New Essays In Metaphysics:

Idealism Tyron Goldschmidt, Kenneth L. Pearce, 2017-12-08 Idealism is a family of metaphysical views each of which gives priority to the mental. The best known forms of idealism in Western philosophy are Berkeleyan idealism which gives ontological priority to the mental minds and ideas over the physical bodies and Kantian idealism which gives a kind of explanatory priority to the mental the structure of the understanding over the physical the structure of the empirical world. Although idealism was once a dominant view in Western philosophy it has suffered almost total neglect over the last several decades. This book rectifies this situation by bringing together seventeen essays by leading philosophers on the topic of metaphysical idealism. The various essays explain, attack or defend a variety of idealistic theories including not only Berkeleyan and Kantian idealisms but also those developed in traditions less familiar to analytic philosophers including Buddhism and Hassidic Judaism. Although a number of the articles draw on historical sources all will be of interest to philosophers working in contemporary metaphysics. This volume aims to spark a revival of serious philosophical interest in metaphysical idealism.

Non-Being Sara Bernstein, Tyron Goldschmidt, 2021-03-18 Nonexistence is ubiquitous yet mysterious. This volume explores some of the most puzzling questions about non-being and nonexistence and offers answers from diverse philosophical perspectives. The contributors draw on analytic, continental, Buddhist and Jewish philosophical traditions and the topics range from metaphysics to ethics, from philosophy of science to philosophy of language and beyond.

New Essays in Metaphysics Robert Cummings Neville, 1986-11-15 This volume displays fifteen of the many lively options in the field of metaphysics. The authors, having finished their formal education in the 1960s or later, belong to the generation of philosophers whose rebellion was against those who thought they saw metaphysics in the grand sense to be *passé* or impossible. The authors also share a commitment to the importance of metaphysics for the social and cultural life of our time. Despite the diversity of argued opinions on the fundamental array of metaphysical topics, these essays display the zest of a reborn enterprise at once appropriating a rich and honorable past and moving into new areas only recently thought illegitimate for philosophy.

Metametaphysics David Chalmers, David Manley, Ryan Wasserman, 2009-02-19 Metaphysics asks questions about existence: for example, do numbers really exist? Metametaphysics asks questions about metaphysics: for example, do its questions have determinate answers? If so, are these answers deep and important, or are they merely a matter of how we use words? What is the proper methodology for their resolution? These questions have received a heightened degree of attention lately, with new varieties of ontological deflationism and pluralism challenging the kind of realism that has become orthodoxy in contemporary analytic metaphysics. This volume concerns the status and ambitions of metaphysics as a discipline. It brings together many of the central figures in the debate with their most recent work on the semantics, epistemology and methodology of metaphysics.

Metaphysics and the Philosophy of Science Matthew Slater, Zanja Yudell, 2017-02-01 This volume of new essays written by leading philosophers of science explores a broadly methodological

question what role should metaphysics play in our philosophizing about science The essays address this question both through ground level investigations of particular issues in the metaphysics of science and by more general methodological investigations Reason, Metaphysics, and Mind Kelly James Clark, Michael Rea, 2012-02-09 Each of the essays in this volume engages with some particular aspect of philosopher Alvin Plantinga's views on metaphysics epistemology or philosophy of religion **New Essays on the Rationalists** Rocco J. Gennaro, Charles Huenemann, 1999 This collection presents some of the most vital and original recent writings on Descartes Spinoza and Leibniz the three greatest rationalists of the early modern period Their work offered brilliant and distinct integrations of science morals metaphysics and religion which today remain at the center of philosophical discussion The essays written especially for this volume explore how these three philosophical systems treated matter substance human freedom natural necessity knowledge mind and consciousness The contributors include some of the most prominent writers in the field including Jonathan Bennett Michael Della Rocca Jan A Cover Catherine Wilson Stephen Voss Edwin Curley Don Garrett and Margaret D Wilson *From Truth to Reality* Heather Dyke, 2009-06-02 Questions about truth and questions about reality are intimately connected One can ask whether numbers exist by asking Are there numbers But one can also ask what arguably amounts to the same question by asking Is the sentence There are numbers true Such semantic ascent implies that reality can be investigated by investigating our true sentences This line of thought was dominant in twentieth century philosophy but is now beginning to be called into question In *From Truth to Reality* Heather Dyke brings together some of the foremost metaphysicians to examine approaches to truth reality and the connections between the two This collection features new and previously unpublished material by JC Beall Mark Colyvan Michael Devitt John Heil Frank Jackson Fred Kroon D H Mellor Luca Moretti Alan Musgrave Robert Nola J J C Smart Paul Snowdon and Daniel Stoljar **God and Meaning** Joshua W. Seachris, Stewart Goetz, 2016-09-08 Over the past decade there has been a growing interest among analytic philosophers in the topic of life's meaning What is striking about this surge of work is that nearly all of it is by naturalists theorizing from non theistic starting points This book answers the need for a theistic philosophical perspective on the meaning of life Bringing together some of the leading thinkers in analytic philosophy of religion and theology *God and Meaning* touches on important issues in metaphysics epistemology ethics philosophy of religion and biblical theology that intersect with life's meaning In particular What does the question What is the meaning of life mean How can we know if life has meaning and what that meaning is Might God enhance life's meaningfulness in some ways but detract from it in others Is the most meaningful life one of perfect happiness What is the relationship between eternity and life's meaning How does the Old Testament book of Ecclesiastes illumine the topic Should we hope that a kind of transcendent meaning exists Presenting a state of the art assessment of current philosophical positions on these and many other questions *God and Meaning* is an invaluable resource for all students and scholars of the philosophy of religion **Discourse on Metaphysics and Other Essays** Gottfried Wilhelm Leibniz, 1991-11-15 Discourse

on Metaphysics and Other Essays contains complete translations of the two essays that constitute the best introductions to Leibniz's complex thought Discourse on Metaphysics of 1686 and Monadology of 1714 These are supplemented with two essays of special interest to the student of modern philosophy On the Ultimate Origination of Things of 1697 and the Preface to his New Essays of 1703 1705 The translations are taken from Leibniz Philosophical Essays edited and translated by Roger Ariew and Daniel Garber Hackett 1989
