New Directions In Development Economics:

New Directions in Development Economics Mats Lundahl, Benno Ndulu, 2005-08-10 *New Directions in Development Economics* is divided into two parts. The first half considers the dilemma of growth with special reference to its environmental cost. The second half focuses on the role of the state in the context of the growing dominance of the free market argument. The contributors include Paul Collier, Partha Dasgupta, Ronald Findlay and Deepak Lal.

New Directions in Development Economics Mats Lundahl, Benno Ndulu, 2005-08-10 This volume is divided into two thematic parts: economic growth or its absence in developing countries and contributions to the debate on the role of the state versus the market. It outlines possible policy prescriptions of relevance both in the North and South.

New Directions in Development Economics Amitava Krishna Dutt, Kenneth P. Jameson, 1992 *The Process of Economic Development* James M. Cypher, James L. Dietz, 2004 This textbook includes discussions of such topics as the environment, the debt case, export-led industrialization, import substitution, industrialization, growth theory and technological capability.

New Directions in Development Economics Abhijit V. Banerjee, S. M. Ravi Kanbur, 2005 *New Directions in the World Economy* Bela Balassa, 1989-06-18 An attempt to assist policy makers in developing countries to cope with the challenges they face during the rest of the century and beyond. For this purpose it provides information on the experience of developing, developed and socialist countries.

Contextual Development Economics Matthias P. Altmann, 2010-11-16 Poverty still persists in today's low income countries despite decades of international aid and extensive research on the determinants of growth and development. The book argues that meeting this challenge requires a holistic understanding of the context-specific factors that influence economic behavior and structures in poor countries. *Contextual Development Economics* approaches this task by offering a methodology that allows analysing the dynamic interrelations between economic, cultural and historical determinants of economic life in low income countries. The book starts with an empirical inquiry into the economic characteristics of low income countries that create the context by which the specific forms of organising economic activity in these countries are determined. It then looks at how different generations of development economists sought to explain economic realities in low income countries from the 1940s through today. The book finally synthesises the results from this empirical and methodological analysis with insights from an inquiry into contributions of the German Historical School from which it borrows the concept of the economic style as a methodological alternative to the universal and hence often irrelevant models of mainstream development economics. This book offers a promising perspective for the future of development economics that will be of interest to researchers and development practitioners alike. It will also be relevant for academics and students with an interest in applications of the method and concepts of the Historical School to contemporary problems.

Contemporary Issues in Development Economics B. N. Ghosh, 2001 This brand new collection of articles looks at both traditional concerns in economic development such as aid, debt and the role of the IMF but also at gender, brain drain, military expenditure and postcolonial

theory **Frontiers of Development Economics** Gerald M. Meier, Joseph E. Stiglitz, 2001 With contributions from 35 leading economists this forward looking book explores the future of development economics against the background of the past half century of development thought and practice Outstanding representatives of the past two generations of development economists assess development thinking at the turn of the century and look to the unsettled questions confronting the next generation The volume offers a thorough analysis of the broad range of issues involved in development economics and it is especially timely in its critique of what is needed in development theory and policy to reduce poverty An overriding issue is whether in the future development economics is to be regarded simply as applied economics or whether the nature and scope of development economics will constitute a need for a special development theory to supplement general economic theory *Frontiers of Development Economics* is an ideal reference for all those working in the international development community *What Works in Development?* Jessica Cohen, William Easterly, 2010-02-01 What Works in Development brings together leading experts to address one of the most basic yet vexing issues in development what do we really know about what works and what doesn't in fighting global poverty The contributors including many of the world's most respected economic development analysts focus on the ongoing debate over which paths to development truly maximize results Should we emphasize a big picture approach focusing on the role of institutions macroeconomic policies growth strategies and other country level factors Or is a more grassroots approach the way to go with the focus on particular microeconomic interventions such as conditional cash transfers bed nets and other microlevel improvements in service delivery on the ground The book attempts to find a consensus on which approach is likely to be more effective Contributors include Nana Ashraf Harvard Business School Abhijit Banerjee MIT Nancy Birdsall Center for Global Development Anne Case Princeton University Jessica Cohen Brookings William Easterly NYU and Brookings Alaka Halla Innovations for Poverty Action Ricardo Hausman Harvard University Simon Johnson MIT Peter Klenow Stanford University Michael Kremer Harvard Ross Levine Brown University Sendhil Mullainathan Harvard Ben Olken MIT Lant Pritchett Harvard Martin Ravallion World Bank Dani Rodrik Harvard Paul Romer Stanford University and David Weil Brown
