Measuring Psychopathology

Robert J. Craig

Measuring Psychopathology:

Measuring Psychopathology Anne Farmer, Peter McGuffin, Julie Williams, 2002-02-14 Measuring Psychopathology describes the methods by which the signs and symptoms of mental disorder are elicited examined and evaluated Written for the non clinical researcher as well as for those with clinical experience the authors start by considering the question what is psychopathology They then employ a historical perspective to explain why and how mental disorders are currently classified and how the use of an operational approach to diagnosis was adopted The use of operational criteria to define psychiatric disorder has facilitated the development of standardised interviewing techniques questionnaires and rating scales These tools are all covered in some detail not only with regard to adults with mental disorders but also with reference to special and challenging groups such as children and the elderly and those with a learning disability substance misuse or who have a personality disorder The strengths and weaknesses of current methodologies are explored and debated as well as the future diagnostic needs for research in the 21st century Essential reading for clinicians and non clinical scientists engaged in research on psychiatric disorders trainees and junior psychiatrists and clinical psychologists

New Directions in Interpreting the Millon Clinical Multiaxial Inventory-III (MCMI-III) Robert J. Craig, 2005-04-29 New Directions in Interpreting the Millon Clinical Multiaxial Inventory edited by a leading MCMI researcher and featuring contributions from internationally renowned scholars in personality assessment presents new methods of interpretation and new clinical applications for this classic objective measure of personality This dynamic new handbook discusses issues related to the effect of culture on MCMI III results and controversies regarding its forensic applications and presents research related to the MCMI III s diagnostic power with regard to diagnosis and malingering

Emerging Issues and Methods in Personality Assessment John A. Schinka, Roger L. Greene, 2013-06-17 This book constitutes a collection of articles that were written for and recently published as special sections in three consecutive issues of the Journal of Personality Assessment Part I provides lucid commentaries on the current status of and future issues regarding the Rorschach and MMPI 2 and other instruments including the Minnesota Multiphasic Personality Inventory Adolescent MMPI A the Interpersonal Adjective Scales IAS R the Inventory of Interpersonal Problems Circumplex version IIP C the revised NEO Personality Inventory NEO PI R and the third edition of the Millon Clinical Multiaxial Inventory MCMI III The authors not only participated in the development of the instruments but continue to lead the research effort in their application in both clinical and research settings Part II addresses several issues that have been recurring themes and often topics of debate in the research and professional literature The contributors discuss the impact of the five factor model on personality assessment the issue of deception in personality assessment and various critical issues in the measurement of mood states Other articles focus on the integration of the MMPI 2 and Rorschach and the process that clinicians should follow when applying scientific knowledge to clinical practice Part III is primarily devoted to overviews of several statistical methods that are employed

infrequently in personality assessment research but have great potential in contributing to the understanding of the complex data sets often encountered in the measurement and study of personality. These articles serve as both an introduction and a brief tutorial for personality researchers who are unfamiliar with the subject matter. They are valuable references that will form the basis for evaluating the appropriate use of these methods in published research in their areas of interest.

Contemporary Approaches to Neuropsychological Assessment Gerald Goldstein, Theresa M. Incagnoli, 2013-06-29 This volume reflects in part an update of *Clinical Application of Neuropsychological Test Batteries* edited by Theresa Incagnoli, Gerald Goldstein and Charles Golden some 10 years ago. While the initial concept of the present editors involved doing a straightforward update of each chapter, it soon became apparent that the field of clinical neuropsychology had changed so dramatically and rapidly that substantial changes in the outline had to be made. It was our view that sufficient interest remained in the standard comprehensive neuropsychological test batteries to make an update worthwhile. We asked four senior people to take on this assignment: James Moses Jr. and Arnold Purisch in the case of the Luria-Nebraska Battery and James Reed and Homer Reed for the Halstead-Reitan Battery. These individuals all have long-term associations with these procedures and can be viewed as pioneers in their development. However, it also seemed to us that there was an increasing interest in the psychometric aspects of the standard procedures and in assessment issues related to the relative merits of using standard or individualized assessment strategies. Thus, we have chapters by Elbert Russell and Gerald Goldstein that provide discussions of these current methodological and clinical issues. During the past 10 years, the cognitive revolution has made a strong impact on neuropsychology. The interest of cognitive psychologists in brain function has increased dramatically, and we now have an active field of cognitive neuropsychology, something that was only beginning 10 years ago.

