Skylark Meets Meadowlark Thomas C. Gannon, 2009-11-01 A Native rereading of both British Romanticism and mainstream Euro American ecocriticism this cross cultural transatlantic study of literary imaginings about birds sets the agenda for a more sophisticated and nuanced ecocriticism Lakota critic Thomas C Gannon explores how poets and nature writers in Britain and Native America have incorporated birds into their writings He discerns an evolution in humankind s representations and attitudes toward other species by examining the avian images and tropes in British Romantic and Native American literatures and by considering how such literary treatment succeeds from an ecological or animal rights perspective Such depictions Gannon argues reveal much about underlying cultural and historical relationships with the Other whether other species or other peoples He elucidates the changing interconnections between birds and humans in British Romanticism from Cowper to Clare with particular attention to Wordsworth Coleridge Shelley Byron and Keats Gannon then considers how birds are imagined by Native writers including early Lakota authors and contemporary poets such as Linda Hogan and Joy Harjo Ultimately he shows how the sensitive and far reaching connections with nature forged by Native American writers encourage a more holistic reimagining of humankind s relationship to other animals

Meadowlark Economics: Collected Essays James Eggert, 2024-01-05 Foreword By Bill This is an unusual and valuable book in many respects Its author of course is an economist but not one devoted to the prevailing theology of his profession Economists mostly work with the dedication of beavers or bees toward the great goals of More Growth expansion and acceleration are the sacred words of their creed And they have been enormously successful their faith has spread around the world crowding out all other creeds And yet there is always something rather well dismal about the field This comes I think from its disciples firm determination to wall off certain questions For instance What makes for happiness Or How do I figure out what I want from life They can answer these only by pointing to our consumer behavior We must want what we buy But they must sense the tautological absurdity of that line of argument Now comes James Eggert one of a small school of economists who has begun to think outside the box And it is curious that he soon delves deeply into a concept long used by his tribe value In his essay Meadowlark Economics Eggert inscribes it marvelously with real meaning instead of the stale and transactional definition to be found in the front of the Econ textbooks The meadowlark s song is pleasing his color and swoop of flight enchanting Suddenly we are using good old nouns and adjectives the sweet and solid Anglo Saxon words instead of the ponderous Latinate syllables of the professional journal These things are a form of wealth and are valuable he insists And if you assign them a value in your heart then you are in a position to begin to assess both the positives and the negatives of economic growth The so called efficiency for instance of the modern farm which leaves no room for the meadowlarks to nest and fledge their young is but one of many examples Eggert s book will be of great use to all who read it But it would be especially helpful though subversive to give it to anyone you know who is an economist It will help them see among other things that grasping onto the conventional economic orthodoxy not only shows a certain blindness but can also unfortunately turn out to be tragic From Kirkus Reviews This collection of thoughtful essays weaves together economic and ecological issues While Eggert is an economist by trade he is struck by the relationship between economics and ecology I believe these two households are becoming more interdependent he writes and their futures more and more intimately linked Indeed each of the 21 elegantly written essays in this revised collection has a strong eco conscious component The unusual title is derived

from the author's concern over the Midwest's loss of meadowlarks somewhat esoterically he translates this occurrence into meadowlark values suggesting that a meadowlark economist must seriously try and incorporate an ecological consciousness and ecological values along with market thinking and market values Eggert's essays are as soaring and aspirational as they are instructional and practical For example in What's Wrong with Capitalism he notes there is a destructive quality in capitalism that often violates the ecological laws that can and should ensure life's beauty balance health and long term continuity In perhaps his most novel essay Wal Mart Pond Eggert cleverly combines ecology and economy by imagining a conversation with Henry Thoreau His final essay Quartet is most worthy of contemplation what is our part in the music of the cosmos what is our role in the harmony of nature's variations on a theme At times poetic and philosophical even as the author remains firmly planted on terra firma
