**Measures for Community and Neighborhood Research** Mary L. Ohmer, Claudia Coulton, Darcy A. Freedman, Joanne L. Sobek, Jaime Booth, 2018-07-19 Measures for Community and Neighborhood Research is the first book of its kind to compile measures focused on communities and neighborhoods in one accessible resource Organized into two main sections the first provides the rationale structure and purpose and analysis of methodological issues along with a conceptual and theoretical framework the second section contains 10 chapters that synthesize analyze and describe measures for community and neighborhood research with tables that summarize highlighted measures The book will get readers thinking about which aspects of the neighborhood may be most important to measure in different research designs and also help researchers practitioners funders and others more closely examine the impact of their work in communities and neighborhoods

**Measures and Determinants of Urban Food Security: Evidence from Accra, Ghana** Tuholske, Cascade, Andam, Kwaw S., Blekking, Jordan, Evans, Tom, Caylor, Kelly, 2018-11-22 The urban population in Africa south of the Sahara SSA is expected to expand rapidly from 376 million people in 2015 to more than 1.25 billion people by 2050 Measuring and ensuring food security among urban households will become an increasingly pertinent task for development researchers and practitioners In this paper we characterize food security among a sample of low and middle income residents of Accra Ghana using 2017 survey data We find that households tend to purchase food from traditional markets local stalls and kiosks and street hawkers and rarely from modern supermarkets We characterize food security using three established metrics the Household Food Insecurity Access Scale HFIAS the Household Food Insecurity Access Prevalence HFIAP and the Food Consumption Score FCS We then estimate the determinants of food security using general linear models The food security metrics are not strongly correlated For example according to HFIAP as many as 70 percent of households sampled are food insecure but only 2 percent fall below acceptable thresholds measured by FCS Model results show that household education assets and dwelling characteristics are significantly associated with food security according to HFIAS and HFIAP but not with FCS The poor correlation and weak model agreement between the dietary recall metric FCS and the experience based metrics HFIAS and HFIAP call for closer attention to measurement of urban food security Given Africa's urban future our findings highlight the need for an urban oriented comprehensive approach to the food security of urban households

**Nature, Place & People: Forging Connections Through Neighbourhood Landscape Design** Puay-yok Tan, Kuei-hsien Liao, Yun Hye Hwang, Vincent Chua, 2018-04-23

Neighbourhood landscapes are the quintessential forms of urban landscapes in most cities worldwide. They are pervasive and hence experienced by the large majority of urban dwellers in their everyday life. More than parks, nature reserves or nature areas which are visited as destinations, neighbourhood landscapes provide the most immediate, frequent and convenient form of nature experienced by urban dwellers on a daily basis. They are also valuable as social spaces to bring residents together, foster social ties and strengthen communities. Despite their importance, surprisingly little has been written to guide the planning and design of neighbourhood landscapes. This book is written for a specific purpose to illustrate how the design of neighbourhood landscapes helps to deliver more benefits for urban dwellers and at the same time protect ecosystems that facilitate human well-being. This is in turn important as the synergistic relationships between human well-being, quality of biophysical urban environment and health of human environment interactions fundamentally underpin urban sustainability. The authors emphasize the role neighbourhood landscapes play in forging connections between people and nature, people and people, and people and place. Most of all, the book highlights the role of focusing on people in this endeavour as it is only when landscapes are appropriately designed and when people recognize these benefits that they become valued and protected as a community resource. This book is organized into two parts. Part 1 focuses on the conceptual foundations that underpin the neighbourhood landscape design guidelines being developed. In this section, the authors describe the key concepts relating functions of neighbourhood landscapes to the key urban development goals of sustainability, liveability and reliance, how they can be represented in a framework and how a synthesis of current knowledge of cities as socio-ecological systems helps to identify principles that can guide the designing of neighbourhood landscapes. Part 2 is more application focused and is centred on neighbourhood landscape design guidelines inspired by the concept of ecosystem services. The guidelines consist of design approaches, practical strategies, design targets and performance monitoring indicators for tracking the performance of neighbourhood landscapes. The book is written for readers in academia and design practice and anyone who has a role in shaping neighbourhood landscapes for the benefit of urban dwellers.

**Dimensions of the Sustainable City** Mike Jenks, Colin Jones, 2009-12-17. The CityForm consortium's latest book, *Dimensions of the Sustainable City*, is the first book to report on an empirical, multi-disciplinary study specifically designed to address urban sustainability. Drawing together the various dimensions of sustainability—economic, social, transport, energy and ecological—the book examines their relationships both to each other and to urban form. The book investigates the sustainability dimensions of cities through a series of projects based on a common list of elements of urban form and which draw on the consortium's latest research to review the sustainability issues of each dimension. The elements of urban form include density, land use, location, accessibility, transport infrastructure and characteristics of the built environment. The book also addresses issues such as adapting cities, psychological and ecological benefits of green space and sustainable lifestyles, each presenting a critical review of the relevant literature followed by an empirical analysis presenting the key results. Based on studies across

five UK cities the book draws out findings of relevance to sustainable cities worldwide As well as an invaluable reference to researchers in sustainable planning and urban design the book will provide a useful text for advanced undergraduate and graduate courses and for policy makers dealing with these issues The CityForm consortium is a multi disciplinary group of researchers from five universities funded by the UK Engineering and Physical Science Research Council from 2003 07

web merely said the epitaxy of semiconductors introduction to physica is universally compatible with any devices to read epitaxy of semiconductors introduction to physica downloaded from ol wise edu jo by guest siena leblanc strained silicon

**quasi van der waals epitaxy of rhombohedral stacked bilayer** - Sep 07 2022

web 1 day ago the growth of bilayers of two dimensional 2d materials on conventional 3d semiconductors results in 2d 3d hybrid heterostructures which can provide additional advantages over more established 3d semiconductors while retaining some

**epitaxy of semiconductors introduction to physica** - Sep 26 2021

web introduction to organic semiconductor heterojunctions elsevier liquid phase epitaxy lpe is a technique used in the bulk growth of crystals typically in semiconductor manufacturing whereby the crystal is grown from a rich solution of the semiconductor

*epitaxy of semiconductors pdf slideshare* - Aug 06 2022

web jul 14 2013 1 chapter 1 introduction abstract this introductory chapter provides a brief survey on the development of epitaxial growth techniques and points out tasks for the epitaxy of device structures starting from early studies of alkali halide overgrowth in the

*epitaxy of semiconductors electronic resource introduction to* - Jan 11 2023

web the introduction to epitaxy requires only little knowledge on solid state physics students of natural sciences materials science and electrical engineering as well as their lecturers benefit from elementary introductions to theory and practice of
