Irredentism Thomas Ambrosio,2001-09-30 The idea of national unification has long been a powerful mobilizing force for nationalist thinkers and ethnic entrepreneurs since the rise of nationalist ideology in the late 1700s This phenomenon came to be known as irredentism During the Cold War irredentist projects were largely subordinated to the ideological struggle between East and West After the Cold War however the international system has witnessed a proliferation of such conflicts throughout Europe and Asia Ambrosio integrates both domestic and international factors to explain both the initiation and settlement of irredentist conflicts His central argument is that irredentist states confront two potentially contradictory forces domestic nationalism and pressure from the international community Irredentist leaders are forced to reconcile their nationalist policies with pressures from the international plane At the same time irredentist leaders exploit perceived windows of opportunity in pursuit of their nationalist goals Ambrosio examines in depth the past present and possible irredentist projects of Serbia Croatia Hungary and Armenia within a theoretical and comparative framework His conclusions yield significant theoretical findings and important policy implications for both scholars of ethnic conflicts nationalism and international relations and policy makers

[America's Addiction to Automobiles](#) Chad Frederick,2017-09-21 A provocative look at our nation s dependency on the automobile and how its potential impact on urban design will either make or break our health economy and quality of life In this thought provoking work author and urban planning expert Chad Frederick scrutinizes the use of automobiles in cities investigating its role in exacerbating urban inequalities and thwarting sustainability of modern society Through a comprehensive thoughtful discussion Frederick illustrates how the automobile is fundamentally at odds with the very nature of cities He

shows how cars impose huge burdens on our health equity environment local and national economy and quality of life Most of all he shows how automobile dependency has put our entire society at risk The book delves into the monumental role of automobiles in the development of cities after the Great Depression impacting the American identity and affecting the way we produce and manage urban spaces Frederick provides compelling evidence that cities with more diverse modes of transportation are greener healthier more prosperous and even more enjoyable places to live than automobile dependent cities He identifies one institution responsible for our inability to improve our cities the social sciences and examines the root cause of our inability to make progress toward more multi modal cities In conclusion the author offers a radical solution for moving beyond the underlying logic that forces us to create automobile dependent cities
