Product Photography Nath-Sakura, 2022-10-07

Learn to master lighting and composition in order to create amazing product shots. Whether you're photographing a bottle of wine or a painting, a pair of shoes or a piece of jewelry, successful product photography first requires a thorough knowledge of light. You need to fully understand how light works, angles, reflectance, quantity, quality, shadows, and more, as well as how it interacts with the materials, shapes, surfaces, and textures you're photographing. Once you know where to place the light and how to shape it, along with key compositional and photographic techniques, you can create beautiful photographs of any product or object you encounter. Of all the photographic genres, product photography requires the most precision, a consistent workflow, and a deep knowledge of optics. While this may seem daunting, anyone can learn to take great product photographs with photographer Nath Sakura's *Product Photography: Lighting, Composition, and Shooting Techniques*. Filled with inspiring and beautiful imagery, this book features a wide variety of products with diverse characteristics that will help you learn to tackle any challenge. **Textual Transformations in Children's Literature** Benjamin Lefebvre, 2013

This book offers new critical approaches for the study of adaptations, abridgments, translations, parodies, and mash ups that occur internationally in contemporary children's culture. It follows recent shifts in adaptation studies that call for a move beyond fidelity criticism, a paradigm that measures the success of an adaptation by the level of fidelity to the original text, toward a methodology that considers the adaptation to be always already in conversation with the adapted text. This book visits children's literature and culture in order to consider the generic, pedagogical, and ideological underpinnings that drive both the process and the product. Focusing on novels as well as

folktales films graphic novels and anime the authors consider the challenges inherent in transforming the work of authors such as William Shakespeare Charles Perrault L M Montgomery Laura Ingalls Wilder and A A Milne into new forms that are palatable for later audiences particularly when for perceived ideological or political reasons the textual transformation is not only unavoidable but entirely necessary Contributors consider the challenges inherent in transforming stories and characters from one type of text to another across genres languages and time offering a range of new models that will inform future scholarship *Japanese-English and English-Japanese Dictionary* by J.