Handbook of Psychiatric Measures A. John Rush Jr., Michael B. First, Deborah Blacker, 2009-03-20 The *Handbook of Psychiatric Measures* offers a concise summary of key evaluations that you can easily incorporate into your daily practice. The measures will enhance the quality of patient care, assisting you both in diagnosis and assessment of outcomes. Comprising a wide range of methods available for assessing persons with mental health problems, the *Handbook* contains more than 275 rating methods from the Abnormal Involuntary Movement Scale to the Zung Self-Rating Depression Scale. In this fully revised edition, more than 40 measures have been added both to the book and to the accompanying CD-ROM. The *Handbook* features thoroughly examined and revised measures that provide the most relevant and timely information for clinicians. New measures that empirically provide better patient evaluation. Updated costs, translations, and contact information for each measure. This handy compendium includes both diagnostic tools and measures of symptoms, function, and quality of life, medication side effects, and other clinically relevant parameters. It focuses on measures that can be most readily used in either clinical practice or research. Most of the measures are designed to improve the reliability and validity of patient assessment over what might be accomplished in a standard clinical interview. The measures also demonstrate that the use of

formal measures can improve the collection synthesis and reporting of information as compared with the use of unstructured examinations Seventeen disorder specific chapters organized in DSM IV TR order include measures for Disorders of childhood and adolescence Cognitive disorders Sexual dysfunction Eating disorders Sleep disorders Aggression and much more The discussion of each measure includes goals description practical issues psychometric properties and clinical utility followed by references and suggested readings This revised edition includes updated measure descriptions new measure variants and research and newly selected measures particularly appropriate to the domain of discussion As a clinical tool this book Describes how when and to what purpose measures are used Points out practical issues to consider in choosing a measure for clinical use Addresses limitations in the use of measures including ethnic cultural and socioeconomic factors that influence their interpretation Use of this special resource is further enhanced by a CD ROM containing the full text of more than 150 of these measures an invaluable aid for reference and clinical decision making

Diagnostic and Behavioral Assessment in Children and Adolescents Bryce D. McLeod, Amanda Jensen-Doss, Thomas H. Ollendick, 2013-07-22 This comprehensive volume shows how to use both diagnostic and behavioral assessment knowledgeably and effectively throughout the process of treatment The two traditions have developed along separate paths each with its own conceptual underpinnings and psychometric strengths Used together they can produce a complete picture of a child s or adolescent s needs and strengths The expert editors and contributors describe the full range of evidence based assessment tools and illustrate their application with two intake to termination case examples both based on DSM 5 Reproducible tools include a behavioral recording form and a multipage case conceptualization worksheet that can be downloaded and printed in a convenient 8 1 2 x 11 size

Manual for the Standard for Clinicians' Interview in Psychiatry (SCIP) Ahmed Sayed Aboraya, 2022-07-15 The SCIP manual will introduce a new assessment tool designed to be compatible with 21st century advances in measurement base care MBC and personalized medicine in psychiatry PMP The SCIP includes 18 clinician administered and 15 self administered reliable and validated scales covering most adult symptom domains anxiety obsessions compulsions posttraumatic stress depression mania delusions hallucinations disorganized thoughts aggression negative symptoms alcohol use drug use attention deficit hyperactivity and eating disorders Mental health professionals psychiatrists psychiatry residents psychologists therapists clinical social workers counselors nurses nurse practitioners physician assistants professors students and mental health researchers are the primary audience of the manual These professionals will be able to implement SCIP scales in their practice and use the SCIP psychopathology glossary as part of the emerging science of personalized medicine psychiatry PMP Existing books on measures and rating scales such as the two books above describe different scales developed by different authors at different periods Each scale has its own rating guidelines and training requirements which must be followed by clinicians in order to use the scales This demands a considerable amount of time for clinicians and can be a barrier to using the scales in practice Even within the same psychopathology domain many

published measurement scales exist For instance the book published by Waters and Stephane includes 120 scales for psychosis Among the 120 scales for psychosis which scale s should the clinician choose Our proposed manual will remove these barriers by creating simple and universal principles which allow readers to use the 33 reliable and validated SCIP scales with most adult psychiatric disorders There will be 15 videotaped interviews available online for readers who buy the book Readers are expected to watch the interviews in conjunction with reading the manual
