Measuring Outcomes Of College Fifty Years Of Findings And Recommendations For The Future:

Measuring Outcomes of College Charles Robert Pace,1979 **Connecting Learning Across the Institution**

Pamela L. Eddy,2014-03-25 Most research on learning tends to occur in silos based on stakeholder perspective This volume seeks to break down these silos and draw together scholars who research learning from different perspectives to highlight commonalities in learning for students faculty and institutions When we understand how learning is experienced across the institution we can develop strategies that help support enhance and reinforce learning for all Exploring what it means to bridge learning across the institution this volume provides a roadmap to improve learning for all Both scholarly and practical it advances the knowledge about the ways we investigate and study learning across and for various groups of learners It also Collects thinking about learning in its various formats in one location Provides a platform for synthesis Outlines key questions for thinking more deeply about learning on campus Instead of thinking of learning as discrete depending on the stakeholder group this volume highlights the commonalities across all types of learners Resources in Education ,2001-10

The Shaping of American Higher Education Arthur M. Cohen, Carrie B. Kisker, 2009-11-19 THE SHAPING OF AMERICAN HIGHER EDUCATION SECOND EDITION When the first edition of The Shaping of American Higher Education was published it was lauded for its historical perspective and in depth coverage of current events that provided an authoritative comprehensive account of the history of higher education in the United States As in the first edition this book tracks trends and important issues in eight key areas student access faculty professionalization curricular expansion institutional growth governance finance research and outcomes Thoroughly revised and updated the volume is filled with critical new data recent information from specialized sources on faculty student admissions and management practices and an entirely new section that explores privatization corporatization and accountability from the mid 1990s to the present This second edition also includes end of chapter questions for guidance reflection and study Cohen and Kisker do the nation's colleges and universities a much needed service by authoring this volume The highly regarded histories of American higher education have become badly dated They ignore the last quarter century when American higher education was transformed This volume provides comprehensive information on that era Art Levine president Woodrow Wilson National Fellowship Foundation and author When Hope and Fear Collide A Portrait of Today's College Student The second edition of The Shaping of American Higher Education is a treasure trove of information and insight Cohen and Kisker provide us with astute and straightforward analysis and commentary on our past present and likely future This book is invaluable to those seeking to go to the heart of the issues and challenges confronting higher education Judith S Eaton president Council for Higher Education Accreditation Arthur Cohen and his collaborator have now updated his superb history of American higher education It remains masterful authoritative comprehensive and incisive and guarantees that this work will stand as the classic required resource for all who want to understand where higher education

came from and where it is going The new material gives a wise and nuanced perspective on the current crisis driven transformations of the higher education industry John Lombardi president Louisiana State University System The Shaping of American Higher Education is distinguished by its systematic approach comprehensive coverage and extensive treatment of the modern era including the first years of the twenty first century In this second edition Arthur Cohen and Carrie Kisker are especially adept at bringing historical perspective and a balanced viewpoint to controversial issues of the current era Roger L Geiger distinguished professor The Pennsylvania State University and author Knowledge and Money **Price and Quality in Higher Education** Jeffrey L. Gilmore,1991 *ICEL2012- 7th International Conference on E-Learning* Paul Lam,2011

