The first considers different ways of theorising about gender and the relative impact of this on thinking about crime and criminal victimisation the second considers some of the evidence in relation to people s gendered experiences of crime and criminal victimisation the third considers how those working within the criminal justice system and the policies that are put in place work to sustain or change those experiences of crime and criminal victimisation in relation to gender Security: Welfare, Crime And Society Cochrane, Allan, Talbot, Deborah, 2008-10-01 Why is the concept of security so important in modern society Why do people and governments invest so much in the pursuit of different forms of security How do we make sense of the changing nature of the relationship between security and insecurity This book focuses on the concept of security as an idea an ideal and a practice and explores the ways in which it can shed light on the relationship between welfare and crime and the ambiguities that arise from them The authors investigate these issues by examining particular areas of social life and policy development with a focus that ranges from global to local and neighbourhood concerns The book is integrated with engaging activities such as case studies review and reflection sections Adopting an inter disciplinary approach to explore criminological and social policy perspectives the chapters reflect the increasingly blurred area between social and crime control policy and the way in which it is managed The contributors delve into the consequences and implications of policies and practices aimed at creating security which can all too often have the opposite effect Security is key reading for students in criminology social policy and social justice Crime, Genes, Neuroscience and Cyberspace Tim Owen, 2017-09-18 This book applies Owen's unique genetic social

framework to the study of crime and criminal behaviour with an emphasis on cybercrime Moving beyond challenges which confront contemporary criminological theorizing such as the stagnation of critical criminology the relativistic nihilism of the cultural turn posthumanism and virtual criminology the author codifies and applies the latest version of the framework to the study of crime both in and out of cyberspace Drawing upon evolutionary psychology behavioural genetics and the philosophy of Heidegger he introduces new terms such as Neuro Agency and notions of Embodied Cognition into criminological theorizing Adopting a soft compatibilist approach to free will and Realist ontology Owen's meta theoretical focus provides a new direction for criminological theorizing in particular in the direction of the conceptualization and prediction of cyber violence Exciting and timely this book will appeal to scholars and advanced students of criminology law sociology social policy psychology philosophy policing and forensic investigation **Criminological Theory** T.
