Multiple Representations in Chemical Education John K.

Gilbert, David Treagust, 2009-02-28 Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds. Doing so involves making use of three types of representation: the macro, the empirical properties of substances, the sub-micro, the natures of the entities giving rise to those properties, and the symbolic, the number of entities involved in any changes that take place. Although understanding this triplet relationship is a key aspect of chemical education, there is considerable evidence that students find great difficulty in achieving mastery of the ideas involved. In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels, the book discusses the learning involved, the problems that students encounter, and successful approaches to teaching. Based on the reported research, the editors argue for a coherent model for understanding the triplet relationship in chemical education.

Research Anthology on Child and Domestic Abuse and Its Prevention

Management Association, Information Resources, 2022-03-11 Every day both adults and children are victimized in unhealthy relationships. Domestic and child abuse have surged during the COVID-19 pandemic as potential escapes from abuse at home were stripped away. Abuse is a raging global issue; however, with enough research, policy, and social activism, society can aid in the prevention of child and domestic abuse. The Research Anthology on Child and Domestic Abuse and Its Prevention discusses the prevalence of domestic abuse as well as the exploitation of children both at home and beyond. It further presents emerging practices in technology, social work, and criminology to prevent the further exploitation and victimization of adults and children in abusive situations. Covering topics such as foster children, gender-based violence, and trauma analysis, this major reference work is an indispensable resource for social workers, lawmakers, government organizations, non-profit organizations, psychologists, therapists, sociologists, libraries, students, and educators of higher education, criminologists, leaders in law enforcement, researchers, and academicians.

Just Sex? Nicola Gavey, 2018-10-26 In the award-winning Just Sex: The Cultural Scaffolding of Rape, Nicola Gavey provides an extensive commentary on the existing literature on rape, analysing recent research to examine the psychological and cultural conditions of possibility for contemporary sexual violence. Just Sex argues that feminist theory on sexual victimization has gone both too far and not far enough. It presents the reader with a challenging and original perspective on the issues of rape, sex, and the body, incorporating new material on sexism, misogyny, and digital culture, as well as debates over gendered analyses of sexual violence. The second edition has been updated and expanded to be extremely timely and relevant, with the most recent high-profile rape cases, the Stanford rape case and the Belfast rape case, being tried in the media and online. The rise of the Hollywood Harvey Weinstein scandal and the MeToo movement makes this book incredibly useful and necessary to those who are working within the area of sexual violence. This will appeal to academic readers studying psychology, sociology, and criminology, as well as those looking into cultural influences on society. It will also be very useful to those working in the professional sector on prevention and with people who have been subjected to sexual violence.
