Shanghai Revolution And Development In An Asian Metropolis:

Shanghai Christopher Howe,1981-05-07 This book is a comprehensive study of the way in which old Shanghai was transformed and developed by the Communist Party between 1949 and the later 1970s *China's Urban Future and the Quest for Stability* Rebecca Clothey,Richardson Dilworth,2020-04-16 In recent decades China has used urbanization as an economic development tool to reconstruct the country s traditional institutions culture and society The downside of these many changes is that they have presented the country s government with a massive challenge how can it maintain basic stability China s Urban Future and the Quest for Stability examines the complexities of Chinese cities Together the essays in this book explore how the relatively recent onset of urbanization has altered the country and how that experience is similar to and distinct from developments in other times and places Each chapter analyzes one facet of China s transformation focusing on three main themes urbanization and the rapid growth of Chinese cities mobility in both the abstract and the literal sense and marginalization evidenced by growing residential segregation in cities and diminishing access to education health care and jobs Underlying these themes is the issue of governance the systems by which a state attempts to maintain control and achieve its ends often in ways that differ significantly from what one might expect An up to date concise and multidisciplinary collection China s Urban Future and the Quest for Stability discusses the social economic and political forces at work in the urbanization of a modern superpower Shanghai Yue-man Yeung,1996 As China s largest city best known for its pre eminent achievements in the early part of the twentieth century Shanghai grew modestly in comparison with southern China after the adoption of China s open policy in 1978 With the 1990 announcement of Pudong as an area for special development Shanghai has raced ahead seemingly on its way to an economic and cultural resurgence that is likely to accelerate development and modernization in the Yangzi Delta and China at large This volume focuses on the physical and socioeconomic transformation of Shanghai across a wide range of topics Drawing on the experience and expertise of researchers primarily in Hong Kong this study is a major contribution to the subject of economic development and social change in China It seeks to understand analyze and interpret how Shanghai has transformed itself in recent years **Urban Growth and Development in Asia** Graham P. Chapman,Ashok K. Dutt,2019-01-15 First published in 1999 this volume begins with a panoramic survey by Nigel Harris of the drama of Asian Urbanization based on the inaugural plenary lecture he gave to the 5th Asian Urbanization Conference held in London In the following chapters many experts and practitioners from different countries and cities provide a stimulating portrayal of the processes and outcomes of one of the greatest shifts of population not just absolutely but proportionately as well ever to have occurred in human history Asia includes more than half the world s population but apart from the Tiger economies and Japan it is still overwhelmingly rural In the last decade or so urbanization has really begun to take off and the shift of population to the cities represents one of the greatest population movements the planet has ever seen By 2030 more than 50% of Asia s population will be urban and between now and then

more than 500 million people in Asia will have moved looking for jobs housing food and water They will be both part of a problem and most of the solution building around them the cities they will live in *Portraits of Influential Chinese Educators* Ruth Hayhoe, 2007-05-11 Portraits whether graphic or verbal have distinct purposes and values Through deliberate selection they seek to reveal and thereby to illuminate In their literary form selection of content and style ensures that they do not presume to achieve the status of fully fledged biographies Even so a carefully brush stroked multi layered and richly textured pen portrait is capable of revealing much about both character and circumstance And what it reveals is likely to be different from and far more profound than any insights permitted by other miniatures such as simple snapshots or polemical caricatures Professor Ruth Hayhoe has produced a whole gallery of valuable portraits in the present book For a book in the present series however a key question remains How and why may pen portraits of eleven influential educators from a single country and within roughly the same time frame contribute significantly to the literature of comparative education My own answer to this question is simple This particular gallery makes its important contribution in two main ways and for a number of good reasons The How part of the question clearly involves process especially methodological process A portrait typically involves both foreground and background features Some of the most effective portraits seem to encourage their observers to recognize interplay between foreground and background **Understanding Chinese Society** Xiaowei

Zang, 2015-07-14 This second edition of *Understanding Chinese Society* provides a comprehensive readable and well grounded introduction to the key issues affecting contemporary China A thorough analysis is undertaken not only of China s family patterns education system status hierarchy and ethnic diversity but also of China s mass media legal system and social control work and cultural expression As well as being thoroughly updated and revised throughout this edition offers new chapters on urbanization the environment and civil society in China A team of international experts guide students through social issues including What are the key features of the family and marriage institutions in China How are women and men faring differently in Chinese society today How are minorities faring in China How does the education system differentiate Chinese society How are religion and cultural traditions expressed Including handy pedagogical features such as a chronology of the People s Republic of China further reading suggestions and related novels and films *Understanding Chinese Society* is suitable for anyone studying Chinese Culture and Society Chinese Studies and Asian sociology

