New Economic Sociology Developments In An Emerging Field:

The New Economic Sociology Maruo F. Guillen, Randall Collins, Paula England, Marshall Meyer, 2002-04-25 As the American economy surged in the 1990s economic sociology made great strides as well Economists and sociologists worked across disciplinary boundaries to study the booming market as both a product and a producer of culture tracing the correlations they saw between economic and social phenomena In the process they debated the methodological issues that arose from their interdisciplinary perspectives The New Economic Sociology provides an overview of these debates and assesses the state of the burgeoning discipline The contributors summarize economic sociology s accomplishments to date identifying key theoretical problems and opportunities and formulating strategies for future research in the field The book opens with an introduction to the main debates and conceptual approaches in economic sociology Contributor Neil Fligstein suggests that the current resurgence of interest in economic sociology is due to the way it brings together many sociological subdisciplines including the study of markets households labor markets stratification networks and culture Other contributors examine the role of economic phenomena from a network perspective Ron Burt for example demonstrates how social relationships affect competitive dynamics in the marketplace A third set of chapters addresses the role of gender in economic sociology In her chapter Barbara Reskin rethinks conventional notions about discrimination and points out that the law only covers one type of discrimination while in recent years social scientists have uncovered other forms of hidden discrimination which must be addressed as well The New Economic Sociology also addresses the problem of economic development and change from a sociological perspective Alejandro Portes and Margarita Mooney elaborate on one of the key emerging concepts in economic sociology arguing that social capital as an attribute of communities and regions can contribute to economic and social well being by fostering collaboration and entrepreneurship The contributors concur that economic action must be interpreted through the cultural understandings that lend it stability and meaning By rendering these often complex debates accessible The New Economic Sociology makes a significant contribution to this still rapidly developing field and provides a useful guide for future avenues of research **Re-Imagining Economic Sociology** Patrik

From Communists to Foreign Capitalists Nina Bandelj, 2011-10-16 From Communists to Foreign Capitalists explores the intersections of two momentous changes in the late twentieth century the fall of Communism and the rise of globalization Delving into the economic change that accompanied these shifts in central and Eastern Europe Nina Bandelj presents a

pioneering sociological treatment of the process of foreign direct investment FDI She demonstrates how both investors and hosts rely on social networks institutions politics and cultural understandings to make decisions about investment employing practical rather than rational economic strategies to deal with the true uncertainty that plagues the postsocialist environment The book explores how eleven postsocialist countries address the very idea of FDI as an integral part of their market transition The inflows of foreign capital after the collapse of Communism resulted not from the withdrawal of states from the economy as is commonly expected but rather from the active involvement of postsocialist states in institutionalizing and legitimizing FDI Using a wide array of data sources and combining a macro level account of national variation in the liberalization to foreign capital with a micro level account of FDI transactions in the decade following the collapse of Communism in 1989 the book reveals how social forces not only constrain economic transformations but also make them possible From Communists to Foreign Capitalists is a welcome addition to the growing literature on the social processes that shape economic life

Wherry, 2008-02-25 Today it is not uncommon to find items in department stores that are hand crafted in countries like Thailand and Costa Rica These traditional crafts now make up an important part of a global market They support local and sometimes national economies and help create and solidify cultural identity But these crafts are not necessarily indigenous Whereas Thailand markets crafts with a long history and cultural legacy Costa Rica has created a local handicraft tradition where none was known to exist previously In *Global Markets and Local Crafts* Frederick F Wherry compares the handicraft industries of Thailand and Costa Rica to show how local cultural industries break into global markets and conversely how global markets affect the ways in which artisans understand adapt and utilize their cultural traditions Wherry develops a new framework for studying globalization by considering the phenomenon from the perspective of the supplier instead of the market Drawing from interviews and extensive fieldwork shadowing artisans and exporters in their daily dealings Wherry offers a rare account of globalization in motion and what happens when market negotiations do not proceed as planned Considering economic and political forces flows of people and materials and frames that define cultural and market situations as they play out in the artisan communities of these two countries Wherry uncovers how authentic folk tradition is capitalized or created
