Media Bias? Tawnya J. Adkins Covert, Philo C. Wasburn, 2009-01-01 Media Bias addresses the question To what extent can mainstream news media be characterized as conservative or liberal The study involves a systematic comparative analysis of the coverage given to major domestic social issues from 1975 to 2000 by two mainstream newsmagazines Newsweek and Time and two explicitly partisan publications the conservative National Review and the liberal Progressive Working from the idea that some biased accounts of social issues can perform several positive functions for the maintenance and vitality of political democracy Adkins Covert and Wasburn offer a new methodology for analyzing bias empirically one that is capable of producing valid and reliable findings They begin by defining the meaning of bias and discuss possible methods of measuring media bias empirically and systematically By comparing each publication's coverage on poverty crime the environment and gender issues in which the line between the conservative and liberal positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society

Tilt? David Niven, 2002-09-30 Nine in ten Americans believe the media are biased Trust in journalists ranks beneath that in lawyers and even the media themselves regularly portray their own industry as slanted toward Democrats and liberals These perceptions however do not coincide with reality as David Niven reveals in his bold new take on an often debated subject Tilt

The Search for Media Bias presents the first comprehensive review of the charges the evidence and the effects beginning with a simple but altogether overlooked premise to measure media bias or fairness one has to have a fair baseline with which to compare coverage Using situations in which presidents governors mayors and members of Congress from different political parties have produced the same results in office Tilt compares media coverage of Democrats and Republicans in situations in which they clearly deserved equal treatment The lack of evidence for partisan media bias is only part of the story The media cover allegations of bias as if their industry has already been tried and convicted while the American people readily accepted the premise that their main sources of information are selfishly slanted toward reporters personal political agendas Niven s findings unmistakable and consistent reveal that when the output of politicians is the same media coverage follows a conclusion that is as provocative as it is timely and necessary

The Politics of Persuasion Anthony R. DiMaggio, 2017-02-21 Examines how the US media covers high profile public policy issues in the context of competing claims about media bias Tracking the effects of media content on the public is a difficult endeavor and media effects vary on a subject to subject basis To address this challenge The Politics of Persuasion employs a multifaceted mixed method approach to studying mass media and public attitudes Anthony R DiMaggio analyzes more than a dozen case studies covering US domestic economic policy and examines a wide range of theories of how bias operates in mass media with regard to coverage of these issues While some research claims that journalists are overly negative and biased against government officials some reveals that journalists favor citizens groups Still other studies contend there is a liberal bias in the media a progovernment bias or a bias in favor of advertisers and business interests Through his analysis DiMaggio is the first to systematically examine all of these competing interpretations He concludes that reporters tailor stories to corporate and government interests but argues that the ability to manufacture consent from the public in favor of these elite views is far from guaranteed According to DiMaggio citizens often make use of their own personal experiences and prior attitudes to challenge official narratives
