GloBE Rules Made Easy Kuldeep Sharma, 2022-12-09 Worldwide implementation of the OECD's Global Anti Base Erosion Rules GloBE Rules published in December 2021 promises to strike a powerful blow at the tax avoidance rampantly indulged in by many multinational corporations since global minimum tax rate of 15% in all countries is expected to curb shifting of profits from higher tax jurisdiction to lower tax jurisdiction or tax havens As Inclusive Framework IF Member jurisdictions prepare to implement legislation the tax law community worldwide can turn to this extraordinarily practical self contained book for a complete understanding of the background and attributes of the Rules The book includes such features as the following text of each of the Rules ten chapters including all forty nine articles along with both summary and detailed description explanations of the Commentary and Illustrative Examples released by the OECD in March 2022 numerous flowcharts tables boxes illustrations and figures elaborate technical discussions amidst specific policy considerations analysis of IF Member jurisdictions regarding key parameters with suitable recommendations GloBE Rules at a Glance checklist encapsulating the features and application of the Rules in the form of FAQs and implementation processes under way in ten representative jurisdictions The various publications and releases by the OECD up to 31 May 2022 are considered and duly explained In the struggle to curb harmful tax competition and aggressive tax planning it is possible that the GloBE Rules will at last succeed in creating a level playing field in the realm of taxation And given that OECD guidance and tax expert analysis may not suffice to fully comprehend the complexity of the Rules this book will prove of enormous value among a wide array of stakeholders including taxation authorities tax advisors and lawyers and academics Also multinational enterprises will get enough information to derive maximum benefits in terms of their preparedness readiness and responses to implementation of the Rules

Transfer Pricing in SMEs Veronika Solilova, Danuse Nerudova, 2017-10-31 This book provides a detailed assessment of current approaches to transfer pricing in the context of small and middle sized enterprises SMEs including the newest update of Transfer Pricing Guidelines from 10 July 2017 It analyzes the transfer pricing rules for SMEs across the European Union EU and explores two alternative approaches as suitable solutions for current transfer pricing issues The authors evaluate and discuss alternative approaches like Safe Harbour and Common Consolidated Corporate Tax Base CCCTB Taking into account the prominent role of SMEs in the European Union's economy the book also puts forward policy recommendations to achieve the long term goals of the EU's 2020 agenda

Selectivity in State Aid Law and the Methods for the Allocation of the Corporate Tax Base Jérôme Monsenego, 2018-06-05 High profile cases before the European Commission and the EU courts have intensified scrutiny of the link between State aid law and the taxation of multinational enterprises Certain decisions have raised questions about fiscal sovereignty and the interpretation of the rules on State aid in particular the notion of selectivity which have not been addressed in detail by existing research The combination of the evolution of the notion of selectivity in State aid law on the one hand and the need to adapt the rules for the taxation of the profits of multinational enterprises to the modern economy on the other hand makes it necessary to assess

whether existing as well as alternative rules for the allocation of the corporate tax base might entail a selective treatment. This book responds to the need of research in the area of State aid law applied to the taxation of the income of multinational enterprises focusing on the crucial concept of selectivity. The analysis proceeds with a detailed investigation of the theoretical issues that arise when applying the selectivity test in State aid law to three methods for the allocation of the corporate tax base between the members of multinational enterprises: the arm's length principle, transfer pricing, safe harbours and systems of formula apportionment. This research project is conducted at a theoretical level without considering national provisions or particular tax treaties. The author suggests an analytical framework on the application of the selectivity test to the three allocation methods. It is concluded that these methods are likely to have certain selective features with varying possibilities to be justified by the inner logic of a corporate income tax system. It is also demonstrated that selectivity occurs for different reasons due to the different rationales of the three allocation methods. This book is intended at contributing to the academic literature on the impact of State aid law on the principles for the taxation of the income of multinational enterprises. The outcome of this research project is also relevant for lawmakers who need to reconcile the imperatives of State aid law with the design of rules that match their tax policies as well as for judges or lawyers who apply the rules on State aid to tax provisions.
