Racing Dragsters:

Tales from a Top Fuel Dragster Shirley Muldowney, 2013-11-01 Shirley Muldowney not only broke the gender barrier in the National Hot Rod Association in the 1970s but she also completely rewrote the record books in Top Fuel Eliminator drag racing's quickest and fastest category. She was the first woman to receive a Top Fuel license from the NHRA. Between 1977 and 1982 Muldowney won three NHRA Top Fuel championships, the first female ever to win a title in any professional motorsport. She won the prestigious NHRA US Nationals in 1982 and was recently inducted into the International Motorsports Hall of Fame. By the time she retired at the end of the 2003 season, Muldowney had become one of the most recognized and celebrated race car drivers in history. *Tales from a Top Fuel Dragster* is an unabashed collection of stories, anecdotes, and opinions in Muldowney's own unvarnished style of storytelling, laced with her straightforward take-no-prisoners approach. She has spent her entire lifetime telling it like it is, standing up to the establishment and refusing to do anything other than in her own way. Politically correct? Hardly. Readers are encouraged to strap themselves in when she shares her many tales. It's the whole truth and nothing but the truth, according to the legendary Shirley Muldowney. [Top Fuel Dragsters](#) Denny Von Finn, 2007-08-01 Top Fuel drivers and their cars race one on one in a straight line. Drag racing is one of the most popular forms of auto racing, and Top Fuel dragsters are the fastest dragsters around. Young readers will explore the technology that enables a Top Fuel dragster to travel faster than 330 miles per hour. *Top Fuel Dragsters: Drag Racing's Rear-Engine Revolution* Steve Reyes, 2016 In general terms, drag racing is the fastest form of motor racing within drag racing. Top Fuel is the fastest of the classes. Top Fuel has always been the leading class in terms of technology, cost, excitement, and speed. Over the years, technology has changed greatly. What started out as a flathead engine, four wheels, frame rails, and a steering wheel has morphed into technological wonders producing horsepower figures in the thousands and running supercharged nitromethane cars over the quarter mile in the 4-second range. Industry legend and veteran journalist Steve Reyes was there through all the technological changes; he has the photos, anecdotes, quotes, and tales of the era. He discusses it all, including the experimentation that led to incredibly exciting racing and wild mishaps. Join him in the pages of this book where he shares all the stories of this incredible racing era. *Drag Racing's Exhibition Attractions* Lou Hart, Cory Lee, 2008-05-15 This book showcases photographically the wide variety of cars and drivers that fit into the exhibition theme: the jets, wheelstanders, rockets, and other exhibition vehicles which have thrilled millions of spectators. Their entire basis was who had the fastest vehicle. But in 1959, complaints from other competitors and Detroit automakers got all aircraft-powered dragsters banned, so they became the sideshow attached to the legitimate circus that is drag racing. The Green Monster became the first exhibition car exceeding 200 mph everywhere it ran. Wanting even more, Walt Arfons debuted the first jet-powered dragster, which became the desire of every fan and promoter throughout the country. At virtually the same instant, Tom Ivo had Kent Fuller build a four-engine dragster, and although it was too heavy to be competitive, the tire smoke show

became arguably the most famous exhibition car in history See Bill Maverick Golden and the Little Red Wagon Wild Bill Shrewsberry s and the Hurst Hemi Under Glass LA Dart and Knott s Berry Wagon Chuck Poole and his Chuckwagon Doug Rose and The Green Mamba plus many more

Drag Racing in the 1960s Doug Boyce,2021-03-15 The 1960s were a fascinating decade on the race scene Relive the memories today through this wonderful new book Drag racing has a long and storied history Many have said that the first drag race happened shortly after the second car was made While that may or may not be true racing prior to World War II was mostly centered around dry lake activities and top speed runs After the war drag racing became organized with the formation of the NHRA and during the 1950s many tracks were built across America to accommodate the racers Technology in the 1950s centered on the manufacturers updating old flathead designs into newer overhead valve designs and the horsepower race really started to heat up In many forms of racing the 1960s brought technological evolution The decade began with big engines in even bigger stock chassis and ended with purpose built race only chassis fiberglass bodies fuel injection nitro methane and blowers Quarter mile times that were in the 13 second range in the beginning of the decade were in the 7 second range by the end New classes were formed dedicated cars were built for them and many racers themselves became recognized names in the sports landscape In Drag Racing in the 60s The Evolution in Race Car Technology veteran author Doug Boyce takes you on a ride through the entire decade from a technological point of view rather than a results based one Covered are all the classes including Super Stocks Altered Wheelbase cars which led to Funny Cars Top Fuelers Gassers and more
