John Lamont Eltinge,1987      *Measurement Error Models* Yingyao Hu,Tom Wansbeek,2017      **Measurement Error in Nonlinear Models** Sandra Nolte,2010 This book analyzes how the choice of a particular disclosure limitation method namely additive and multiplicative measurement error affects the quality of the data and limits its usefulness for empirical research Generally a disclosure limitation method can be regarded as a data filter that transforms the true data generating process This book focuses explicitly on the consequences of additive and multiplicative measurement error for the properties of nonlinear econometric estimators It investigates the extent to which appropriate econometric techniques can yield consistent and unbiased estimates of the true data generating process in the case of disclosure limitation Sandra Nolte received her PhD in Economics at the University of Konstanz Germany in 2008 and is a postdoctoral researcher at the Financial Econometric Research Centre at the Warwick Business School UK since 2009 Her research areas include microeconometrics and financial econometrics      **Generalized Linear Models** Dipak K. Dey,Sujit K. Ghosh,Bani K. Mallick,2000-05-25 This volume describes how to conceptualize perform and critique traditional generalized linear models GLMs from a Bayesian perspective and how to use modern computational methods to summarize inferences using simulation Introducing dynamic modeling for GLMs and containing over 1000 references and equations Generalized Linear Models considers parametric and semiparametric approaches to overdispersed GLMs presents methods of analyzing correlated binary data using latent variables It also proposes a semiparametric method to model link functions for binary response data and identifies areas of important future research and new applications of GLMs      Statistical Analysis with Measurement Error or Misclassification Grace Y. Yi,2017-08-02 This monograph on measurement error and misclassification covers a broad range of problems and emphasizes unique features in modeling and analyzing problems arising from medical research and epidemiological studies Many measurement error and misclassification problems have been addressed in various fields over the years as well as with a wide spectrum of data including event history data such as survival data and recurrent event data correlated data such as longitudinal data and clustered data multi state event data and data arising from case control studies Statistical Analysis with Measurement Error or Misclassification Strategy Method and Application brings together assorted methods in a single text and provides an update of recent developments for a variety of settings Measurement error effects and strategies of handling mismeasurement for different models are closely examined in combination with applications to specific problems Readers with diverse backgrounds and objectives can utilize this text Familiarity with inference methods such as likelihood and estimating function theory or modeling schemes in varying settings such as survival analysis and longitudinal data analysis can result in a full appreciation of the material but it is not essential since each chapter provides basic inference frameworks and background information on an individual topic to ease the access of the material The text is presented in a coherent and self contained manner and highlights the essence of commonly used modeling and inference methods This text can serve as a reference book for researchers interested in statistical methodology for handling data with
