Passionate Discontent Creativity Gender And French Symbolist Art:

Passionate Discontent Patricia Mathews, 1999 Art historian Patricia Mathews examines the artistic social and scientific discourses of fin de siècle France. Along the way she illuminates the Symbolist construction of a feminized aesthetic that nonetheless excluded female artists from its realm. She analyzes contemporary cultural assumptions as well as theories such as social Darwinism, biological determinism, and degeneracy. **BOOK JACKET** *Symbolist Art in Context* Michelle Facos, 2009-03-31 The Symbolist art movement of the late 19th century forms an important bridge between Impressionism and Modernism. But because Symbolism emphasizes ideas over objects and events, it has suffered from conflicting definitions. In this book, Michelle Facos offers a comprehensive description of this challenging subject. *Women Artists in Interwar France* Paula J. Birnbaum, 2017-07-05 *Women Artists in Interwar France: Framing Femininities* illuminates the importance of the Société des Femmes Artistes Modernes, more commonly known as FAM, and returns this group to its proper place in the history of modern art. In particular, this volume explores how FAM and its most famous members, Suzanne Valadon, Marie Laurencin, and Tamara de Lempicka, brought a new approach to the most prominent themes of female embodiment: the self-portrait, motherhood, and the female nude. These women reimagined art's conventions and changed the direction of both art history and the politics of their contemporary art world. FAM has been excluded from histories of modern art despite its prominence during the interwar years. Paula Birnbaum's study redresses this omission, contextualizing the group's legacy in light of the conservative politics of 1930s France. The group's artistic response to the reactionary views and images of women at the time is shown to be a key element in the narrative of modernist formalism. Although many FAM works are missing, one reason for the lack of attention paid to their efforts, Birnbaum's extensive research through archives, press clippings, and first-hand interviews with artists' families reclaims FAM as an important chapter in the history of art from the interwar years.

Composing the Citizen Jann Pasler, 2009-07-06 In a book that challenges modernist ideas about the value and role of music in Western society, *Composing the Citizen* demonstrates how music can help forge a nation. Deftly exploring the history of Third Republic France, Jann Pasler shows how French people from all classes and political persuasions looked to music to revitalize the country after the turbulent crises of 1871. Embraced not as a luxury but for its public utility, music became an object of public policy as integral to modern life as power and water, a way to teach critical judgment and inspire national pride. It helped people to forget the past, voice conflicting aspirations, and imagine a shared future. Based on a dazzling survey of archival material, Pasler's rich interdisciplinary work looks beyond elites and the histories their agendas have dominated to open new windows onto the musical tastes and practices of amateurs as well as professionals. A fascinating history of the period emerges, one rooted in political realities and the productive tensions between the political and the aesthetic. Highly evocative and deeply humanistic, *Composing the Citizen* ignites broad debates about music's role in democracy and its meaning in our lives. **The Routledge History of the Devil in the Western Tradition** Richard Raiswell, Michelle D.

Nature's Experiments and the Search for Symbolist Form Allison Morehead, 2017-02-27 This provocative study argues that some of the most inventive artwork of the 1890s was strongly influenced by the methods of experimental science and ultimately foreshadowed twentieth century modernist practices Looking at avant garde figures such as Maurice Denis douard Vuillard August Strindberg and Edvard Munch Allison Morehead considers the conjunction of art making and experimentalism to illuminate how artists echoed the spirit of an increasingly explorative scientific culture in their work and processes She shows how the concept of nature's experiments the belief that the study of pathologies led to an understanding of scientific truths above all about the human mind and body extended from the scientific realm into the world of art underpinned artists solutions to the problem of symbolist form and provided a ready made methodology for fin de si cle truth seekers By using experimental methods to transform symbolist theories into visual form these artists broke from naturalist modes and interrogated concepts such as deformation automatism the arabesque and madness to create modern works that were radically and usefully strange Focusing on the scientific psychological and experimental tactics of symbolism Nature's Experiments and the Search for Symbolist Form demystifies the avant garde value of experimentation and reveals new and important insights into a foundational period for the development of European modernism **The Oxford**

Forest of Symbols Andrei Pop, 2019-10-18 In this groundbreaking book Andrei Pop presents a lucid reassessment of those writers and artists in the late nineteenth century whose work merits the adjective symbolist For Pop this term denotes an art that is self conscious about its modes of making meaning and he argues that these symbolist practices which sought to

provide more direct access to the viewer by constant revision of its material means of meaning making brushstrokes on a canvas words on a page are crucial to understanding the genesis of modern art The symbolists saw art not as a social revolution but a revolution in sense and in how we conceptualize the world At the same time the concerns of symbolist painters and poets were shared to a remarkable degree by theoretical scientists of the period especially by mathematicians and logicians who were dissatisfied with the strict empiricism dominant in their disciplines and which made shared knowledge seem unattainable A crisis of sense made art and science look for conceptual foundations underlying the diverging subjective responses and perceptions of individuals Unlike other studies of this period Pop's focus is not on how individual artists may have absorbed bits of scientific theories but rather on the philosophical questions that were relevant to both domains The problem of subjectivity in particular of what in one's experience can and cannot be shared was crucial to the possibility of collaboration within science and to the communication of artistic innovation Pop's brilliant close readings of the literary and visual practices of Manet and Mallarmé of drawings by Ernst Mach William James and Wittgenstein of experiments with color by Bracquemond and Van Gogh and of the philosophical systems of Frege and Russell add up to a startling but coherent picture of the symbolist heritage of modernity and its consequences