Fostering Student Success in the Campus Community Gary L. Kramer,2009-11-24 This book presents and examines key issues not only on addressing changing student demographics and needs but also on aligning institutional and student expectations connecting student oriented services systemically organizing and fostering student services for learning and creating and delivering services for students to achieve success on campus While the essential supportive role student services plays in student retention and success is generally understood this book provides several constructive approaches and key indicators that service providers can use to challenge their campuses for better results in achieving student success While this book does not define what student success is for all institutions or suggest that one size fits all institutions it does emphasize that student learning and achieving student success on campus is everyone s business The chapter contributors share their wisdom on and experience in creating a student centered culture and emphasize student services as the primary approach for putting students first in the campus community Written for student service providers academic departments and others responsible for the support direction and coordination of services to students vice presidents deans directors and department chairs readers will learn how to encourage a variety of desired outcomes including student persistence satisfaction learning and personal development Also included is a systems perspective that will help readers evaluate and align services for students with the goals of both the students and the institution Grading the College Scott M. Gelber,2020-06-23 A comprehensive history of evaluation in American higher education In Grading the College Scott M Gelber offers a comprehensive history of evaluating teaching and learning in higher education He complicates the conventional narrative that portrays evaluation as a newfangled assault on the integrity of higher education while acknowledging that there are many compelling reasons to oppose those practices The evaluation of teaching and learning Gelber argues presented genuine dilemmas that have attracted the attention of faculty members and academic leaders since the 1920s Especially during the peak era of faculty authority that followed the end of the Second World War significant numbers of professors and administrators believed that evaluation might improve institutional performance reduce the bias inherent in traditional methods of supervision strengthen communication with laypersons and encourage a more deliberate focus on the distinctive goals of college Gelber reveals the extent to which professors and academic interest groups

participated in the development of our most common evaluation instruments including student course questionnaires achievement tests surveys rubrics rankings and accreditation self studies Although these efforts may seem distant from the present era of shortsighted scrutiny and ill conceived comparisons Gelber demonstrates that the evaluation of college teaching and learning has long consisted of a set of intellectually sophisticated questions that have engaged and could continue to engage faculty members and their advocates By providing a deeper understanding of how evaluation operated before the dawn of high stakes accountability Grading the College seeks to promote productive conversations about current attempts to define and measure the purposes of American higher education

Discipline-Centered Learning Communities: Creating Connections Among Students, Faculty, and Curricula Kimberly Buch, Kenneth E. Barron, 2012-12-10 Take an in depth look at discipline centered learning communities Using psychology as an example this issue provides prescriptive advice for those interested in developing a learning community in any academic discipline or program Learning communities are a powerful vehicle for creating and sustaining connections among students faculty and the curriculum but creating one can be a challenge By providing resources practical case studies and theoretical grounding this volume can both inspire and guide faculty staff and administrators in meeting their pedagogical and curricular goals Learn how the five types of learning communities based curricularly residentially in the classroom on the students themselves and even virtually can be used to enhance student engagement and learning Illustrating the versatility of the practice across a wide range of settings student populations and institutional types this issue also contains an extensive listing of resources that go beyond disciplinary boundaries and open possibilities for all in higher education This is the 132nd volume of this Jossey Bass higher education series New Directions for Teaching and Learning offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers

Shaping the College Curriculum Lisa R. Lattuca, Joan S. Stark, 2009-08-17 Shaping the College Curriculum focuses on curriculum development as an important decision making process in colleges and universities The authors define curriculum as an academic plan developed in a historical social and political context They identify eight curricular elements that are addressed intentionally or unintentionally in developing all college courses and programs By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning This revised edition continues to stress research based educational practices The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions All chapters have been updated with recent research findings relevant to curriculum leadership accreditation assessment and the influence of academic fields while two new chapters focus directly on learning research and its implications for instructional practice A new chapter drawn from research on organizational change provides practical guidance to assist faculty members

and administrators who are engaged in extensive program improvements Streamlined yet still comprehensive and detailed this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning designing delivering evaluating and studying curricula in higher education This is an extraordinary book that offers not a particular curriculum or structure but a comprehensive approach for thinking about the curriculum ensuring that important considerations are not overlooked in its revision or development and increasing the likelihood that students will learn and develop in ways institutions hope they will The book brings coherence and intention to what is typically an unstructured haphazard and only partially rational process guided more by beliefs than by empirically grounded substantive information Lattuca and Stark present their material in ways that are accessible and applicable across planning levels course program department and institution local settings and academic disciplines It s an admirable and informative marriage of scholarship and practice and an insightful guide to both Anyone who cares seriously about how we can make our colleges and universities more educationally effective should read this book Patrick T Terenzini distinguished professor and senior scientist Center for the Study of Higher Education The Pennsylvania State University
