Race Over Empire:

Race over Empire Eric T. L. Love, 2005-10-12 Generations of historians have maintained that in the last decade of the nineteenth century white supremacist racial ideologies such as Anglo Saxonism social Darwinism benevolent assimilation and the concept of the white man's burden drove American imperialist ventures in the nonwhite world In *Race over Empire* Eric T. L. Love contests this view and argues that racism had nearly the opposite effect From President Grant's attempt to acquire the Dominican Republic in 1870 to the annexations of Hawaii and the Philippines in 1898 Love demonstrates that the imperialists' relationship with the racist ideologies of the era was antagonistic not harmonious In a period marked by Jim Crow lynching Chinese exclusion and immigration restriction Love argues no pragmatic politician wanted to place nonwhites at the center of an already controversial project by invoking the concept of the white man's burden Furthermore convictions that defined whiteness raised great obstacles to imperialist ambitions particularly when expansionists entered the tropical zone In lands thought to be too hot for white blood white Americans could never be the main beneficiaries of empire What emerges from Love's analysis is a critical reinterpretation of the complex interactions between politics race labor immigration and foreign relations at the dawn of the American century *Race Over Empire* Eric Tyrone Lowery Love, 2004

Race Over Empire Eric Tyrone Lowery Love, 1997 Race Over Party Millington W. Bergeson-Lockwood, 2018-04-13 In late nineteenth century Boston battles over black party loyalty were fights over the place of African Americans in the post Civil War nation In his fresh in depth study of black partisanship and politics Millington W. Bergeson Lockwood demonstrates that party politics became the terrain upon which black Bostonians tested the promise of equality in America's democracy Most African Americans remained loyal Republicans but *Race Over Party* highlights the actions and aspirations of a cadre of those who argued that the GOP took black votes for granted and offered little meaningful reward for black support These activists branded themselves independents forging new alliances and advocating support of whichever candidate would support black freedom regardless of party By the end of the century however it became clear that partisan politics offered little hope for the protection of black rights and lives in the face of white supremacy and racial violence Even so Bergeson Lockwood shows how black Bostonians' faith in self reliance political autonomy and dedicated organizing inspired future generations of activists who would carry these legacies into the foundation of the twentieth century civil rights movement

Dislocating Race and Nation Robert S. Levine, 2009-06-01 American literary nationalism is traditionally understood as a cohesive literary tradition developed in the newly independent United States that emphasized the unique features of America and consciously differentiated American literature from British literature Robert S. Levine challenges this assessment by exploring the conflicted multiracial and contingent dimensions present in the works of late eighteenth and nineteenth century American and African American writers Conflict and uncertainty not consensus Levine argues helped define American literary nationalism during this period Levine emphasizes the centrality of both inter and intra American conflict in

his analysis of four illuminating episodes of literary responses to questions of U S racial nationalism and imperialism He examines Charles Brockden Brown and the Louisiana Purchase David Walker and the debates on the Missouri Compromise Nathaniel Hawthorne Herman Melville and Hannah Crafts and the blood based literary nationalism and expansionism of the mid nineteenth century and Frederick Douglass and his approximately forty year interest in Haiti Levine offers critiques of recent developments in whiteness and imperialism studies arguing that a renewed attention to the place of contingency in American literary history helps us to better understand and learn from writers trying to make sense of their own historical moments American Imperialism and the State, 1893-1921 Colin D. Moore, 2017-04-17 American Imperialism and the State recasts imperial governance as an episode of American state building **Empire's Workshop** Greg Grandin, 2006-05-02 An eye opening examination of Latin America s role as proving ground for U S imperial strategies and tactics In recent years one book after another has sought to take the measure of the Bush administration s aggressive foreign policy In their search for precedents they invoke the Roman and British empires as well as postwar reconstructions of Germany and Japan Yet they consistently ignore the one place where the United States had its most formative imperial experience Latin America A brilliant excavation of a long obscured history *Empire s Workshop* is the first book to show how Latin America has functioned as a laboratory for American extraterritorial rule Historian Greg Grandin follows the United States imperial operations from Thomas Jefferson s aspirations for an empire of liberty in Cuba and Spanish Florida to Ronald Reagan s support for brutally oppressive but U S friendly regimes in Central America He traces the origins of Bush s policies to Latin America where many of the administration s leading lights John Negroponte Elliott Abrams Otto Reich first embraced the deployment of military power to advance free market economics and first enlisted the evangelical movement in support of their ventures With much of Latin America now in open rebellion against U S domination Grandin concludes with a vital question If Washington has failed to bring prosperity and democracy to Latin America its own backyard workshop what are the chances it will do so for the world *Race, Nation, and Capital in the Modern World* Philip Y. Nicholson, 2023-03-17 *Race Nation and Capital in the Modern World* is a comprehensive yet concise book that traces the history of racism nationalism and capitalism from their combined origins at the end of the fifteenth century to the present This book describes the development of legal codes and institutional practices that brought vast wealth and power to their chief beneficiaries along with great suffering exploitation and destruction to its victims Instead of understanding racism as an aberration or dark flaw in the troubled past of a world power like the United States this synthesis places race and racism in the forefront of the unfolding history of nationalism and capitalism The work de emphasizes the uniqueness of each nation s particular experience by showing the interdependence of capitalist and racist practices The narrative follows the leading hegemonic national powers as they expanded from mercantile conquests through plantation enslavement massive displacement of populations colonialism global warfare and finally the tenacious contemporary aftermath There are no comparable surveys

for undergraduates or general readers seeking a unified historical understanding of these primary drivers of modernity It is a provocative introductory guide and not a work of political theory This volume will appeal to students scholars and those interested in studies on racism race capital the history of inequality and human and civil rights