Alchemy in Contemporary Art Urszula Szulakowska, 2017-07-05 Alchemy in Contemporary Art analyzes the manner in which twentieth century artists beginning with French Surrealists of the 1920s have appropriated concepts and imagery from the western alchemical tradition This study examines artistic production from c 1920 to the present with an emphasis on the 1970s to 2000 discussing familiar names such as André Breton Salvador Dalí Yves Klein Joseph Beuys and Anselm Kiefer as well as many little known artists of the later twentieth century It provides a critical overview of the alchemical tradition in twentieth century art and of the use of occultist imagery as a code for political discourse and polemical engagement The study is the first to examine the influence of alchemy and the Surrealist tradition on Australian as well as on Eastern European and Mexican art In addition the text considers the manner in which women artists such as Leonora Carrington Remedios Varo and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes

Photojournalism and the Origins of the French Writer House Museum (1881-1914) Elizabeth Emery, 2017-07-05 Why did writers' private homes become so linked to their work that contemporaries began preserving them as museums *Photojournalism and the Origins of the French Writer House Museum* addresses this and other questions by providing an overview of the social forces that brought writers' homes to the forefront of the French imagination at the end of the nineteenth century and the beginning of the twentieth This study analyzes representations of the apartments and houses of Corneille Hugo Balzac Dumas Sand Zola Loti Montesquiou Mallarmé and Proust among others arguing that the writer's home became a contested space and an important part of the French patrimony at this time This is the first book to emphasize the house museum as an essentially modern construct and to trace the history of ideas leading to its institutionalization in twentieth century France The interdisciplinary study also brings new attention to the importance of photojournalism for fin de siècle France and brings to light fascinating and forgotten examples of

Liberation of Painting restores revolutionary activism to the broader history of modern art *Designing the French Interior* Anca I. Lasc, Georgina Downey, Mark Taylor, 2015-10-22 *Designing the French Interior* traces France's central role in the development of the modern domestic interior from the pre-revolutionary period to the 1970s and addresses the importance of various media including drawings, prints, pattern books, illustrated magazines, department store catalogs, photographs, guidebooks, and films in representing and promoting French interior design to a wider audience. Contributors to this original volume identify and historicize the singularity of the modern French domestic interior as a generator of reproducible images, a site for display of both highly crafted and mass-produced objects, and the direct result of widely circulated imagery in its own right. This important volume enables an invaluable new understanding of the relationship between architecture, interior spaces, material cultures, mass media, and modernity.

Art Nouveau and the Classical Tradition Richard Warren, 2017-12-14 Art Nouveau was a style for a new age, but it was also one that continued to look back to the past. This new study shows how, in expressing many of their most essential concerns—sexuality, death, and the nature of art—its artists drew heavily upon classical literature and the iconography of classical art. It challenges the conventional view that Art Nouveau's adherents turned their backs on Classicism in their quest for new forms. Across Europe and North America, artists continued to turn back to the ancient world, and in particular to Greece, for the vitality with which they sought to infuse their creations. The works of many well-known artists are considered through this prism, including those of Gustav Klimt, Aubrey Beardsley, and Louis Comfort Tiffany. But breaking new ground in its comparative approach, this study also considers some of the movement's less well-known painters, sculptors, jewellers, and architects, including in central and eastern Europe, and their use of classical iconography to express new ideas of nationhood. Across the world, while Art Nouveau was a plural style drawing on multiple influences, the Classics remained a key artistic vocabulary for its artists, whether blended with Orientalist and other iconographies or preserving the purity of classical form.

The French Symphony at the Fin de Siècle Andrew Deruchie, 2013 WINNER 2014 CHOICE Outstanding Academic Title Award. The first extended study of seven beloved French symphonic masterpieces, from Saint-Saëns and Franck to Debussy and Dukas. In this first full-length study of the symphony in late nineteenth and early twentieth-century France, Andrew Deruchie provides extended critical discussion of seven of the most influential and frequently performed works of the era by Camille Saint-Saëns, César Franck, Édouard Lalo, Vincent d'Indy, and Paul Dukas. The volume explores how these symphonists modernized the art form yet preserved many of the formal and rhetorical conventions of the canon, reconciling in particular Beethoven's symphonic legacy with the musical culture, intellectual environment, and political milieu of fin de siècle France. Drawing on contemporary criticism, music histories, composers' prose, and unpublished sketches, Deruchie's readings offer fresh insights on issues of musical form and technique and also move beyond the notes to consider questions of meaning. Andrew Deruchie is a lecturer in musicology at the University of Otago, New Zealand.
