A Concordance to the Poems of Robert Herrick, **Rural Space in the Middle Ages and Early Modern Age** Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized

studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

Saint Ben John Fischer, 1993

The Mind in Another Place Luke Timothy Johnson, 2022-03-22 A witness to the peculiar way of being that is the scholar's. Luke Timothy Johnson is one of the best known and most influential New Testament scholars of recent decades. In this memoir he draws on his rich experience to invite readers into the scholar's life: its aims, commitments, and habits. In addition to sharing his own story from childhood to retirement, Johnson reflects on the nature of scholarship more generally, showing how this vocation has changed over the past half century and where it might be going in the future. He is as candid and unsparing about negative trends in academia as he is hopeful about the possibilities of steadfast, disciplined scholarship. In two closing chapters he discusses the essential intellectual and moral virtues of scholarly excellence, including curiosity, imagination, courage, discipline, persistence, detachment, and contentment. Johnson's robust defense of the scholarly life portrayed throughout this book as a generative process of discovery and disclosure will inspire both new and seasoned scholars as well as anyone who reads and values good scholarship. But *The Mind in Another Place* ultimately resonates beyond the walls of the academy and speaks to matters more universally human: the love of knowledge and the lifelong pursuit of truth.
