[Choice and conscience: Lessons from South Africa for a global debate](#) Satang Nabaneh, 2023-11-08 Choice and Conscience offers a fresh and insightful perspective on the highly debated issue of conscientious objection in abortion care Satang Nabaneh's socio-legal approach which draws on both traditional legal scholarship and African feminist intellectual traditions provides a nuanced understanding of how legal norms construct and maintain power relations By focusing on the experiences of nurses in South Africa Nabaneh explores the complexities of conscience discretionary power and socio-cultural and political factors that influence nurses' decisions about whether or not to conscientiously object In the wake of the recent rollback of abortion rights in the United States and the

trend towards liberalisation within the African region Nabaneh provides an important African perspective on how the international human rights framework should strike a contextual balance between freedom of conscience and ensuring access to abortion Choice and Conscience will interest lawyers activists policymakers scholars and students exploring the dynamic intersections of law healthcare and gender politics Choice and Conscience stands as a significant and valuable addition to the ongoing global scholarship on this critical issue It underscores the vital concept that intersectionality should occupy a central place in our examination of how various local contexts give rise to layered forms of privilege and disadvantage Dr Tlaleng Mofokeng UN Special Rapporteur on the right to health Nabaneh s study of law in action zeros in on South African nurses gatekeepers who often object to the practice for reasons of conscience Her interviews of these nurses and her analysis complicate our understanding of challenges to abortion access providing lessons applicable not only to South Africa and other African countries but everywhere where there is a gap between formal law and its application Mindy Jane Roseman JD PhD Yale Law School Written from an African feminist perspective this book offers fresh insights into our understanding of the intersection between politics mobilisation of discretionary power and the exercise of conscientious objection to abortion by mid level providers Charles Ngwenya Professor of Law Centre for Human Rights University of Pretoria This book offers powerful insights about how informal and background norms in health systems function constrain or enable reproductive justice Focusing on conscientious objection to abortion by nurses including midwives in South Africa Nabaneh sketches the importance of a feminist analysis that is situated in Africans lived realities Alicia Ely Yamin Harvard University Feminist Judgments of Aotearoa New Zealand Elisabeth McDonald,Rhonda Powell,Mamari Stephens,Rosemary Hunter,2017-11-30 This edited collection asks how key New Zealand judgments might read if they were written by a feminist judge Feminist judging is an emerging critical legal approach that works within the confines of common law legal method to challenge the myth of judicial neutrality and illustrate how the personal experiences and perspectives of judges may influence the reasoning and outcome of their decisions Uniquely this book includes a set of cases employing an approach based on mana wahine the use of Maori values that recognise the complex realities of Maori women s lives Through these feminist and mana wahine judgments it opens possibilities of more inclusive judicial decision making for the future This Project stops us in our tracks and asks us how could things have been different At key moments in our legal history what difference would it have made if feminist judges had been at the tiller By doing so it raises a host of important questions What does it take to be a feminist judge Would we want our judges to be feminists and if so why Is there a uniquely female perspective to judging Professor Claudia Geiringer Faculty of Law Victoria University of Wellington With this book some of our leading jurists expose the biases and power structures that underpin legal rules and the interpretation of them Some also give voice to mana wahine perspectives on and about the law that have become invisible over time perpetuating the impacts of colonialism and patriarchy combined on Maori women I hope this book will be a catalyst for our nation to better

understand and then seek to ameliorate these impacts Dr Claire Charters Associate Professor Faculty of Law University of Auckland The work is highly illuminating and is critical to the development of our legal system It is crucial not only for legal education so that students of the law open their minds to the different ways legal problems can be conceptualised and decided It is also crucial if we are going to have a truly just legal system where all the different voices and perspectives are fairly heard Professor Mark Henaghan Dean of the Faculty of Law University of Otago I believe this project is particularly important as few academics or researchers in New Zealand concentrate on judicial method I am therefore hopeful that it will provoke thoughtful debate in a critical area for society The Honourable Justice Helen Winkelmann New Zealand Court of Appeal

**The Regulation of Medical Products** Penny Gleeson, 2024-12-31 This book develops a theoretical framework for examining and assessing the regulatory arrangements for medical products Since the first half of the 20th century the regulation of pharmaceuticals medical devices and more recently biologicals have been controlled in many jurisdictions by specific regulatory regimes and agencies Their regulatory mandates are similar to ensure the quality safety and efficacy of medical products This book provides a timely and relevant assessment of the complexities of medical regulatory regimes by drawing on a particular theory of political legitimacy In this respect the book adopts a dialogic approach according to which a shared set of normative beliefs and values are formulated as a theoretical tool to identify deficiencies in the regulatory arrangements for medical products Drawing on several Australian cases studies characterised by divergent normative perspectives the book develops its dialogic approach in order to challenge the usual legitimisation of regulatory regimes from the perspective of science alone Specifically it maintains that such regimes need to embrace a normative pluralism that admits a diversity of types and sources of knowledge This evaluation of the increasingly influential domain of medical regulation will appeal to a range of scholars and practitioners working in law public health politics and science and technology studies
