Martin J. Collins, 1999 The space race grew out of the Cold War between the United States and the Soviet Union the most

powerful nations after World War II For a half century they competed for primacy in a global struggle Space was a crucial arena for this rivalry Before a watchful world each side sought to demonstrate its superiority through impressive feats in rocketry and space flight Meanwhile secret satellites were developed to keep a war eye on the adversary At the Cold War s end the United States and Russia agreed to build a space station and pursue other joint ventures in space A contest that had begun in fear and enmity ended in partnership Drawing on recently declassified material and featuring a wide variety of U S and Soviet artifacts Space race examines the spectacular publicly celebrated milestones of our first steps into space as well as highly secret efforts to spy on adversaries from high above the Earth In compelling photographs and terse informed text this book tells the story of time when the superpowers sought to make the heavens inseparable from the earth Space Race Television Sven Grampp,2024-05-23 This volume offers a media theoretically oriented perspective on the Space Race It analyzes feature films documentaries live television coverage magazines stamps posters ticker tape parades They visualized the Space Race in a specific way and circulated it transnationally from East to West and from West to East across the Iron Curtain It will be shown how reporting on the Space Race between 1955 and 1975 can be explained as a globalizing history of the intertwining of images during the Cold War *Asian Space Race: Rhetoric or Reality?* Ajey Lele,2012-10-21 This book explores the character and contours of the Asian Space Powers At present Asian states like China Japan and India are found investing in space technologies with analogous social and scientific and probably with divergent military intents Other Asian states like Israel South Korea and Malaysia are also making investments in the space arena States like Iran and North Korea are faulted for using space launches as a demonstrative tool to achieve strategic objectives This work examines this entire maze of activities to unearth where these states are making these investments to accomplish their state specific goal or are they also trying to surpass each other by engaging in competition Explaining why and how these states are making investments towards achieving their socio economic and strategic mandate this book infers that the possibility of Asian Space Race exists but is presently fairly diminutive The Buzz Aldrin's Race Into Space Companion Fritz Bronner,1993-01 Offers a brief history of the space race and describes rules and strategies for Buzz Aldrin s Race into Space computer game **The Next Space Race** Richard M. Harrison,Peter A. Garretson,2023-03-31 If China s space ambitions continue unchallenged America will be seriously economically and militarily disadvantaged This book provides a comprehensive strategy to secure U S primacy in the space domain From Moon landings to plans for asteroid mining China is beginning to exploit space to achieve its great power ambitions Its strategy could over time severely and adversely impact U S economic and military security The United States needs to structure its approach to space to ensure that it can meet or surpass PRC timelines Authors Richard M Harrison and Peter A Garretson both from the American Foreign Policy Council review the literature on Chinese space ambitions and assess U S space related initiatives across the government military and private sector to understand the maturity of technology available to support space initiatives Their first hand research and findings are

supplemented by interviews with industry experts corporate space leaders and government and military officials The Next Space Race describes and seeks to influence the development of American space policy to ensure the U S industrial base is ready to meet or surpass PRC milestones empower and clarify the mission of the newly minted Space Force provide guidance to NASA and other federal agencies and incentivize private sector companies to contribute to ensuring American space primacy