Joint Ventures M. D. Litonjua, 2012-10 Joint Venture s is a term used in the business world to describe two or more business enterprises that join hands and consolidate their management operations and labor force to increase their productivity to offer a more diversified array of products to increase their profitability and be a more successful business enterprise in service to their employees and society at large But it is not simply a matter of joining economic forces and resources There has to be synergy compatibility and complementarity in

corporate strengths and weaknesses in corporate missions and cultures in corporate objectives and strategies such that the joint venture s result s in something greater than the mere sum of their parts This is true of joint venture s in the academic world Interdisciplinary studies are not mere combinations of academic courses They are or should be the mutual enrichment and mutual correction of disciplines They can be and are about expanding the horizons of a discipline beyond its narrow confines and or correcting the constricting assumptions values and prescriptions of doctrinaire theoretical viewpoints These have been the basic assumption and the goal the working framework and agenda behind the essays gathered here as they were in my earlier collections *Critical Intersections* 2006 and *Creative Fractures* 2011 In my teaching and writing I seek to bring to bear insights and perspectives from religious studies and the social sciences their critical intersections their creative fractures and their joint ventures to elucidate discussions controversies and explanations *Building Character* Charles L. Davis II, 2019-09-06 In the nineteenth century paradigm of architectural organicism the notion that buildings possessed character provided architects with a lens for relating the buildings they designed to the populations they served Advances in scientific race theory enabled designers to think of race and style as manifestations of natural law just as biological processes seemed to inherently regulate the racial characters that made humans a perfect fit for their geographical contexts architectural characters became a rational product of design Parallels between racial and architectural characters provided a rationalist model of design that fashioned some of the most influential national building styles of the past from the pioneering concepts of French structural rationalism and German tectonic theory to the nationalist associations of the Chicago Style the Prairie Style and the International Style In *Building Character* Charles Davis traces the racial charge of the architectural writings of five modern theorists Eugene Emmanuel Viollet le Duc Gottfried Semper Louis Sullivan Frank Lloyd Wright and William Lescaze to highlight the social political and historical significance of the spatial structural and ornamental elements of modern architectural styles [The Ashgate Research Companion to Modern Imperial Histories](#) John Marriott, 2016-03-23 Written by leading scholars this collection provides a comprehensive and authoritative overview of modern empires Spanning the era of modern imperial history from the early sixteenth century to the present it challenges both the rather insular focuses on specific experiences and gives due attention to imperial formations outside the West including the Russian Japanese Mughal Ottoman and Chinese The companion is divided into three broad sections Part I Times surveys the three main eras of modern imperialism The first was that dominated by the settlement impulse with migrants many voluntarily and many more by force making new lives in the colonies This impulse gave way most especially in the nineteenth century to a period of busy and rapid expansion which was less likely to promote new settlement and in which colonists more frequently saw their sojourn in colonial lands as temporary and related to the business mostly of governance and trade Lastly in the twentieth century in particular empires began to fail and to fall Part II Spaces studies the principal imperial formations of the modern world Each chapter charts the experience of a specific empire while at the same time placing it within the complex

patterns of wider imperial constellations The individual chapters thus survey the broad dynamics of change within the empires themselves and their relationships with other imperial formations and reflect critically on the ways in which these topics have been approached in the literature In Part III Themes scholars think critically about some of the key features of imperial expansion and decline These chapters are brief and many are provocative They reflect the current state of the field and suggest new lines of inquiry which may follow from more comparative perspectives on empire The broad range of themes captures the vitality and diversity of contemporary scholarship on questions of empire and colonialism encompassing political economic and cultural processes central to the formation and maintenance of empires as well as institutions ideologies and social categories that shaped the lives both of those implementing and those experiencing the force of empire In these pages the reader will find the slave and the criminal the merchant and the maid the scientist and the artist alongside the structures which sustained their lives and their livelihoods Overall the companion emphasises the diversity of imperial experience and process Comprehensive in its scope it draws attention to the particularities of individual empires rather than over generalising as if all empires at all times and in all places behaved in a similar manner It is this contingent and historical specificity that enables us to explore in expansive ways precisely what constituted the modern empire

