The Routledge Companion to Contemporary Art, Visual Culture, and Climate Change T. J. Demos, Emily Eliza Scott, Subhankar Banerjee, 2021-02-26. International in scope, this volume brings together leading and emerging voices working at the intersection of contemporary art, visual culture, activism and climate change and addresses key questions such as why and how do art and visual culture and their ethics and values matter with regard to a world increasingly shaped by climate breakdown. Foregrounding a decolonial and climate justice based approach, this book joins efforts within the environmental humanities in seeking to widen considerations of climate change as it intersects with social, political and cultural realms. It simultaneously expands the nascent branches of ecocritical art history and visual culture and builds toward the advancement of a robust and critical interdisciplinarity appropriate to the complex entanglements of climate change. This book will be of special interest to scholars and practitioners of contemporary art and visual culture, environmental studies, cultural geography and political ecology.
