**Do the Humanities Create Knowledge?** Chris Haufe,2023-12-07 There is in certain circles a widely held belief that the only proper kind of knowledge is scientific knowledge This belief often runs parallel to the notion that legitimate knowledge is obtained when a scientist follows a rigorous investigative procedure called the scientific method Chris Haufe challenges this idea He shows that what we know about the so called scientific method rests fundamentally on the use of finely tuned human judgments directed toward certain questions about the natural world He suggests that this dependence on judgment in fact reveals deep affinities between scientific knowledge and another equally important sort of comprehension that of humanistic creative endeavour His wide ranging and stimulating new book uncovers the unexpected unity underlying all our efforts whether scientific or arts based to understand human experience In so doing it makes a vital contribution to broader conversation about the value of the humanities in an increasingly STEM saturated educational culture

**The Trial of Galileo** Michael S. Pettersen,Frederick Purnell, Jr.,Mark C. Carnes,2022-07-01 In The Trial of Galileo the new science as brilliantly propounded by Galileo Galilei collides with the elegant cosmology of Aristotle Aquinas and medieval Scholasticism The game is set in Rome in the early decades of the seventeenth century Most of the debates occur within the Holy Office the arm of the papacy that supervises the Roman Inquisition At times action shifts to the palace of Prince Cesi founder of the Society of the Lynx Eyed which promotes the new science and to the lecture halls of the Jesuit Collegio Romano Some students assume roles as faculty of the Collegio Romano and the secular University of Rome the Sapienza Others are cardinals who seek to defend the faith from resurgent Protestantism the imperial ambitions of the Spanish monarch the schemes of the Medici in Florence and the crisis of faith throughout Christendom Some embrace the new cosmology some denounce it and still others are undecided The issues range from the nature of faith and the meaning of the Bible to the scientific principles and methods as advanced by Copernicus Kepler Tycho Brahe Giordano Bruno and Galileo Central texts include Aristotle s On the Heavens and Posterior Analytics Galileo s Starry Messenger 1610 Letter to Grand Duchess Christina 1615 and Dialogue on the Two Chief World Systems 1632 the declarations of the Council of Trent and the Bible
