Ramesh Kumar, 2009-09 India is one of the emerging markets that pose a unique set of challenges to marketers The importance of the context and the usefulness of concepts in the Indian context is the core proposition of the book The diversity of a mix of factors such as cultural aspects lifestyles demographics and unbranded offerings make consumer behaviour a fascinating study This book focuses on the behavioural principles of marketing and its application to branding in the Indian context Consumer behaviour concepts associated with branding A combination of recent and traditional examples reflecting the application of behavioural concepts Touch of reality boxes to indicate context based examples Caselets and cases drawn from real life situations Research findings associated with the Indian context Topical issues in consumer behaviour like cultural aspects digital marketing and experiential branding The Active Consumer Marina Bianchi, 2006-05-10 The Active Consumer discusses how consumers seem to delight in trying new solutions and exploring new combinatory possibilities This book provides an economic theoretical understanding of this phenomenon and the many ways in which innovation can structure consumer choice The authors show from different points of view how central novelty can be in consumer behaviour how it relates to technical change and how new consumer capabilities are developed and organized The World of Goods Mary Douglas, Baron Isherwood, 2021-03-28 It is well understood that the consumption of goods plays an important symbolic role in the way human beings communicate create identity and establish relationships What is less well known is that the pattern of their flow shapes society in fundamental ways In this book the renowned anthropologist Mary Douglas and economist Baron Isherwood overturn arguments about consumption that rely on received economic and psychological explanations They ask

new questions about why people save why they spend what they buy and why they sometimes but not always make fine distinctions about quality Instead of regarding consumption as a private means of satisfying one's preferences they show how goods are a vital information system used by human beings to fulfill their intentions towards one another They also consider the implications of the social role of goods for a new vision for social policy arguing that poverty is caused as much by the erosion of local communities and networks as it is by lack of possessions and contrast small scale with large scale consumption in the household A radical rethinking of consumerism inequality and social capital The World of Goods is a classic of economic anthropology whose insights remain compelling and urgent This Routledge Classics edition includes a new foreword by Richard Wilk Forget that commodities are good for eating clothing and shelter forget their usefulness and try instead the idea that commodities are good for thinking Mary Douglas and Baron Isherwood
