The New Faith-science Debate John M. Mangum, 1989

The New Faith-science Debate John M. Mangum, 1989

Religion and Science in Context Willem B. Drees, 2009-09-10 How should we think about religion science and their relationship in modern society Some religious groups oppose evolution some atheists claim science is on their side Others reconcile their beliefs with science or consider science and faith to deal with fundamentally different aspects of human life What indeed is religion belief or trust in God's existence How do we distinguish sense from superstition What does science have to say on such issues Willem B Drees considers contemporary discussions of these issues in Europe and North America using examples from Christianity and religious naturalism and reflections on Islam and Tibetan Buddhism He argues that the scientific understanding leaves open certain ultimate questions and thus allows for belief in a creator but also for religious naturalism or serious agnosticism By analysing the place of values in a world of facts and the quest for meaningful stories in a material world Religion and Science in Context offers an original and self critical analysis of the field its assumptions and functions and ends with a vision of its possible future

Theological Mysteries In Scientific Perspective Augustine Pamplany, 2015-09-25 The contemporary experience of the natural sciences envisages a very substantive and constructive interaction between science and theology In tune with the global momentum of the science theology interface this book attempts to spell out some of the theological implications of the sweeping changes on the scientific scenario revisioning several perennial theological themata in physical biological and cosmological categories How to interpret the profound insights of the Christian revelation in a worldview that is almost imperialistically dominated by science In a scientific culture how do we still meaningfully talk of the Biblical conception of God creating the world What are the natural cosmic and secular implications of the summit points of Christian revelation like the Holy Trinity the Incarnation Eschatology etc What are the scientific nuances of the theological vision of the human nature as imago Dei These are some the questions addressed in the book

Introducing Ecofeminist Theologies Heather Eaton, 2005-02-07 This book is about ecofeminism and its encounter with theology predominantly that of Christian theology in Euro western contexts It introduces and explores ecofeminism and the encounter The goal is to understand the significance and implications of ecofeminism and its contribution and challenge to theology A further goal is to assist ecofeminist theology or theologies to be more effective in preventing ecological ruin assisting women's struggles for freedom and supporting the flourishing of all life on earth Ecofeminism represents ways of discerning associations of many kinds between the feminist and ecological movements and between the oppression and domination of both women and the earth Ecofeminism is an insight referring to critical analyses political actions historical research intuitions and ideals The ecological crisis is creating a pivotal moral and religious challenge and new contexts for theology There is a renewed spiritual sensitivity towards the natural world We are in a time of a spiritual awakening wherein the earth and all life are experienced as sacred where it is possible to experience awe and

wonder and encounter the ineffable Ecofeminist theologies are at the intersection of these ideas and experiences They are the efforts of particular people who see and experience possibilities for greater life more justice and freedom They do not accept that injustice and ecological ruin are inevitable Ecofeminist efforts are directed towards reducing further ecological and social devastation and awakening consciousness to the immense beauty and elegance of all life on this fragile yet awesome blue green planet

Hope for the Earth Ernst M. Conradie, 2005-05-18 Hope for the Earth explores the viability of an eschatological approach to an ecological theology spirituality and praxis in the South African context The basic intuition of such an eschatological approach is that an environmental praxis can only be empowered on the basis of an adequate understanding of Christian hope Despair in the face of environmental destruction will inevitably lead to a spirit of resignation Where then can a vision of hope that includes hope for the earth be found The author proposes a road map for eschatology based on the observation that eschatology has traditionally responded to three aspects of the human predicament namely 1 the evil effects of sin 2 the problem of finitude and transience and 3 the limitations of human power and knowledge in space Part A This analysis is used to fathom the depths of despair as a result of environmental destruction Part B The Biblical roots and subsequent history of Christian eschatology are discussed briefly Part C Recent contributions in Christian eschatology ecological theology cosmology and South African expressions of hope are explored in depth in search of a vision of hope that includes hope for the earth itself Part D The eschatological road map is used to develop a vision of hope for the earth on the basis of a theology of life life amidst death and destruction life beyond death and eternal life in the presence of God Part E Finally the implications of this vision for an ecological ethos spirituality and praxis in the South African context are indicated Part F

Toward an Ecology of Transfiguration John Chryssavgis, Bruce V. Foltz, 2013-06-03 Can Orthodox Christianity offer spiritual resources uniquely suited to the environmental concerns of today This book makes the case emphatically that it can indeed In addition to being the first substantial and comprehensive collection of essays in any language to address environmental issues from the Orthodox point of view this volume with contributions from many of the most influential theologians and philosophers in contemporary world Orthodoxy will engage a wide audience in academic as well as popular circles resonating not only with Orthodox audiences but with all those in search of a fresh approach to environmental theory and ethics that can bring to bear the resources of ancient spirituality often virtually unknown in the West on modern challenges and dilemmas

An Ecological Christian Anthropology Ernst M. Conradie, 2017-03-02 What is the place and vocation of human beings in the earth community This is the central question that this contribution towards a Christian ecological anthropology addresses In ecological theology this question is often answered by the affirmation that We are at home on earth This affirmation rightly responds to the widespread sense of alienation from nature to the anthropocentrism that pervades much of the Christian tradition and to concerns about the scope of environmental devastation This book challenges the affirmation that we are at home on earth examining natural suffering anxieties concerning human finitude and

especially the pervasiveness of evil The book investigates contributions to ecological theology South African and African theology reformed theology and contemporary dialogues between theology and the sciences in search of a thoroughly ecological Christian anthropology *Cosmic Grace, Humble Prayer* Bartholomew I (Ecumenical Patriarch of Constantinople), 2009-06-19 *Cosmic Grace Humble Prayer* presents the powerful ecological vision of Patriarch Bartholomew drawing together a comprehensive collection of his church statements and occasional addresses some available in English only here This second edition provides an updated selection of letters and addresses by the Patriarch including such statements from 2003 to 2007 Editor John Chrysavgis has organized these pieces chronologically and thematically highlighting particular points of interest and importance In addition he provides a substantial historical and theological introduction to the initiatives and writings of Patriarch Bartholomew that also invites readers into the unparalleled environmental perspective of the Orthodox Church *Faith and the Greening of Earth* Dr Clive Ayre, 2024-02-01 Earth's changing climate is increasingly obvious and if humans are largely responsible we all have a part in the solution The purpose of this book a faith perspective to Earthcare and in particular to demonstrate how Earthcare is an integral part of the Christian Faith and therefore of Christian mission It is not a peripheral issue or an optional extra Moreover the Christian Faith can interact not only with other faith perspectives but also with science and with all who simply care And in the process of caring for the Earth we can build bridges of understanding rather than walls of division Faith and the Greening of Earth invites the inquiring reader into realistic scenarios and offers high value resources with integrity Rev Dr Wayne Sanderson A well summarised affirmation of Earthcare as an integral part of faith and an important dimension of Christian mission Dr Kumi Abeyesuriya Rev Dr Clive Ayre was ordained in 1967 and is a Minister of the Word in the Uniting Church With his wife Gail he has served ecumenically and in Queensland congregations over many years in addition to a short term in England Clive has a PhD in Practical Eco theology and is a Minister in Association at Chermside Kedron Community Church in Brisbane
