New Directions In Disarmament:

- New Directions in Disarmament** William Epstein, Bernard Taub Feld, 1981 **The Perils and Promise of Global Transparency** Kristin M. Lord, 2007-06-01 Argues that increasing levels of transparency do not always change international politics for the better
- Rethinking the American Antinuclear Movement** Paul Robinson, 2018-01-29 The massive movement against nuclear weapons began with the invention of the atomic bomb in 1945 and lasted throughout the Cold War Antinuclear protesters of all sorts mobilized in defiance of the move toward nuclear defense in the wake of the Cold War They influenced U S politics resisting the mindset of nuclear deterrence and mutually assured destruction The movement challenged Cold War militarism and restrained leaders who wanted to rely almost exclusively on nuclear weapons for national security Ultimately a huge array of activists decided that nuclear weapons made the country less secure and that through testing and radioactive fallout they harmed the very people they were supposed to protect Rethinking the American Antinuclear Movement provides a short accessible overview of this important social and political movement highlighting key events and figures the strengths and weaknesses of the activists and its lasting effects on the country It is perfect for anyone wanting to obtain an introduction to the American antinuclear movement and the massive reach of this transnational concern
- The Treaty Prohibiting Nuclear Weapons* Jonathan L. Black-Branch, 2021-05-20 An examination of the Treaty on the Prohibition of Nuclear Weapons within the contemporary nuclear non proliferation and disarmament security architecture
- The Nuclear Freeze Debate* Paul M Cole, William J Taylor Jr, 2019-06-26 From a local ballot initiative in Massachusetts the nuclear weapons freeze movement has grown during the last three years into an important national issue By 1983 Congress had been asked to consider more than two dozen freeze resolutions and more than 25% of the voters in the U S had the opportunity to vote on state wide and regional freeze initiatives This book explores the issues behind the current debate over nuclear weapons and the freeze movement from a wide range of perspectives The contributors assess the goals and implications of the freeze movement examine its origins in religious and secular pacifism explain the amendments to the original freeze proposal introduced in Congress and discuss the reaction and policies of the Reagan administration The nuclear freeze movement is placed in an international context with discussions of recent arms negotiations European views of U S policies and the possible effects of a freeze on NATO allies and on U S national security The book includes a comprehensive annotated bibliography
- Digest of International Law* Marjorie Millace Whiteman, 1968 *Coexistence, Cooperation and Common Security* Joseph Rotblat, Laszlo Valki, 1988-07-29 To remove the threat of nuclear annihilation changes in attitudes are required such as the acceptance of the concept of common security to take the place of reliance on nuclear deterrence to keep the peace This book gives an insight into thinking about ways to deal with the crisis
- Rethinking Confidence-Building Measures** Marie-France Desjardins, 2014-09-25 Confidence Building Measures CBMs often seen as the fastest growing sector on the post Cold War diplomatic agenda are increasingly viewed by the

international community as useful instruments for addressing a range of security and diplomatic issues Rethinking Confidence Building Measures warns against an uncritical pursuit of CBMs arguing that the idea has been oversold The author asserts that obstacles to meaningful agreements are much more important than usually acknowledged and the political and military ramifications have been generally ignored She concludes that the same effort painstaking negotiation and possibilities for failure are inherent in CBMs as in the wide array of other potential solutions for managing interstate security relations but with far fewer substantial results

Prohibition of Nuclear Weapons: The Relevance of International Law Elliott Meyrowitz, 2025-02-03 The United States is the only nation to have used nuclear weapons in warfare and claims not only through its State Department but through a Congressional vote as late as 1999 that the use of nuclear weapons is lawful Can such a claim with its undeniable assurance of the greatest degree of destruction of life and property this planet will ever have seen be sustained The author investigates this question as a prelude to a more extensive inquiry into the options of legal scholars on the legal status of nuclear weapons and international law Published under the Transnational Publishers imprint

Avoiding War in the Nuclear Age John Borawski, 2019-08-27 Given the disappointing history of arms control negotiations and agreements disconcerting trends in the balance of power and emerging technologies that challenge conventional assumptions about deterrence new ways to promote security through negotiations must be identified and utilized if arms control is ever to play an integral role in enhancing deterrence and reducing instabilities Confidence building measures CBMs may offer one way out of the contemporary arms control morass Instead of focusing on limiting the number and types of weaponry CBMs are designed to control how when where and why military activities occur By clarifying military intentions and regulating the operations of military forces in times of both crisis and calm CBMs can help diminish the opportunities for war arising from surprise attack or from miscalculation accident or failure of communication This volume assembles leading CBM experts from government and academia to assess the utility of CBMs in a wide variety of areas It is intended to serve as a basic primer on the subject as well as to contribute to the ongoing national debate over the role of arms control in strengthening national security by analyzing new and fruitful avenues toward that over riding objective
