Rimensberger,2014-11-12 Written by outstanding authorities from all over the world this comprehensive new textbook on pediatric and neonatal ventilation puts the focus on the effective delivery of respiratory support to children infants and newborns In the early chapters developmental issues concerning the respiratory system are considered physiological and

mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed. Thereafter the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained with the emphasis on a practical step by step approach. Respiratory monitoring and safety issues in ventilated patients are considered in detail and many other topics of interest to the bedside clinician are covered including the ethics of withdrawal of respiratory support and educational issues. Throughout the text is complemented by numerous illustrations and key information is clearly summarized in tables and lists.

Cardiorespiratory Physiotherapy: Adults and Paediatrics: First South Asia Edition -E-Book Eleanor Main, Linda Denehy, 2017-01-20. This seminal textbook continues to provide those who are studying or are in practice with comprehensive evidence based coverage of all the main aspects of respiratory and cardiac physiotherapy throughout the whole lifespan: neonates, infants, children, adolescents and adults, with the patient at centre and advocating a problem based approach. For the new edition Jennifer Pryor and Ammani Prasad hand the baton of editorship and their lasting legacy over to Eleanor Main and Linda Denehy. With a team of over 60 international expert authors the new editors have incorporated major changes reflecting current cardiorespiratory physiotherapy education and practice. These changes are heralded by a new title: Cardiorespiratory Physiotherapy: Adults and Paediatrics, formerly Physiotherapy for Respiratory and Cardiac Problems: Adults and Paediatrics, and a significant restructure of the content with a new set of chapters. A new key chapter on anatomy and physiology of the respiratory system lays the foundation which is then followed by a chapter on clinical assessment of adults, infants and children and acutely ill or deteriorating patients. Additional new content includes a chapter on outcome measurement in practice and a large chapter describing rehabilitation in acute and chronic conditions in special populations including spinal cord injury, oncology, trauma and paediatrics. The chapter on therapeutic interventions is comprehensive and reflective of evidence based practice. Integrates evidence with clinical practice. Case studies used to facilitate problem solving. Boxes throughout highlighting key issues and points. Emphasizes the need for a holistic approach to patient care.
