## **Salinity Crisis Landscapes Communities And Politics:**

**The Salinity Crisis** Quentin Beresford,2001 Focuses on dryland salinity in W A s wheatbelt     [Irrigation, Salinity, and Rural Communities in Australia's Murray-Darling Basin, 1945-2020](#) Daniel Rothenburg,2023-01-13 This book explores the issue of salinization in the context of contemporary conflicts about irrigation water and the environment in Australia considering the Murray Darling Basin in particular It provides an environmental and social history charting the transformation of rural communities in the basin through the salinization of soils and water Focusing on the Goulburn Murray Irrigation district in the southwest of the Murray Darling basin the largest irrigation district in Australia it explores the history of state directed large scale engineering in the district where the environment has been altered dramatically to facilitate white agricultural settlement inland Changes to the landscape led to extensive salinization however a significant environmental threat in Australia This book traces the impact of these changes on rural communities taking a bottom up approach highlighting the connections between environmental social and political change It provides an important reflection on the importance of environmental history for facing the challenges posed by anthropogenic climate change     [Water](#)

**Politics in the Murray-Darling Basin** Daniel Connell,2007 In January 2007 the Australian Prime Minister John Howard announced a 10 billion plan to reform rural water management Most of the effort will focus on the Murray Darling Basin In this book Daniel Connell explains why there is a crisis in the Murray Darling He highlights the disastrous consequences of a century of fitful reluctant co operation between the six governments responsible for the region Connell argues that a new institutional system is essential but a Commonwealth takeover is not the best answer Instead the Commonwealth government should use its constitutional and financial power to force the States to adopt national policies and stick to them whatever the local politics The States would continue to play a substantial role but the controls would be tighter the framework more comprehensive He also shows how the National Water Initiative the great blueprint for water reform has stalled with many of its most important recommendations ignored So far the public debate about the future of the Murray Darling Basin has concentrated on new technical projects and increased water trading Connell argues that unless institutional change is given priority hundreds of millions of dollars of annual investment will be frittered away and the crisis will continue     [Green Urbanism Down Under](#)

**Timothy Beatley,Peter Newman,2012-09-26** In this immensely practical book Timothy Beatley sets out to answer a simple question what can Americans learn from Australians about greening city life Green Urbanism Down Under reports on the current state of sustainability practice in Australia and the many lessons that U S residents can learn from the best Australian programs and initiatives Australia is similar to the United States in many ways especially in its energy footprint For example Australia s per capita greenhouse gas emissions are second only to those of the United States A similar percentage of its residents live in cities 85 percent in Australia vs 80 percent in the United States And it suffers from parallel problems of air and water pollution a national dependence on automobiles and high fossil fuel consumption Still after

traveling throughout Australia Beatley finds that there are myriad creative responses to these problems and that they offer instructive examples for the United States Green Urbanism Down Under is a very readable collection of solutions Although many of these innovative solutions are little known outside Australia they all present practical possibilities for U S cities Beatley describes green transport projects city farms renewable energy plans green living programs and much more He considers a host of public policy initiatives and scrutinizes regional and state planning efforts for answers In closing he shares his impressions about how Australian results might be applied to U S problems This is a unique book hopeful constructive and filled with ideas that have been proven to work It is a must read for anyone who cares about the future of American cities
