Urban Dependency Gregory M. Fulkerson, Alexander R. Thomas, 2020-11-15 Urban Dependency investigates the risks of urban populations that cannot survive without the massive consumption of basic rural products like food textiles fossil fuels and other energy rich goods that are harvested by a shrinking rural base Thomas and Fulkerson argue that though essential rural workers and communities are poorly compensated for their labor that is both dangerous and highly exploitative While the rural population is already shrinking the

authors predict that harsh political economic conditions will only fuel further rural urban migration worsening the problem of urban dependency The authors apply their theory of the energy economy to explore a balance between the supply and demand of energy resources that promotes rural justice
