Physical and Chemical Mechanisms in Molecular Radiation Biology William A. Glass, Matesh N. Varma, 2012-12-06

The fundamental understanding of the production of biological effects by ionizing radiation may well be one of the most important scientific objectives of mankind such understanding could lead to the effective and safe utilization of the nuclear energy option In addition this knowledge will be of immense value in such diverse fields as radiation therapy and diagnosis and in the space program To achieve the above stated objective the U S Department of Energy DOE and its predecessors embarked upon a fundamental interdisciplinary research program some 35 years ago A critical component of this program is the Radiological and Chemical Physics Program RCPP When the RCPP was established there was very little basic knowledge in the fields of physics chemistry and biology that could be directly applied to understanding the effects of radiation on biological systems Progress of the RCPP program in its first 15 years was documented in the proceedings of a conference held at Airlie Virginia in 1972 At this conference it was clear that considerable progress had been made in research on the physical and chemical processes in well characterized systems that could be used to understand biological effects During this period of time most physical knowledge was obtained for the gas phase because the technology and instrumentation had not progressed to the point that measurements could be made in liquids more characteristic of biological materials

Strahlenbiologie / Radiation Biology, 2012-12-06 Die Strahlenbiologie hat sich von einem Forschungszweig mit dem sich noch vor wenigen Jahrzehnten nur die Strahlentherapeuten und vereinzelte Biologen beschäftigten zu einem Arbeitsgebiet entwickelt das die gesamte Medizin und weiteste Gebiete der Biologie interessieren muß Auf dem Gebiet der Radiologie wird die Radiobiologie von zwei verschiedenen Richtungen gefördert Einerseits hier ist der Ursprung dieser Wissenschaft zu suchen ergeben sich aus der klinischen Beobachtung Fragestellungen die man auf experimentellem Weg zu beantworten versucht Andererseits bearbeitet eine besondere Gruppe von Biologen die vornehmlich die ionisierende Strahlung als Instrument benutzt ihre Probleme Beide Gebiete haben enge Verbindung sollten sich gegenseitig fördern und können auch vereint sogar durch dieselbe Person ihre praktische Auswirkung erfahren Zuerst haben die Radiologen ihre mannigfaltigen Probleme selbst aufzuklären versucht Mit zunehmender Verbesserung und Verfeinerung der Methode hat sich im Rahmen der Radiologie die besondere Arbeitsrichtung der Radiobiologie ausgesondert die heute zum Teil eigene Wege geht Die Radiobiologie gewinnt für die Strahlentherapie immer mehr an Bedeutung so daß man versucht ist die Hoffnung auszudrücken daß die Radiobiologie berufen sein wird die Radiotherapie aus der empirischen Sphäre in eine exakt fundierte zu führen In noch stärkerem Maße hat sich auf dem Gebiet der Radiodiagnostik die Situation gewandelt Ohne gründliche radiobiologische Kenntnisse kann die Anwendung ionisierender Strahlen für Untersuchungszwecke heute nicht mehr verantwortet werden Die Nuclearmedizin vereinigt auf radiobiologischem Gebiet die Forderungen die für Radiotherapie und diagnostik aufgestellt wurden *Handbuch der medizinischen Radiologie: Röntgendiagnostik der Zentralnervensystems*