Science, Sexuality, and Race in the United States and Australia, 1780–1940 Gregory D. Smithers, 2017-07 Science Sexuality and Race in the United States and Australia 1780 1940 Revised Edition is a sociohistorical tour de force that examines the entwined formation of racial theory and sexual constructs within settler colonialism in the United States and Australia from the Age of Revolution to the Great Depression Gregory D Smithers historicizes the dissemination and application of scientific and social scientific ideas within the process of nation building in two countries with large Indigenous populations and shows how intellectual constructs of race and sexuality were mobilized to subdue Aboriginal peoples Building on the comparative settler colonial and imperial histories that appeared after the book's original publication this completely revised edition includes two new chapters In this singular contribution to the study of transnational and comparative settler colonialism Smithers expands on recent scholarship to illuminate both the subject of the scientific study of race and sexuality and the national and interrelated histories of the United States and Australia

The Picky Eagle Richard W. Maass, 2020-05-15 *The Picky Eagle* explains why the United States stopped annexing territory by focusing on annexation s domestic consequences both political and normative It describes how the US rejection of further annexations despite its rising power set the stage for twentieth century efforts to outlaw conquest In contrast to conventional accounts of a nineteenth century shift from territorial expansion to commercial expansion Richard W Maass argues that US ambitions were selective from the start By presenting twenty three case studies Maass examines the decision making of US leaders facing opportunities to pursue annexation between 1775 and 1898 US presidents secretaries and congressmen consistently worried about how absorbing new territories would affect their domestic political influence and their goals for their country These leaders were particularly sensitive to annexation s domestic costs where xenophobia interacted with their commitment to democracy rather than grant political representation to a large alien population or subject it to a long term imperial regime they regularly avoided both of these perceived bad options by rejecting annexation As a result US leaders often declined even profitable opportunities for territorial expansion and they renounced the practice entirely once no desirable targets remained In addition to offering an updated history of the foundations of US territorial expansion *The Picky Eagle* adds important nuance to previous theories of great power expansion with implications for our understanding of US foreign policy and international relations

Taming Cannibals Patrick Brantlinger, 2011-09-16 In *Taming Cannibals* Patrick Brantlinger unravels contradictions embedded in the racist and imperialist ideology of the British Empire For many Victorians the idea of taming cannibals or civilizing savages was oxymoronic civilization was a goal that the nonwhite peoples of the world could not attain or at best could only approximate yet the civilizing mission was viewed as the ultimate justification for imperialism Similarly the supposedly unshakeable certainty of Anglo Saxon racial superiority was routinely undercut by widespread fears about racial degeneration through contact with lesser races or concerns that Anglo Saxons might be superseded by something superior an even fitter or higher race or species Brantlinger traces the development of those fears through close readings of a wide range of texts including *Robinson Crusoe* by Daniel Defoe *Fiji and the Fijians* by Thomas Williams *Daily Life and Origin of the Tasmanians* by James

Bonwick The Descent of Man by Charles Darwin Heart of Darkness by Joseph Conrad Culture and Anarchy by Matthew Arnold She by H Rider Haggard and The War of the Worlds by H G Wells Throughout the wide ranging capacious and rich Taming Cannibals Brantlinger combines the study of literature with sociopolitical history and postcolonial theory in novel ways

Racial Difference and the Colonial Wars of 19th Century Southeast Asia Farish Ahmad-Noor, Peter-Brian Ramsay Carey, 2025-10-01 The colonisation of Southeast Asia was a long and often violent process where numerous military campaigns were waged by the colonial powers across the region The notion of racial difference was crucial in many of these wars as native Southeast Asian societies were often framed in negative terms as savage and backward communities that needed to be subdued and civilised This collection of critical essays focuses on the colonial construction of race and looks at how the colonial wars in 19th century Southeast Asia were rationalised via recourse to theories of racial difference making race a significant factor in the wars of Empire Looking at the colonial wars in Java Borneo Siam the Philippines the Malay Peninsula and other parts of Southeast Asia the essays examine the manner in which the idea of racial difference was weaponised by the colonising powers and how forms of local resistance often worked through such colonial structures of identity politics

Dangerous Intercourse Tessa Winkelmann, 2023-01-15 In Dangerous Intercourse Tessa Winkelmann examines interracial social and sexual contact between Americans and Filipinos in the early twentieth century via a wide range of relationships from the casual and economic to the formal and long term Winkelmann argues that such intercourse was foundational not only to the colonization of the Philippines but also to the longer uneven history between the two nations Although some relationships between Filipinos and Americans served as demonstrations of US benevolence too close sexual relations also threatened social hierarchies and the so called civilizing mission For the Filipino Indigenous Moro Chinese and other local populations intercourse offered opportunities to negotiate and challenge empire though these opportunities often came at a high cost for those most vulnerable Drawing on a multilingual array of primary sources Dangerous Intercourse highlights that sexual relationships enabled US authorities to police white and nonwhite bodies alike define racial and national boundaries and solidify colonial rule throughout the archipelago The dangerous ideas about sexuality and Filipina women created and shaped by US imperialists of the early twentieth century remain at the core of contemporary American notions of the island nation and indeed of Asian and Asian American women more generally
