Living within a Fair Share Ecological Footprint Robert Vale,Brenda Vale,2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth s capacity to supply humanity s needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity

Shared Beginnings, Divergent Lives John H. LAUB,Robert J. Sampson,2009-06-30 This book analyzes newly collected data on crime and social development up to age 70 for 500 men who were remanded to reform school in the 1940s Born in Boston in the late 1920s and early 1930s these men were the subjects of the classic study Unraveling Juvenile Delinquency by Sheldon and Eleanor Glueck 1950 Updating their lives at the close of the twentieth century and connecting their adult experiences to childhood this book is arguably the longest longitudinal study of age crime and the life course to date John Laub and Robert Sampson s long term data combined with in depth interviews defy the conventional wisdom that links individual traits such as poor verbal skills limited self control and difficult temperament to long term trajectories of offending The authors reject the idea of categorizing offenders to reveal etiologies of offending rather they connect variability in behavior to social context They find that men who desisted from crime were rooted in structural routines and had strong social ties to family and community By uniting life history narratives with rigorous data analysis the authors shed new light on long term trajectories of crime and current policies of crime control Table of Contents Acknowledgments 1 Diverging Pathways of Troubled Boys 2 Persistence or Desistance 3 Explaining the Life Course of Crime 4 Finding the Men 5 Long Term Trajectories of Crime 6 Why Some Offenders Stop 7 Why Some Offenders Persist 8 Zigzag Criminal Careers 9 Modeling Change in Crime 10 Rethinking Lives in and out of Crime Notes References Index The accounts of individuals are quite riveting and the book can be recommended strongly purely for the stories provided about diverse lives However the book is much much more than that in terms of the serious challenge that the authors findings and ideas present to some of the

leading contemporary theories of both crime and development A highly original and scholarly contribution of the highest quality Sir Michael Rutter Institute of Psychiatry King s College London ttitleShared Beginnings Divergent Lives is an extraordinary work which shows the deep insights gained by studying the whole life course beginning in childhood and ending in later life With access to a rare data archive the authors provide compelling evidence on the remarkably varied adult lives of teenage delinquents who grew up in low income areas of Boston born 1925 1935 The story behind these varied life paths and their consequences inspires fresh thinking about crime over the life course through models of life trajectories and vivid narratives that reveal the complexity of lives Glen H Elder Jr University of North Carolina at Chapel Hill This book redraws the landscape of developmental criminology that Laub and Sampson already have done so much to define setting new standards and benchmarks along the way The authors both provide new evidence for earlier conclusions and challenge prevailing assumptions and assertions thereby reshaping the criminological research agenda for years to come John Hagan Northwestern University

Silva,2025-02-25 Life is a weird and wonderful journey full of ups lows and some curves that you've never seen coming If there's one thing I've learned along the way between thunderous laughter and deep silences it's that being genuine being yourself is the greatest strength you can have I always felt that comedy was a way to connect with people Ever since I was little I loved making others laugh It was like a superpower you know But over time I realized that this power wasn't just about jokes or funny voices It was about vulnerability About showing the world that behind laughter there is a human being who also feels fear pain joy and love What really matters are the connections we make the lives we touch and the love we share I always made an effort to be there for my family for my friends and for those who needed me Because at the end of the day what you leave behind is not the trophies on the shelf but the memories you create with others And never underestimate the power of laughter not only to make others happy but to heal yourself Life is too short not to find reasons to smile even in the most difficult moments **Life Stories** Maureen O'Connor,2011-08-23 Memoirs autobiographies and diaries represent
