Sharks Among Minnows The Fokker Eindecker Period July 1915 To September 1916:

French Strategic and Tactical Bombardment Forces of World War I René Martel, 2007 Allen Suddaby's careful translation of this long out of print work is enhanced by his son Steven's recent scholarship on Great War bombing campaigns. The original 1939 text is supplemented with the results of 65 years of research and benefits from the knowledge of several experts in the field who were consulted during preparation of this edition. **BOOK JACKET** Law, Death, and Robots Keri Grieman, 2024-10-17 Can the law keep up with AI? This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future. While AI moves quickly, regulation follows more slowly, an increasing problem for an evolutionary fast-paced emerging technology. AI has the potential to save lives but in doing so will have the potential to take them as well. How do we future-proof law and regulation to incentivise life-saving innovation as safely as possible? This book details how to regulate AI in high-risk civil applications, for example automated vehicles and medicine, addressing both liability and regulatory structure. It highlights crucial liability themes for technology governance, provides tools to bridge the gap between regulators and technologists, examines jurisdictional approaches to AI regulation in the EU, UK, USA, and Singapore, and ultimately suggests a jurisdiction-agnostic blueprint for regulation. *Oswald Boelcke* R.G. Head, 2016-08-05 This biography of the pioneering WWI flying ace who mentored the Red Baron is fascinating. It captures combat aviation at its inception. MiG Sweep The Magazine of Aviation Warriors With a total of forty victories, Oswald Boelcke was Germany's first ace in World War I, and a century later he remains a towering figure in the history of air warfare, renowned for his character, inspirational leadership, organizational genius, development of air-to-air tactics, and impact on aerial doctrine. Paving the way for modern air forces across the world with his pioneering strategies, Boelcke had a dramatic effect on his contemporaries. The famed Red Baron's mentor, instructor, squadron commander, and friend, he exerted a tremendous influence upon the German air force. He was one of the first pilots to be awarded the famous Pour le Mérite, commonly recognized as the Blue Max. All of this was achieved after overcoming medical obstacles in childhood and later life with willpower and determination. Boelcke even gained the admiration of his enemies. After his tragic death in a mid-air collision, Britain's Royal Flying Corps dropped a wreath on his funeral, and several of his captured foes sent another wreath from their German prison camp. His name and legacy live on, as seen in the Luftwaffe's designation of the Tactical Air Force Wing 31 Boelcke. This definitive biography reveals his importance as a fighter pilot who set the standard in military aviation. *War Over the Trenches* E. R. Hooton, 2010 War over the Trenches is the first internationally researched study to portray how air power really evolved and how it was really used to support armies during the massive and devastating battles on the Western Front. E. R. Hooton examines how air power was deployed en masse for the first time over Verdun and its subsequent use over the Somme in the second half of 1916, how reconnaissance and measures of co-operation with artillery were developed, and refined the recovery of Allied air power during the autumn and summer of 1917 following months of