Cultures of Uneven and Combined Development , 2019-07-08 *Cultures of Uneven and Combined Development* seeks to explore and develop Leon Trotsky s concept of uneven and combined development In particular it aims to adapt the political and historical analysis which originated in Trotsky s Russia for use within the contemporary field of world literature As such it draws together the work of scholars from both the field of international relations and the field of literature and the arts This collection will therefore be of particular interest to anyone who is interested in new ways of understanding world literary texts or interested in new ways of applying Trotsky s revolutionary politics to the contemporary world order

Aiguo, 2016-04-30 This is a study of the long run evolution of the relationship between China and the world economy The book presents an original interpretation of the country's socio economic processes in the past 150 years focusing on China's interaction with the expanding capitalist world economy The author argues that the general thrust of China's quest for development or modernization has been to catch up with the wealthy nations of the West and goes on to explain the changing paths and outcomes The book proceeds chronologically from China's mid nineteenth century incorporation to the world economy starting from a semi colonial state to the Maoist state led industrialization after 1949 and to the post Mao liberalization and reintegration By carefully examining the patterns of development in these three major periods of the nation's history it addresses fundamental issues pertaining to the making of modern China This rigorously argued book will be a timely and much debated contribution as the rise of China in the twenty first century has become an issue of our time

Remaking the Chinese City Joseph W. Esherick, 2001-10-31 In China today skyscrapers tower over ancient temples freeways deliver lines of cars and tour buses to imperial palaces cinema houses compete with old theaters featuring Peking Opera The disparity evidenced in the contemporary Chinese cityscape can be traced to the early decades of the twentieth century when government elites sought to transform cities into a new world that would be at once modern and distinctly Chinese *Remaking the Chinese City* aims to capture the full diversity of recent Chinese urbanism by examining the modernist transformations of China's cities in the first half of the twentieth century Collecting in one place some of the most interesting and exciting new work on Chinese urban history this volume presents thirteen essays discussing ten Chinese cities the commercial and industrial center of Shanghai the old capital Beijing the southern coastal city of Canton the interior's Chengdu the tourist city of Hangzhou the utopian New Capital built in Manchuria during the Japanese occupation the treaty port of Tianjin the Nationalists capital in Nanjing and temporary wartime capitals of Wuhan and Chongqing Unlike past treatments of early twentieth century China which characterize the period as one of failure and decay the contributors to this volume describe an exciting world in constant and fundamental change During this time the Chinese city was remade to accommodate parks and police paved roads and public spaces Rickshaws trolleys and buses allowed the growth of new downtowns Department stores theaters newspapers and modern advertising nourished a new urban identity Sanitary regulations and traffic laws were enforced and modern media and transport permitted unprecedented freedoms Yet despite their fondness for things Western and modern early urban planners envisioned cities that would lead the Chinese nation and preserve Chinese tradition The very desire for modernity led to the construction of a visible and accessible national past and the imagining of a distinctive national future In their investigation of the national capitals of the period the essays show how cities were reshaped to represent and serve the nation To promote tourism traditions were invented and recycled for the

pleasure and edification of new middle class and foreign consumers of culture Abundantly illustrated with maps and photographs Remaking the Chinese City presents the best and most current scholarship on modern Chinese cities Its thoroughness and detailed scholarship will appeal to the specialist while its clarity and scope will engage the general reader Contributors Michael Tsin on Canton Ruth Rogaski and Brett Sheehan on Tianjin David Buck on Changchun Kristin Stapleton on Chengdu Liping Wang on Hangzhou Madeleine Dong on Beijing Charles Musgrove on Nanjing Stephen MacKinnon on Wuhan Lee MacIsaac on Chongqing and Jeffrey Wasserstrom and David Strand with concluding essays In the Images of Development Tridib Banerjee, 2021-06-08 The urban legacy of the Global South since the colonial era and how sustainable development and environmental and social justice can be achieved Remarkably little of the expansive literature on development and globalization considers actual urban form and the physical design of cities as outcomes of these phenomena The development that has shaped historic transformations in urban form and urbanism and the consequent human experiences remains largely unexplored In this book Tridib Banerjee fills this void by linking the idea of development with those of urbanism urban form and urban design focusing primarily on the contemporary cities in the developing world the Global South and their intrinsic prospects in city design Further he examines the endogenous possibilities for the future design of these cities that may address growing inequality and the environmental crisis Banerjee deftly traces the urban legacy of the Global South from the beginning of the colonial era closely examining the economic political and ideological forces that influenced colonial and postcolonial development drawing from relevant experiences of different cities in the developing world and discussing the arguments for the historic parity of these cities with their Western counterparts Finally Banerjee considers essential notions of future city design that are grounded in the critical challenges of sustainable development equity environmental and social justice and diversity and how such outcomes can be achieved This book serves as the opening of a long overdue conversation among design development and planning scholars and practitioners and those interested in the urban development of the Global South
