**The Symmetrical English** Carsten Hansen,2000 The Symmetrical systems of the English Opening constitute a large and important area of modern chess opening theory The strategic variety to be found within this book is staggering from the sedate Symmetrical Variation to the wild gambit lines of the Anti Benoni and almost everything in between Hansen provides detailed coverage of the theory of all lines stemming from 1 c4 c5 including many variations that often arise from different openings entirely such as the SemiTarrasch or when White avoids a Benko or Benoni A particular highlight is the discussion of the Hedgehog which is a popular workhorse for many tournament players as it enables Black to play for a win without taking undue risks Throughout the book Hansen shows that in many lines regarded by a lot of players as boring and uninteresting there is plenty of scope to liven the game up as long as one is familiar with the subtleties

*Playing to Win* Hilary Levey Friedman,2013-08-03 Many parents work more hours outside of the home and their lives are crowded with more obligations than ever before many children spend their evenings and weekends trying out for all star teams traveling to regional and national tournaments and eating dinner in the car while being shuttled between activities In this vivid ethnography based on almost 200 interviews with parents children coaches and teachers Hilary Levey Friedman probes the increase in children s participation in activities outside of the home structured and monitored by their parents when family

time is so scarce As the parental second shift continues to grow alongside it a second shift for children has emerged especially among the middle and upper middle classes which is suffused with competition rather than mere participation What motivates these particular parents to get their children involved in competitive activities Parents primary concern is their children s access to high quality educational credentials the biggest bottleneck standing in the way of or facilitating entry into membership in the upper middle class Competitive activities like sports and the arts are seen as the essential proving ground that will clear their children s paths to the Ivy League or other similar institutions by helping them to develop a competitive habitus This belief motivated both by reality and by perception and shaped by gender and class affects how parents envision their children s futures it also shapes the structure of children s daily lives what the children themselves think about their lives and the competitive landscapes of the activities themselves

### Rebel Queen

Susan Polgar,2025-03-11 A real life Queen s Gambit this captivating memoir tells the story of one of the most renowned women in chess history Susan Polgar taking on a

sexist establishment standing up to an authoritarian empire and rewriting the rules of what women could achieve against the oppressive backdrop of Cold War Eastern Europe Born to a poor Jewish family in Cold War Budapest Susan Polgar would emerge as the one of the greatest female chess players the world had ever seen Susan would become the highest rated female chess player on the planet and the first woman to earn the men s Grandmaster title chess highest designation Still a teenager in 1986 she became the first woman to qualify for the men s World Chess Championship cycle Then she would make history again by becoming the first chess player male or female to achieve the game s triple crown holding World Championship titles in all three major chess time formats blitz rapid and classical and still the only one to earn all 6 of the world s greatest chess crowns triple crown world 1 ranking Individual and Team Olympiad Gold Yet at every turn she was pitted against a sexist culture a hostile Communist government vicious anti Semitism and powerful enemies She endured sabotage and betrayal state sponsored intimidation and violent assault And she overcame all of it to break the game s long standing gender barrier and claim her place at the pinnacle of professional chess After retiring as a player she defied the odds again leaving all she had known in Hungary to start a new life as an American citizen and becoming the only female Division 1 college coach in the country Over her 14 year coaching career she built two separate college chess dynasties from scratch and led them to more national titles world championships major titles and Olympiad medals than all other college chess teams combined Before her improbable rise it was taken for granted that women were incapable of excellence in the game of chess More than question those entrenched beliefs Susan Polgar disproved them single handedly **The Academy**, 1899 Design Unbound: Designing for Emergence in a White Water World, Volume 1 Ann M. Pendleton-Jullian, John Seely Brown, 2018-12-04 Tools for navigating today s hyper connected rapidly changing and radically contingent white water world Design Unbound presents a new tool set for having agency in the twenty first century in what the authors characterize as a white water world rapidly changing hyperconnected and radically contingent These are the tools of a new kind of practice that is the offspring of complexity science which gives us a new lens through which to view the world as entangled and emerging and architecture which is about designing contexts In such a practice design unbound from its material thingness is set free to design contexts as complex systems In a world where causality is systemic entangled in flux and often elusive we cannot design for absolute outcomes Instead we need to design for emergence Design Unbound not only makes this case through theory but also presents a set of tools to do so With case studies that range from a new kind of university to organizational and even societal transformation Design Unbound draws from a vast array of domains architecture science and technology philosophy cinema music literature and poetry even the military It is presented in five books bound as two volumes Different books within the larger system of books will resonate with different reading audiences from architects to people reconceiving higher education to the public policy or defense and intelligence communities The authors provide different entry points allowing readers to navigate their own pathways through the system of books **New Zealand**

**Unleashed** C Murray, Campbell Murray, Steven Carden, 2010-12-01 A futurist's vision for a strong economically successful and positive New Zealand. The future is coming. The question is: are we ready? New Zealand Unleashed is a look at what sort of society New Zealand will need to be to best tackle an unpredictable future. It is about how New Zealand can thrive on the uncertainty of the future rather than fear and resist it. In this book, Steven Carden doesn't outline what New Zealand should do; rather, he argues how New Zealand should be. To accomplish that, he examines aspects of biology, physics, psychology, New Zealand's history, business, and education. New Zealand Unleashed is divided into four parts: Part One: The End of Certainty. Why does the pace of change seem so rampant today? The future so uncertain, and why does that unnerve us so much? Part Two: How to Build a Successful Society. Given that uncertainty and complexity is an increasing fact of life, what are the three key traits that successful societies use to deal with it? Part Three: New Zealand's DNA. Has New Zealand exhibited these three key traits in the past, and what does it tell us about our ability to cope with change and uncertainty in the future? Part Four: A Few Ideas for a More Adaptive New Zealand. How can New Zealand nurture these three key traits to help build a stronger country in the future?
