introduction to Medieval Europe is the ideal companion to studying Europe in the Middle Ages at undergraduate level Time and Chronology in Creation Narratives Silvie Kilgallon, Fiona Mitchell, 2024-08-31

This book explores the ways in which the origins of time of the gods and processes associated with time were conceptualised in antiquity examining a variety of ancient sources from across the ancient world and addressing issues surrounding the sources themselves Time is a key framework through which we understand the world around us Shared structures to measure the passage of time reveal certain cultural and societal values while time's less concrete forms are evident across art and literature This volume examines how the tangible and intangible direct and complex representations of time are used in ancient sources The chapters in this book are written by scholars whose work focuses on India Assyria Greece and Rome Their analyses explore poetic and mythological narratives philosophical discourse and representations of the divine allowing us to see how ideas about time and chronology reveal various cultural understandings of our world Accessibly written this volume enables scholars from a variety of disciplines to engage effectively with each chapter Time and Chronology in Creation Narratives offers a fascinating interdisciplinary collection suitable for scholars working in ancient literature philosophy and religion across Classics Ancient History Indology and Near Eastern Studies **Clio's Battles** Jeremy Black, 2015-07-01 A survey of the variety of readings we have of the past and of how those readings are used in the present day to validate discredit unite or divide To write history is to consider how to explicate the past to weigh the myriad possible approaches to the past and to come to terms with how the past can be and has been used In this book prize winning historian Jeremy Black considers both popular and academic approaches to the past His focus is on the interaction between the presentation of the past and current circumstances on how history is used to validate one view of the present or to discredit another and on readings of the past that unite and those that divide Black opens with an account that underscores the differences and developments in traditions of writing history from the ancient world to the present Subsequent chapters take up more recent decades notably the post Cold War period discussing how different perspectives can fuel discussions of the past by individuals interested in shaping public opinion or public perceptions of the past Black then turns to the possible future uses of the then past as a way to gain perspective on how we use the past today Clio's Battles is an ambitious account of the engagement with the past across world history and of the clash over the content and interpretation of history and its implications for the present and future Remarkable both for its

geographical scope and historical scale and for its command of scholarship on a breathtaking range of subjects I can't imagine another historian who could attempt such an ambitious work or pull it off with such aplomb William Gibson Oxford Brookes University Refreshing Black eschews Eurocentricism and includes considerable material on other areas of the world that one does not usually find in such a work Typical of Black's writing there is much to learn in the numerous small asides throughout the text Taken together these form an impressive whole Spencer C Tucker VMI

**Critical Junctions** Don Kalb, Herman Tak, 2006-07-01 The cultural turn has been a multifarious and pervasive phenomenon in Western universities and modes of social knowledge since the early 1980s This volume focuses on the conjunction of two disciplines where both the analytic promises as well as the difficulties involved in the meeting of humanist and social science approaches soon became obvious Anthropologists and historians have come together here in order to recapture elaborate and criticize pre Cultural Turn and non Cultural Turn modes of analysing structures of experience feeling subjectivity and action in human societies and to highlight the still unexploited possibilities developed among others in the work of scholars such as Norbert Elias Max Gluckman Eric Wolf E P Thompson and Raymond Williams

*Sacred Time and the Search for Meaning* Gary Eberle, 2002-12-24 In *Sacred Time and the Search for Meaning* author Gary Eberle contemplates how humans view of time has evolved throughout history how we came to measure time and why we feel especially starved for it now Eberle seeks to rediscover a renewed sense of meaning in life through looking for ways to enter the realm of sacred time or sabbath time where we can reconnect with the slower deeper rhythms of life that have traditionally been experienced through worship prayer and the observance of holy days Drawing from the work of Western philosophers from Aristotle to Heidegger and on theorists from Jung to Foucault he presents both an intellectual history of time and a personal account of his own search for sacred time Along the way he formulates an insightful analysis of our culture's obsession with speed and efficiency and he offers guidance for slowing down to savor life outside of schedules and routines showing the way toward finding fulfillment in this increasingly accelerated world

The Revolution in Time Tony Claydon, 2020-01-30 *The Revolution in Time* explores the idea that people in Western Europe changed the way they thought about the concept of time over the early modern period by examining reactions to the 1688/1689 revolution in England The study examines how those who lived through the extraordinary collapse of James II's regime perceived this event as it unfolded and how they set it within their understanding of history It questions whether a new understanding of chronology one which allowed fundamental and human directed change had been widely adopted by this point in the past and whether this might have allowed witnesses of the revolution to see it as the start of a new era or as an opportunity to shape a novel modern future for England It argues that with important exceptions the people of the era rejected dynamic views of time to retain a static chronology that failed to fully conceptualise evolution in history Bewildered by the rapid events of the revolution itself people forced these into familiar scripts Interpreting 1688/1689 later they saw it as a reiteration of timeless principles of politics or as a stage in an eternal and pre

determined struggle for true religion Only slowly did they see come to see it as part of an evolving and modernising process and then mainly in response to opponents of the revolution who had theorised change in order to oppose it The volume thus argues for a far more complex and ambiguous model of changes in chronological conception than many accounts have suggested and questions whether 1688 1689 could be the leap toward modernity that recent interpretations have argued

*Time, Religion and History* William Gallois, 2014-06-11 What is time How does our sense of time lead us to approach the world How did the peoples of the past view time This book answers these questions through an investigation of the cultures of time in Christianity Islam Buddhism Judaism and the Australian Dreamtime It argues that our contemporary world is blind as to the significance and complexity of time preferring to believe that time is natural and unchanging This is of critical importance to historians since the base matter of their study is time yet there is almost no theoretical literature on time in history This book offers the first detailed historiographical study of the centrality of time to human cultures It sets out the complex ways in which ideas of time developed in the major world religions and the manner in which such conceptions led people both to live in ways very different to our contemporary world and to make very different kinds of histories It goes on to argue that modern scientific descriptions of time such as Einsteins Theory of Relativity lie much closer to the complex understandings of time in religions such as Christianity than they do to our common sense notions of time which are centred on progress through a past present and future

*In the Footsteps of the Ancients* Ronald Witt, 2021-10-01 This monograph demonstrates why humanism began in Italy in the mid thirteenth century It considers Petrarch a third generation humanist who christianized a secular movement The analysis traces the beginning of humanism in poetry and its gradual penetration of other Latin literary genres and through stylistic analyses of texts the extent to which imitation of the ancients produced changes in cognition and visual perception The volume traces the link between vernacular translations and the emergence of Florence as the leader of Latin humanism by 1400 and why limited to an elite in the fourteenth century humanism became a major educational movement in the first decades of the fifteenth It revises our conception of the relationship of Italian humanism to French twelfth century humanism and of the character of early Italian humanism itself This publication has also been published in hardback [please click here for details](#)

**British Weather and the Climate of Enlightenment** Jan Golinski, 2010-11-15 Enlightenment inquiries into the weather sought to impose order on a force that had the power to alter human life and social conditions British Weather and the Climate of Enlightenment reveals how a new sense of the national climate emerged in the eighteenth century from the systematic recording of the weather and how it was deployed in discussions of the health and welfare of the population Enlightened intellectuals hailed climate s role in the development of civilization but acknowledged that human existence depended on natural forces that would never submit to rational control Reading the Enlightenment through the ideas beliefs and practices concerning the weather Jan Golinski aims to reshape our understanding of the movement and its legacy for modern environmental thinking With its combination of cultural history

and the history of science British Weather and the Climate of Enlightenment counters the claim that Enlightenment progress set humans against nature instead revealing that intellectuals of the age drew characteristically modern conclusions about the inextricability of nature and culture
