The Autumn Orange of the Afterthought Ian Wilcox, 2021-01-26 A BOOK MANY THOUGHT IMPOSSIBLE 10 POETS AND ONE THOUSAND PLUS POEMS

Football's Past Revisited Graham Curry, 2024-10-28 This book delves into the complex yet fascinating evolution of football. From a relatively unruly mob game played on festival days, the game was adopted, codified, and civilised by the major English Public Schools and then diffused into the wider society to become a codified modern sports form. The birth of the Football Association in 1863 in London provided compromise rules enabling teams geographically divided by distance and football's differing interpretations to oppose each other, which marked a pivotal moment for the sport. Thereon, history records the establishment of the FA Cup, football's internationalisation, the advent of professionalism, and perhaps finally the establishment of a national league structure, all of these developments originally taking place in the British Isles. Within this multifaceted framework, eminent sociologists and historians have attempted to wrestle with these processes. As a result, over the past two decades, researchers and academics have reached the conclusion that although a solid grounding in the macro history of football is required, testing the existing hypotheses and questions in the early development of the game is best explored by drilling down deeply into local studies using a micro historical approach. Consequently, many of the chapters included in this book on Staffordshire, Norfolk, London, Sheffield, East Lancashire, Rugby School, follow this methodology. This book is an essential read for students, scholars, and academics of sports studies, history, sociology, development, and management, as well as an engrossing read for anyone interested in the early history of football. The chapters in this book were originally published as a special issue of Soccer Society.
