## **New Genetic Medicine Theological And Ethical Reflections:**

*The New Genetic Medicine* Thomas Anthony Shannon, James J. Walter, 2003 Since the 1970s the interrelated areas of medical genetics and biotechnology have developed dramatically and afforded increased control over the design of living organisms From the very beginning controversies over these techniques and their applications to plants animals and humans have raged in many disciplines including science philosophy ethics and religion This book brings together the seminal essays of two leading Catholic moral theologians Thomas Shannon and James Walter in an effort to identify the key ethical and theological questions raised by the new genetic medicine What is unique about this book is that it specifically and directly brings modern genetics and the Roman Catholic theological and ethical tradition into dialogue While the authors argue that the Catholic tradition has much to offer in putting this current scientific revolution into perspective they well understand the need to avoid merely repeating the tradition in favor of bringing the best of the tradition to bear on the precise questions posed by modern genetic technology

**Reconceiving Reproductive Health: Theological and Christian Ethical Reflections** Manitza Kotzé, Nadia Marais, Nina Müller van Velden, Nadine Bowers du Toit, Mwawi N. Chilongozi, Hanzline R. Davids, Gideon R. Kotzé, Tayla Minnaar, Peter Nagel, Selina Palm, Jeremy Punt, Riaan Rheeder, Tanya van Wyk, Fralene van Zyl, 2019-12-12 While reproduction is fairly often touched upon in theological and Christian ethical discussions reproductive health is not However reproductive health is a matter of theological and ethical concern Discussion pertaining to reproductive health includes a number of debates about for instance abortion and the termination of pregnancy reproductive loss childlessness infertility stillbirth miscarriage and adoption Additionally new reproductive possibilities made available by the development of reproductive technology have necessitated theological and ethical reflection on for example surrogacy post menopausal pregnancies litter births single mothers or fathers by choice in vitro fertilisation and the so called saviour siblings These new developments compel us to reconceive our notions of what reproductive health is or should be Many of these topics are receiving increasing attention in a variety of theological publications The focus of this volume is unique however and to the best of our knowledge this is the first volume dealing not only with reproductive issues but also reflecting theologically and ethically on reproductive health It makes a contribution by providing a variety of perspectives from different theological fields on this theme and in many chapters focussing especially on the South African context These discussions are also part of urgent debates within churches which require developing life giving theological language and imaginative theological alternatives that may speak to experiences of matters relating to reproductive health The popular books TV series and films that touch upon these discussions including *The Handmaid's Tale* and *Mother* strengthen the perception that a more in depth theological and ethical discussion on the theme may be necessary particularly towards exploring stories and confessions from our faith tradition that may provide us with a timely opportunity to do the important work of theological reconceiving

**Design and Destiny** Ronald Cole-Turner, 2008 Scholars discuss the genetic

modification of embryonic cells from the viewpoints of traditional Jewish and Christian teaching considering both the possible therapeutic benefits of this technology and moral concerns about its implementation We are approaching the day when advances in biotechnology will allow parents to design a baby with the traits they want The continuing debate over the possibilities of genetic engineering has been spirited but so far largely confined to the realms of bioethics and public policy Design and Destiny approaches the question in religious terms discussing human germline modification the genetic modification of the embryonic cells that become the eggs or sperm of a developing organism from the viewpoints of traditional Christian and Jewish teaching The contributors leading religious scholars and writers call our attention not to technology but to humanity reflecting upon the meaning and destiny of human life in a technological age Many of these scholars argue that religious teaching can support human germline modification implemented for therapeutic reasons although they offer certain moral conditions that must be met The essays offer a surprising variety of opinions including a discussion of Judaism's traditional presumption in favor of medicine an argument that Catholic doctrine could accept germline modification if it is therapeutic for the embryo an argument implying that traditional Christian teaching permits germline modification whether for therapy or enhancement and a classical Protestant view that germline modification should be categorically opposed Contributors Lisa Sowle Cahill Nigel M de S Cameron Ronald Cole Turner Amy Michelle DeBaets Celia Deane Drummond Elliot Dorff H Tristram Engelhardt Jr Thomas A Shannon James J Walter *Ethics in Biomedical Research* Matti Häyry, Tuija Takala, Peter Herissone-Kelly, 2007 This book deals with the international assessment and regulation of biomedical research In its chapters some of the leading figures in today's bioethics address questions centred on global development scientific advances and vulnerability The series Values In Bioethics makes available original philosophical books in all areas of bioethics including medical and nursing ethics health care ethics research ethics environmental ethics and global bioethics **Reflections on Bioethics** Jose Antonio Morales-Gonzalez, Eugenia Aguilar Nájera, 2018-06-27 The book Reflections on Bioethics is an effort that brings together works grouped into five sections Bioethics and Health Bioethics and Education Bioethics and Technology Bioethics in the Use of Experimental Animals and Selected Topics of Bioethics In each of these sections the fundamental concepts of bioethics and their relationship with each of these branches of knowledge are covered The purpose is to give the reader a specific document of topics it is not intended to be a treaty because the study of any of the five sections is very broad However this is an effort that manages to combine in interdisciplinary subjects that are fundamental for professionals of all fields of knowledge Theological Bioethics Lisa Sowle Cahill, 2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life

movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In *Theological Bioethics* Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national levels In Cahill's eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom

*God, Science, and Designer Genes* Spencer S. Stober, Donna Yarri, 2009-10-13 A biologist and a Christian theologian examine the scientific and philosophical implications and potential impacts of genetic technologies *God Science and Designer Genes An Exploration of Emerging Technologies* provides a unique approach to the central ethical dilemma in contemporary science offering both an up to date account of the current state of genetic technologies and insightful discussions of the moral theological questions these technologies raise Coauthored by professors of biology and theology *God Science and Designer Genes* examines a range of from the headlines issues including the relationship between science and religion designing our children stem cell research cloning genetics and behavior genetics and privacy and using genetic technologies for social justice Who should benefit personally and financially from DNA technology Who might be harmed How do we protect individual rights and guard against discrimination How will embryo modification affect the identity of those so modified *God Science and Designer Genes* gives readers an eloquent thoughtful and objective foundation for considering these and other questions about the potential conflict between scientific achievement personal faith and social responsibility

**A Glass Darkly** David Gareth Jones, R. John Elford, 2010 This book is a sequel to the first volume of *New International Studies in Applied Ethics* and includes essays from some of the same contributors Like the previous volume the book explores the interface between medicine and theology The essays demonstrate the complementarity evident between the two and examine how those coming from different theological traditions are able to provide helpful insights Points of disagreement and their crucial role in contributing to an understanding of the complexities of the debate are acknowledged Much of the discussion focuses on use of the Bible The contributors show an awareness of the pastoral necessity of providing access to new medical technologies for those in need Out of this emerges a positive view of some of the human benefits of modern medicine and the ways in which Christian theology can engage with it constructively The discussion throughout is related to the wider literature in the field

**Genomic Medicine** Dhavendra Kumar, Charis

Eng, 2015 The first edition of Genomics and Clinical Medicine provided an overview of genomics based advances in disease susceptibility diagnosis and prediction of treatment outcomes in various areas of medicine Since its publication the science of genomics has made tremendous progress and exciting new developments in biotechnology and bioinformatics have created possibilities that were inconceivable only a few years ago This completely revised second edition of Genomic Medicine reflects the rapidly changing face of applied and translational genomics in the medical and health context and provides a comprehensive coverage of principles of genetics and genomics relevant to the practice of medicine     Battleground: Religion Daniel L. Smith-Christopher, 2008-12-30 Is there a controversial issue in the contemporary world that does not involve religion Whether it s a debate over the beginning of life or on sexuality and family life or on the stewardship of humans over the environment almost all of the most contentious matters that impact today s society involve people s deeply held religious beliefs Battleground Religion helps clarify these complex topics by examining how various religious beliefs and practices impact current political social and cultural debates Each of the approximately 100 entries examines a hot button issue from war and peace to the culture wars and discusses in a balanced and objective way the points of view on these topics from all parts of the religious spectrum Students will come away from Battleground Religion with a better understanding of the issues that they will be encountering for years to come Each entry includes a bibliography or resources for further information
