**In Situ Remediation of Chlorinated Solvent Plumes** Hans F. Stroo, C. Herb Ward, 2010-09-10 In the late 1970s and early 1980s our nation began to grapple with the legacy of past disposal practices for toxic chemicals With the passage in 1980 of the Comprehensive Environmental Response Compensation and Liability Act CERCLA commonly known as Superfund it became the law of the land to remediate these sites The U S Department of Defense DoD the nation's largest industrial organization also recognized that it too had a legacy of contaminated sites Historic operations at Army Navy Air Force and Marine Corps facilities ranges manufacturing sites shipyards and depots had resulted in widespread contamination of soil groundwater and sediment While Superfund began in 1980 to focus on remediation of heavily contaminated sites largely abandoned or neglected by the private sector the DoD had already initiated its Installation Restoration Program in the mid 1970s In 1984 the DoD began the Defense Environmental Restoration Program DERP for contaminated site assessment and

remediation Two years later the U S Congress codified the DERP and directed the Secretary of Defense to carry out a concurrent program of research development and demonstration of innovative remediation technologies As chronicled in the 1994 National Research Council report Ranking Hazardous Waste Sites for Remedial Action our early estimates on the cost and suitability of existing technologies for cleaning up contaminated sites were wildly optimistic Original estimates in 1980 projected an average Superfund cleanup cost of a mere 3 The Mechanisms of Biomineralization in Animals and Plants

Nishimura,2024-12-19 Motor neuron diseases MNDs comprise a large and heterogeneous group of disorders in which the impairment of neuromuscular unity is the major pathological hallmark causing severe morbidity to individuals and frequently leading to death due to respiratory failure The incidence of MNDs varies in different populations however the most prevalent Amyotrophic Lateral Sclerosis is estimated to occur globally in around 1 2 per 100 000 As of today a myriad of pathogenic variants located at more than a hundred genes and loci have been associated with this complex group of entities Functional studies aiming to understand their physiological impact both using stem cell and animal models have greatly increased the knowledge of pathological mechanisms underlying MNDs These studies show that common pathways such as autophagy protein translation axon elongation vesicular trafficking and RNA metabolism are particularly affected in these conditions and could be potential targets for therapeutic interventions The recent use of antisense oligonucleotides ASOs such as spinraza have successfully decreased the pathological effects of splicing disturbances in Progressive Muscular Atrophy Despite these findings similar results for other motor neuron diseases are still pending Polymetallic Metallogenic System

Goldberg,Pamela Den Besten,2021-09-30 This book addresses the structural and biological properties of dental and periodontal tissue structures and covers their mineralization process The book contains a description of dentines cementum enamel and bone including collagens as well as non collagenous proteins SIBLINGs SLRPs GAGs PGs lipids and MMPs The

mechanisms of mineralization are described in detail and the book is focused on matrix vesicles collagen mineralization and the role of non collagenous extracellular matrix components either as promoters or inhibitors of mineralization In addition the matrix components non collagenous of enamel amelogenin ameloblastin enamelin MMP4 MMP20 and other proteases are reviewed and their respective roles in dental tissues biomineralizations and tissue turnover are discussed Additionally environmental factors involved in enamel dentin defects are addressed With state of the art contributions from experts in the respective domains the book is a useful introduction to the field for junior scientists interested in dental and peridental tissue biomineralization It is also an interesting read for advanced scientists and clinicians working in dental research giving them a broader view of the topic beyond their area of specialization The series Biology of Extracellular Matrix is published in collaboration with the American Society for Matrix Biology
