Foundations of Environmental and Occupational Neurotoxicology Jose A. Valciukas, 2002 With the growing prospect for germ warfare environmental and occupational neurotoxicology has come center stage This is a multidisciplinary science dealing with the study of chemical compounds found in the environment or workplace that have deleterious effects on the nervous system and behavior of humans The ultimate goal of this science is the understanding of their toxicity with the aim of preventing illness and suffering Prior to the original publication of this work in 1991 this subject has never been viewed as a distinct body of knowledge over ten years later it remains the premier text of its field An encyclopedic compendium of over thirty years exhaustive research written by an expert in the fields of occupational health environment and toxicology Foundations of Environmental and Occupational Neurotoxicology is a pioneering work Jos A Valciukas in building bridges between several academic and medical disciplines explains how health and human behavior may be adversely affected by neurotoxins After introducing his study with a history of environmental and occupational neurotoxicology he discusses in Chapter 1

Fundamentals Techniques the components of the nervous system and how a clinical examination is conducted Chapter 2 Neurotoxic Chemical Compounds Drugs classifies the various neurotoxic substances In Chapter 3 Pharmacology Toxicology and Occupational Health the author examines how neurotoxic agents are absorbed and excreted In Chapter 4 entitled Methods of Data Analysis he assesses surveys data management and the determination of toxic causation Chapter 5 The Targets of Neurotoxicity contains an examination of the effects of toxins on brain development the auditory and visual systems and emotions and moods Chapter 6 entitled Counfounders Current Issues discusses relevant issues of senile dementia alcoholism smoking and neurotoxic agents of chemical warfare What is unique about this book is that Dr Valciukas has consolidated this information and discussed the principles and pitfalls governing the assessment of neurotoxicology in the workplace This book is highly recommended to those who wish to expand their knowledge beyond their area of expertise into aspects of environmental and occupational neurotoxicology Journal of Toxicology and Environmental Health Jos A Valciukas is director of the Clinical Psychology Internship Program at the Lincoln Medical and Mental Health Center in the Bronx New York He is the author of Forensic Neuropsychology Conceptual Foundations and Clinical Practice and is a former managing editor of the journal Environmental Research

Neurobehavioral Methods and Effects in Occupational and Environmental Health Shunichi Araki, 2013-10-02 Neurobehavioral Methods and Effects in Occupational and Environmental Health documents the proceedings of the Fourth International Symposium in Environmental Research held in Tokyo in 1991 This book focuses on the development and application of neuropsychobehavioral methods in occupational and environmental health and advances in the knowledge of the effects on the nervous system and human behavior of occupational and environmental factors This compilation provides forceful evidence of different manifestations of neurotoxicity and their etiologies Neurotoxicity is a major adverse effect of chemical exposure and is particularly serious in developing countries This publication is a good reference for students and practitioners of disciplines such as behavioral science psychosomatic and occupational medicine nutrition and food science public health and hygiene and preventive medicine Behavioral Measures of Neurotoxicity National Research

Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, U.S. National Committee for the International Union of Psychological Science, 1990-02-01 Exposure to toxic chemicals in the workplace and at home is increasing every day Human behavior can be affected by such exposure and can give important clues that a person or population is in danger If we can understand the mechanisms of these changes we can develop better ways of testing for toxic chemical exposure and most important better prevention programs This volume explores the emerging field of neurobehavioral toxicology and the potential of behavior studies as a noninvasive and economical means for risk assessment and monitoring Pioneers in this field explore its promise for detecting environmental
