PICMET '01: Technology management in the knowledge era Dundar F. Kocaoglu, Timothy Roy Anderson, 2001

Performance Metrics Duke Okes, 2013-01-21 Which performance measures should you use The obvious answer is that it depends on what you want to achieve which someone else should never define for you After all it is your organization your department or your process But once you are clear about what you want to accomplish how do you sort through a variety of possible metrics and decide which are best Then given the list of metrics you believe are useful or necessary how do you define them in more detail to ensure that the right data are gathered at the appropriate frequency and that the resulting information gets to the right people so that they can make proper decisions This book provides a clarifying perspective for those who know that metrics need to be developed but are unsure as to the steps to follow in developing and deploying them It focuses on making sure that the metrics selected will guide people and processes in the direction the organization wants to go and allow continual evaluation of success Every highly effective organization is unique in some strategic way and the metrics used should reflect these differences Studying high performers can be useful from a learning standpoint but simply adopting what someone else is doing is likely to take you off your track and put you on theirs The concepts in this book will put you on the correct track and give you the tools to stay on it

Corporate E-Learning Luther Tai, 2008 Corporate e learning has become increasingly important in the contemporary universal access business world and can provide strategic and competitive advantages to corporations as a way to accelerate training and reduce the high costs of face to face learning programs However most of the books that are written about e learning do not describe in detail how corporate e learning is actually implemented within a specific company Corporate E Learning fills that gap by describing in depth how e learning programs are developed and instituted and how their effectiveness is measured from the perspective of practicing e learning professionals at IBM an early and liberal user of e learning technologies to train their global workforce Drawing on a wealth of in person interviews of numerous e learning professionals at IBM as well as recent e learning literature Tai discusses how IBM has significantly contributed to the evolution of corporate e learning In the course of doing so he makes useful comparisons with other companies and industries and draws conclusions that are applicable to any company considering utilizing e learning Companies should be careful concludes Tai to use e learning only when it makes strategic and economic sense not simply because the technology is available In addition e learning should always be used along with other more traditional means of learning and carefully monitored by feedback mechanisms to measure whether its objectives have been accomplished and how e learning programs might improve in the future Corporate E Learning is designed for classroom use in technology management courses and will also appeal to corporate professionals who are involved in training human resources development and performance improvement
