prevention and control pre-service education and training curriculum World Health Organization, 2025-05-02 The WHO Infection Prevention and Control IPC Pre Service Curriculum provides foundational learning content for all future health and care workers. It equips students across health disciplines with essential IPC knowledge, skills, and competencies supporting safer care delivery, preventing health care associated infections, and combating antimicrobial resistance. This curriculum serves as a flexible, adaptable guide that can be added to existing educational curricula aimed to strengthen health systems worldwide.

Infection prevention and control in-service education and training curriculum World Health Organization, 2024-05-17 The primary objective of this curriculum is to equip health and care workers with the essential knowledge and competencies necessary for delivering safe and effective care. By doing so, it aims to significantly reduce HAIs and combat antimicrobial resistance, thereby safeguarding both patient and HCWs' well-being. This curriculum is developed to meet the needs of IPC professionals responsible for developing learning resources and overseeing training within health care organizations. Moreover, the curriculum is intended to encompass all individuals involved in health care delivery and support. This holistic approach includes a wide range of staff, ranging from clinical workers to administrative and auxiliary services, thus ensuring a broad and inclusive approach to IPC training. The guide is designed to be flexible, allowing for adaptation to various educational and practical contexts to meet specific national and local IPC requirements and policies. It delineates three distinct competency levels within the curriculum: foundational introduces basic IPC principles applicable universally across all health and care worker roles; intermediate delivers more detailed IPC practices, particularly for clinical practitioners in direct contact with patients; advanced provides specialized IPC knowledge tailored for clinical specialists and managerial roles, reflecting the specific needs of their positions and settings. This curriculum serves as an essential reference tool to support the planning, development, and localization of IPC education materials, aligning closely with the WHO core components for IPC programmes and the directions provided within the WHO global strategy and action plan on IPC. It supports countries in their efforts to implement actions to improve IPC knowledge and skills among health and care workers according to the recommendations in the WHO global action plan and monitoring framework. By enhancing the IPC competencies of health and care workers, this guide supports the capacity of the health care system to effectively manage and prevent infections, which is particularly crucial in improving patient outcomes and promoting safer health care environments, including in the context of epidemics, pandemics, and other public health emergencies.
